To the Guam Public Auditor of the Territory of Guam:

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to exercise your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.

To the Guam Public Auditor of the Territory of Guam:

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to exercise your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.

To the Guam Public Auditor of the Territory of Guam:

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to ~~exercise~~ your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.

To the Guam Public Auditor of the Territory of Guam:

*Return by
1.20 to
Cruz*

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. **Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.**

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to ~~exercise~~ your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.

To the Guam Public Auditor of the Territory of Guam:

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. **Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.**

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to ~~exercise~~ exercise your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.

To the Guam Public Auditor of the Territory of Guam:

The John F. Kennedy High School community has come together to express our support of the JFK re-build project that was mandated by PL 29-114, and which has been supported by your administration through the efforts of the Department of Public Works, and the Guam Economic Development Authority.

As parents, teachers and students who are affected by the educational crisis created by the closure of the JFK campus, we are acutely aware of the hardships that are caused by every single day of delay in getting our Islanders back to their home. A major portion of the JFK High School Community has suffered enough already while we stood by and waited for the Government to follow through with re-building our Campus. We have been supportive and patient. We have endured the trials of the situation and have done so with heavy hearts, but still holding out hope that in the end, the Government would come through for us. With all of the difficulties that we have had to overcome just to get the education to which each and every one of us are entitled, it has been much like walking through a tunnel.

And just when there appeared to be light at the end of the tunnel, we learned of the protests that were filed against the selection of the winning bidder, International Bridge Corporation. But rather than causing us to despair, these protests have strengthened our resolve to see our Islander Home re-built. It inspired us to confront the Senators who would try to impose a change on the procurement process that would further delay the work needed to get us home. Our Islander spirit remains high, and we call upon you, as the Chief Public Auditor of our Island, to concur with the Declarations of Substantial Government Interests for the People of Guam, and for the good of the JFK Community; and to please declare the protest did not cite any direct or indirect violation of the law relating to the procurement process. **Consequently, we request the appeal herein should be rejected and denied allowing the process to move forward.**

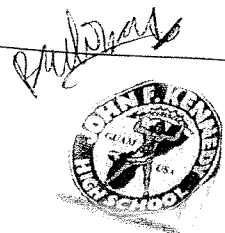

Chief Public Auditor please help the Islanders get back home to our Upper Tumon campus again.

Your petitioners therefore request the Guam Public Auditor to exercise your authority and concur with the Declaration of Substantial Interests for the Territory of Guam; that reaffirms and validates our full support to address the immediate need to rebuild the John F. Kennedy High School facility in Upper Tumon, Guam; be built in time for SY 2010-2011; and which is specifically mandated by Public Law 29-114 that was unanimously voted by the 29th Guam Legislature.
