Entry of Appearance
In the Appeal of: Core Tech International
Office of Public Accountability Docket No. OPA-PA-17-001

**ORIGINAL** 

For purposes of this appeal, please direct correspondence to DPW's counsels, Thomas P. Keeler (<a href="mailto:tkeeler@guamag.org">tkeeler@guamag.org</a>) and Shannon J. Taitano (<a href="mailto:staitano@guamag.org">staitano@guamag.org</a>), Office of the Attorney General, 590 S. Marine Corps Drive, ITC Bldg., Ste. 802, Tamuning, Guam 96913. Tel. No. 475-3324; Fax No. 472-2493.

#### II. APPEAL INFORMATION

- A. Purchasing Agency: Department of Public Works, Government of Guam
- B. Project No. 730-5-1056-L-YIG
- C. Date of Request for Proposals ("RFP"): January 25, 2017. See RFP, Exhibit A attached hereto.
- D. Date of Contract: N/A
- E. This appeal is made by Core Tech International Corp. ("Core Tech") from the Department of Public Works partial denial of Core Tech's February 8, 2017 Protest (the "Protest"). See, Protest, Exhibit B attached hereto.
- F. The names of the prospective companies listed on the proposal package pickup list are:
  - Guam Educational Facilities Foundation
  - Agbayani Construction Corp.
  - Pacific Rim Constructors Inc.
  - Zhong Ye Inc. (Guam)
  - Core Tech International Corp.
- G. Upon filing of this Appeal and pursuant to 2 GAR § 9011(e), DPW issued a Stay of Procurement.

#### III. RELEVANT BACKGROUND

Public Law 32-120, the *MA KAHAT ACT* OF 2013 passed into law on February 10, 2013. *See*, P.L. 32-120, attached as **Exhibit C.** Among other items the Act added a new chapter 58D to Title 5, Guam Code Annotated, relative to the renovation or construction of a-new Simon Sanchez High School and related financing. Public Law 32-121, also known as *MA KAHAT ACT* OF 2013 (the "Act"), added a new Chapter 58E to the Guam Procurement Law. *See*, P.L. 32-121, attached **Exhibit D**. The Act authorized the government to issue a Request for Proposals for the renovation or construction of Simon Sanchez High School ("Simon Sanchez HS") and the development of a comprehensive capital improvement plan for prioritizing capital improvements to all Guam

Department of Education ("GDOE") schools. See, Exhibit C at 1.

On January 25, 2017, the Department of Public Works ("DPW") issued a Request for Proposals Project No. 730-5-1056-L-YIG Lease Financing for Design, Renovation, Rehabilitation, Construction and Maintenance for Public Schools (Beginning with Simon Sanchez High School). See, Exhibit A. The RFP, as authorized by the Act, contemplated that priority would be given to

Simon Sanchez HS and the development of a comprehensive capital improvement plan. Id.

Core Tech filed a written protest on February 8, 2017, asserting two (2) claims. See, Protest, **Exhibit B.** Core Tech's first claim was that the RFP fails to include cost as an evaluation factor. Its second claim was that the RFP fails to follow the requirements of 5 GCA 58E, which it claims requires a separate procurement for the remaining thirty-four (34) public schools. DPW issued its Agency Decision on March 2, 2017, acquiescing to Core Tech's first claim and denying its second claim. See, Agency Decision, **Exhibit E** attached hereto. Core Tech appealed to DPW's denial of the second claim as set forth in the Protest.

### DPW AGREES TO LIMIT THE CURRENT RFP TO THE SIMON SANCHEZ HS PROJECT AND THE CCIP

Public Laws 32-120 and 32-121 direct DPW to prioritize the renovation or reconstruction of Simon Sanchez High School ("Simon Sanchez HS"). The procurement, which is of critical importance to Guam, in particular the students and staff of Simon Sanchez HS, has been stayed since the filing of the Protest. In order for DPW to comply with its mandate to prioritize the Simon Sanchez HS Project, it agrees to limit the RFP to the Simon Sanchez HS Project and preparation of the CCIP.

DPW's agreement addresses all of Core Tech's issues on Appeal with the exception of Core Tech's claim that the Guam Department of Education is required to complete a "Program Study" prior to issuance of a second RFP for maintenance of Guam's remaining public schools. DPW disputes this and contends that the CCIP was intended in lieu of the Program Study. However, as this issue relates solely to an RFP that will issue in the future, the dispute is moot for purposes of the current RFP.

///

///

Accordingly, DPW does not need to respond to the specifics contained in Core Tech's Protest.

DPW respectfully requests that the OPA dismiss this appeal on the basis that DPW has agreed to issue an Amended RFP as provided herein.

#### **CONCLUSION**

In closing, DPW's legislative mandate is to prioritize the Simon Sanchez HS Project and as such it agrees to limit the RFP to the Simon Sanchez HS Project and preparation of the CCIP. DPW's Agreement resolves Core Tech's issues on appeal other than GDOE's need to prepare a Program Study, an issue that is moot until issuance of the second RFP.

#### RELIEF REQUESTED BY DPW

DPW respectfully request a ruling from the OPA as follows:

- 1. Core Tech's Appeal be dismissed.
- 2. For such other relief that the OPA may determine is just and proper.

Submitted this 31st day of March, 2017.

#### OFFERORS CHECKLIST

### This Checklist is provided for assistance only and should not be submitted with Offerors proposal

#### The 10 Most Critical Things to Keep in Mind When Responding to this RFP

- 1. Read the <u>entire</u> document. Note critical items such as: mandatory requirements; supplies/services required; Schedule of Events; form of proposals; public laws cited; contract requirements (i.e., contract performance security, insurance requirements, performance and/or reporting requirements, etc.).
- 2. Note the procurement officer's name, address, phone numbers and e-mail address. This is the only person you are allowed to communicate with regarding the RFP and is an excellent source of information for any questions you may have.
- 3. Attend the pre-proposal conference if one is offered. These conferences provide an opportunity to ask clarifying questions, obtain a better understanding of the project, or to notify DPW of any ambiguities, inconsistencies, or errors in the RFP.
- 4. Take advantage of the "question and answer" period. Submit your questions to the procurement officer by the due date listed in the Schedule of Events and review the answers given, which will be in the form of an addendum to the RFP.
- 5. Follow the format required in the RFP when preparing your response. Provide point-by-point responses to all sections in a clear and concise manner.
- 6. Provide complete answers/descriptions. Read and answer all questions and requirements. Don't assume DPW will know what your company capabilities are or what items/services you can provide, even if you have previously contracted with DPW. The proposals are evaluated based solely on the information and materials provided in your proposal.
- 7. Use the forms provided, i.e., cover page, Non-collusion Affidavit form, etc.
- 8. Check DPW's website for RFP addenda. Before submitting your proposal, check DPW's website at <a href="http://www.dpw.guam.gov">http://www.dpw.guam.gov</a> to see whether any addenda were issued for the RFP. If so, you must submit a signed copy of the addendum for each addendum issued along with your proposal.
- 9. Review and read the RFP document again to make sure that you have addressed all requirements. Your original response and the requested copies must be identical and be complete. The copies are provided to the evaluation committee members and will be used to score your response.
- 10. Submit your response on time. Note all the dates and times listed in the Schedule of Events and within the document, and be sure to submit all required items on time. Late proposal responses are *never* accepted.

#### SECTION 2: PROJECT OVERVIEW AND INSTRUCTIONS

#### 2.0 <u>INTENT</u>

The Governor of Guam through the Guam Department of Public Works (hereinafter referred to as (DPW) with the assistance of the Guam Department of Education (hereinafter referred to as (GDOE) is seeking a qualified firm to provide financing, design. renovation and construction and to provide collateral equipment. maintenance and insurance as mandated under Public Laws 32-120 and 32-121 for a total of thirty-five (35) Guam Department of Education (GDOE) schools with priority of Simon Sanchez High School, as well as the development of a comprehensive capital improvement plan, as defined in 5 G.C.A. § 58D103(b) & 58EI01(a). The Army Corps of Engineering assessment report (Attachment A-14) shall be utilized to identify and prioritize potential projects to be completed.

Prospective Offerors are directed to read referenced Public Laws 32-120 and 32-121, Public Law 20-27 as amended by P.L. 31-118 amending subsections 850, 852 & 853 of Title I of the Guam Code Annotated. These laws are available on the World Wide Web at http://www.guamlegislature.com. All offerors are to understand that in the event of conflict between representations made in this RFP and a public law, the public law controls.

It is the intent that an indefinite delivery indefinite quantity (IDIQ) contract for financing. design, renovation, and construction services of ODOE school facilities will be awarded to the most responsive and responsible Proposer whose proposals meet the needs of the Department of Public Works (DPW) to the best degree as set forth in this RFP

Once a firm is selected, a scope of work and fee estimate will be negotiated to perform the required services for-Simon Sanchez High School. A task order will be developed and executed for the remaining thirty four (34) public schools based on the priority list and needs of GDOE after the completion of the Comprehensive Capital Improvement Plan.

The proposal that delivers the best value for Guam in meeting the objectives of the Department of Education is determined by the evaluation criteria and negotiation phase of the procurement process.

#### 2.1 PERIOD OF PERFORMANCE

#### 2.1.1 Simon Sanchez and IDIQ Design/Construction/Renovation/Demolition/CIP:

The period of performance to complete the Simon Sanchez High School Facility is <u>seven hundred</u> and thirty (730) calendar days commencing from the date of award of the negotiated task order.

Period of performance of the IDIQ contract for financing, design, renovation, and construction services is for a five (5) year period commencing from the date of award.

The period of performance of the IDIQ for each remaining thirty-four (34) GDOE school facilities will be negotiated and awarded on a task order basis per school facility based on the priority list

and needs of GDOE after the completion of the Comprehensive Capital Improvement Plan.

Period of performance to complete the Comprehensive Capital Improvement Plan is 365 calendar days commencing from the date of award of the negotiated task order.

#### 2.1.2 Lease Back Agreement:

The lease-back period for each school will not exceed Thirty (30) years from the schedule date of completion of the educational facility.

#### 2.2 REQUEST FOR PROPOSAL

- 2.2.1 Availability: This Request for Proposal (RFP) is available for download from DPW's website at <a href="https://www.dpw.guam.gov">www.dpw.guam.gov</a> and public inspection at DPW's office located at 542 North Marine Corps Drive, Upper Tumon, Guam 96913, Monday through Friday, excluding holidays, between 8:00 a.m. and 5:00 p.m. A copy of the RFP may be picked up at the DPW office or mailed or e-mailed to a prospective Offeror by DPW upon receipt of payment of a non-refundable fee of Two Hundred U.S. Dollars (\$200.00) payable in cash, or by cashier's or certified check payable to the Treasurer of Guam / DPW. Upon obtaining this RFP, prospective Offerors must complete the Acknowledgement of Receipt Form set forth as Attachment A-13 (Page 105) to this RFP and return the completed form to DPW in order to receive any addenda or other notices related to this RFP (5GCA 5220 (b). Failure by prospective Offerors to submit the Acknowledgement of Receipt Form to DPW may result in the prospective Offeror not receiving notices from DPW regarding this RFP, including addenda, point deductions during the proposal evaluation process, or proposals may be deemed non-responsive.
- 2.2.2 Amendments. DPW reserves all rights to revise or amend this RFP prior to the date set for opening proposals. Such revisions and amendments, if any, will be announced by an amendment or addendum to this RFP and shall be identified as such. Any amendment shall refer to the portions of the RFP it amends. Amendments and addenda shall be sent to all prospective Offerors who have submitted the Acknowledgement of Receipt Form to DPW and shall also be made available on DPW's website. All prospective Offerors who have submitted the Acknowledgement of Receipt Form to DPW must acknowledge receipt of all amendments or addenda issued

#### 2.3 PRE-PROPOSAL QUESTIONS AND CONFERENCE

- 2.3.1 Pre-Proposal Questions. Offerors with questions or requiring clarification or interpretation of any section within this RFP must address their questions in writing or via e-mail to the procurement officer referenced below on or before the deadline set forth in the Schedule of Events. Each question must provide clear reference to the section, page, and item of this RFP in question. Questions received after the deadline may not be considered.
- **2.3.2 DPW's Answers.** DPW will provide an official written answer by the date set forth in the Schedule of Events to all questions received by the stated due date. DPW's response will be by written addendum. Any other form of interpretation, correction, or change to

this RFP will not be binding upon the DPW. Any written addendum will be forwarded to all entities or individuals who have picked-up an RFP and submitted an Acknowledgement of Receipt Form by the close of business on the date of issuance of DPW's answers. Offerors must sign and return all addenda with their proposals.

**2.3.3 Pre-proposal Conferences.** Pre-proposal conferences and site inspections may be permitted prior to the deadline for submission of proposals. The conferences will be conducted only to explain the procurement requirements for this Request for Proposal. Notice of any pre-proposal conference and site inspections will be provided to all entities or individuals who have picked-up an RFP and submitted an Acknowledgement of Receipt Form. DPW will notify all Offerors in writing via an addendum to this RFP of any substantive clarification provided in response to any inquiry raised during the pre-proposal conference.

#### 2.4 PROPOSALS

- **2.4.1.** General. Proposals must be in writing, signed in ink, and prepared as described in Section 6.- Offerors must clearly mark one proposal as "ORIGINAL" and provide seven (7) copies and three (3) CDs. The original and copies must be placed in a sealed envelope clearly labeled with the RFP Number, RFP Title, and Proposal Due Date. The original should be unbound and each hard copy must be separately bound. -Erasures or other changes in a proposal must be explained or noted over the signature of the Offeror. Proposals containing any conditions, omissions, unexplained erasures or alterations or items not called for in the RFP, or irregularities of any kind may be rejected by DPW as being non-compliant.
- **2.4.2. Modification or Withdrawal of Proposals.** Proposals may be modified or withdrawn in accordance with Guam Procurement Law.
- **2.4.3.** No Late Proposals. Proposals must be <u>received</u> at the receptionist's desk of DPW by the Proposal Due Date set forth in the Schedule of Events. Email or facsimile proposals will not be accepted. Regardless of cause, <u>late proposals will not be accepted</u> and will automatically be disqualified from further consideration. It shall be the Offeror's sole risk to assure delivery at the receptionist's desk at the designated office by the designated time. Late proposals will not be opened and may be returned to the Offeror at the expense of the Offeror or destroyed if requested.
- **2.4.4. DPW Not Responsible for Preparation Costs.** The costs for developing and delivering proposals in response to this RFP and any subsequent presentations of the proposal as requested by DPW shall be at the sole cost and expense of the Offeror. DPW is not liable for any expense incurred by the Offeror in the preparation, delivery, and/or presentation of its proposal or any other costs incurred by the Offeror.
- 2.4.5. All Timely Submitted Materials Become the Property of DPW. All materials submitted in response to this RFP become the property of DPW and shall be appended to any formal documentation, which would further define or expand any contractual/lease relationship between the government of Guam and/or the Department of Education and the Offeror resulting from this RFP process.

- **2.4.6.** Rejection of Proposals. Any proposal submitted in response to this RFP may be rejected in whole or in part when it is in the best interests of DPW or the government of Guam in accordance with Guam Procurement Regulations § 3115(e).
- 2.4.7 Multiple or Alternate Proposals. Multiple or alternate proposals will not be accepted.

#### 2.5 <u>DISCUSSIONS AND EVALUATION</u>

- 2.5.1. Selection Committee. (5GCA 58D105 & 58E103) The choice of the firm shall be made by a selection committee comprised of the Superintendent of Guam Department of Education (GDOE), serving as Chairman and including the Director of Department of Public Works (DPW) or Deputy Director, the Director of the Department of Land Management (DLM) or Deputy Director, the Administrator of the Guam Environmental Protection Agency (GEPA) or Deputy Administrator, and the Administrator of the Guam Economic Development Authority (GEDA) or Deputy Administrator.
- **2.5.2 Discussions.** In accordance with the Guam Procurement Regulations, the evaluation committee may conduct discussions with any Offeror at anticipated date and time as stated in **Section 1**. The purposes of such discussions shall be to (1) determine in greater detail the Offeror's qualifications; and (2) explore with the Offeror the scope and nature of the required services, the Offeror's proposed method of performance, and the relative utility of alternative methods of approach. At least one key Offeror representative must be present for such discussions. In conducting discussions there shall be no disclosure of any information derived from proposals submitted by competing Offerors.
- **2.5.3.** Evaluation of Proposals. The evaluation committee will review and score written proposals based on the Evaluation Criteria identified in Section 5.
- 2.5.4. Selection of the Best Qualified Offerors and Award. After completion of Discussion and Evaluation of Proposals phases, the evaluation committee shall select, in the order of their respective qualification ranking the best qualified Offeror(s) The Head of the Selection Committee will review the ranking to ensure its compliance with the RFP process and evaluation criteria before presenting the evaluation committee's ranking to the Procurement Officer for approval. Once approved, the Negotiating Committee, comprised of DPW's Director or Deputy Director, GDOE's Superintendent and GEDA's Administrator or Deputy Administrator, will negotiate a contract with the best qualified Offeror. If compensation, contract requirements or contract documents cannot be agreed upon, the Negotiation Committee may enter into negotiations with the next most qualified offeror.

#### 2.6 <u>LEGAL REQUIREMENTS</u>

Each Offeror is required to submit the affidavits and assurances attached as **Attachments A-1 through A-6.** Failure to include said affidavits and assurances shall render a proposal non-responsive.

Affidavit Disclosing Ownership and Commissions per 5 G.C.A. § 5233 (Attachment A-1). As a condition of this RFP, any partnership, sole proprietorship, joint venture,

association or corporation doing business with the government of Guam shall submit an affidavit executed under oath that lists the name and address of any persons, companies, partners, or joint ventures who have held more than ten percent (10%) of the outstanding interest or shares in said partnership, sole proprietorship joint venture, association or corporation at any time during the 365 days immediately preceding the submission date of a proposal. The affidavit shall contain the number of shares or the percentage of all assets of such partnership, sole proprietorship joint venture, association or corporation which have been held by each such person during the 365 day period. In addition, the affidavit shall contain the name and address of any person who has received or is entitled to receive a commission, gratuity or other compensation for procuring or assisting in obtaining business related to this RFP for the Offeror and shall also contain the amounts of any such commission, gratuity or other compensation. The affidavit shall be open and available to the public for inspection and copying.

- Affidavit re Non-Collusion per 2 GAR Division 4 § 3126(b) (Attachment A-2). By submitting an offer, the Offeror certifies that the price submitted was independently arrived at without collusion.
- Affidavit Re No Gratuities or Kickbacks per 2 GAR Division 4 § 11107(e) (Attachment A-3). The bidder, Offeror, or contractor represents that it has not violated, is not violating, and promises that it will not violate the prohibition against gratuities and kickbacks set forth in §11206 (Gratuities and Kickbacks) of the Guam Procurement Regulations. Gratuities. It shall be a breach of ethical standards for any person to offer, give or agree to give any employee or former employee, or for any employee or former employee to solicit, demand, accept or agree to accept from another person, a gratuity or an offer of employment in connection with any decision, approval, disapproval, recommendation, preparation of any part of a program requirement or a purchase request, influencing the content of any specification or procurement standard, rendering of advice, investigation, auditing, or in any other advisory capacity in any proceeding or application, request for ruling, determination, claim or controversy, or other particular matter, pertaining to any program requirement or a contract or subcontract; or to any solicitation or proposal therefor. Kickbacks. It shall be a breach of ethical standards for any payment, gratuity or offer of employment to be made by or on behalf of a subcontractor under a contract to the prime contractor or higher tier subcontractor or any person associated therewith, as an inducement for the award of a subcontract or order.
- Affidavit re Contingent Fees per 2 GAR § 11108 (Attachment A-4). It shall be a breach of ethical standards for a person to be retained, or to retain a person, to solicit or secure a government contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, except for retention of bona fide employees or bona fide established commercial selling agencies for the purpose of securing business.
- Affidavit RE Ethical Standards per 2 GAR § 11103 (Attachment A-5). The bidder, Offeror, or contractor represents that it has not knowingly influenced and promises that it will not knowingly influence a government employee to breach any of the ethical standards set forth in 5 GCA Chapter 5 Article 11 (Ethics in Public Contracting) of the Guam Procurement Act and in Chapter 11 of the Guam Procurement Regulations.

#### 2.7 PROHIBITION AGAINST EMPLOYMENT OF SEX OFFENDERS

Pursuant to 5 G.C.A. § 5253,

- (a) No person convicted of a sex offense under the provisions of Chapter 25 of Title 9 Guam Code Annotated, or an offense as defined in Article 2 of Chapter 28, Title 9 GCA in Guam, or an offense in any jurisdiction which includes, at a minimum, all of the elements of said offenses, or who is listed on the Sex Offender Registry, and who is employed by a business contracted to perform services for an agency or instrumentality of the government of Guam, shall work for his employer on the property of the government of Guam other than a public highway.
- (b) All contracts for services to agencies listed herein shall include the following provisions: (1) warranties that no person providing services on behalf of the contractor has been convicted of a sex offense under the provisions of Chapter 25 of Title 9 GCA or an offense as defined in Article 2 of Chapter 28, Title 9 GCA, or an offense in another jurisdiction with, at a minimum, the same elements as such offenses, or who is listed on the Sex Offender Registry; and (2) that if any person providing services on behalf of the contractor is convicted of a sex offense under the provisions of Chapter 25 of Title 9 GCA or an offense as defined in Article 2 of Chapter 28, Title 9 GCA or an offense in another jurisdiction with, at a minimum, the same elements as such offenses, or who is listed on the Sex Offender Registry, that such person will be immediately removed from working at said agency and that the administrator of said agency be informed of such within twenty-four (24) hours of such conviction.

#### 2.8 <u>EQUAL OPPURTUNITY</u>

- (a) The Contractor will not discriminate against any employee or applicant for employment because of race, religion, sex, color, age, economic status, or national origin. The Contractor will take affirmative action to insure that qualified applicants are employed and that employees are treated during employment without regard to their race, religion, sex, color, age, economic status, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoffs or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Contracting Officer setting forth the provisions of this nondiscrimination clause.
- (b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, religion, sex, color, age, economic status, or national origin.
- (c) The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice,

to be provided by the Contracting Officer, advising the said labor union or workers' representative of the Contractor's commitments under Section 202 of Executive Order No. 11246 of September 24, 1965 and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

#### 2.9 HIRING APPRENTICES

The Contractor shall hire for performance of work under this contract apprentice(s) to be employed in the performance of work under this contract if H2 workers are employed in accordance with Executive Order No. 2014-06 and 2014-09.

#### 2.10 MINIMUM WAGE RATE

All temporary alien workers (H2) employed on this project shall be paid not less than minimum wage applicable to the corresponding skill or craft as determined by the Department of Labor, Government of Guam. Prevailing wage rates of Department of Labor, Government of Guam are attached herewith and shall be deemed a part of the contract documents. (See Attachment A-7: PREVAILING WAGE RATE FOR TEMPORARY ALIEN).

For the latest U.S. Department of Labor Wage Determination: Guam, Northern Marianas Islands, visit <a href="http://www.wdol.gov/wdol/scafiles/std/05-2147.txt">http://www.wdol.gov/wdol/scafiles/std/05-2147.txt</a>

#### 2.11 WAGE AND BENEFITS DETERMINATION FOR SERVICES

Offerors submitting proposals must pay employees providing services procured through this RFP in accordance with the Wage Determination for Guam and the Northern Mariana Islands issued and promulgated by U.S. Department of Labor for such labor as is employed in the direct delivery of contract deliverables to the government of Guam. 5 GCA § 5801 and § 5802, as applicable. A copy of the most recent wage determination is included herein (See Attachment A-8: THE WAGE DETERMINATION FOR SERVICE CONTRACT ACT). The Wage Determination for Guam and the Northern Mariana Islands also can be found on the U.S. Department of Labor's website: http://www.wdol.gov.

Offerors submitting proposals must provide health and similar benefits for employees, such benefits having a minimum value as detailed in the Wage Determination issued and promulgated by U.S. Department of Labor and shall contain provisions guaranteeing a minimum of ten (10) paid holidays per annum per employee. 5 GCA § 5802.

See Attachment A-8A: AG Procurement Form 006 (Feb. 16, 2010) must be completed and included in all responses to this RFP.

#### SECTION 3: GENERAL INFORMATION

#### 3.0 <u>AUTHORITY</u>

This RFP is issued under the authority of Public Laws 32-120 and 32-121, the Guam Procurement Act and the Guam Procurement Regulations. The request for proposal process is a procurement option allowing the award to be based on stated evaluation criteria. The RFP states the relative importance of all evaluation criteria. No other evaluation criteria, other than as outlined in the RFP, will be used.

#### 3.1 OFFEROR COMPETITION

DPW encourages free and open competition among Offerors. Whenever possible, DPW will design specifications, proposal requests, and conditions to accomplish this objective, consistent with the necessity to satisfy DPW's need to procure technically sound proposals

#### 3.2 SINGLE POINT OF CONTACT

From the date this RFP is issued until final award, Offerors shall not communicate with any DPW staff, or other government of Guam officials regarding this procurement, except at the direction of the procurement officer in charge of this solicitation. Any unauthorized contact may disqualify the Offeror from further consideration. Contact information for the single point of contact is as follows:

John F. Calanayan
The Department of Public Works
542 North Marine Corps Drive
Upper Tumon, Guam 96913
john.calanayan@dpw.guam.gov
Phone: (671) 646-646-3189

#### 3.3 PRIME CONTRACTOR/SUBCONTRACTORS PARTNERSHIP

The Offeror, or a member of the Offeror's Team, as identified in their proposal, awarded a contract under this RFP will be the Prime Contractor and shall be responsible, in total, for all work of any subcontractors. All subcontractors, if known at the time of proposal submission, must be listed in the proposal. DPW reserves the right to approve all subcontractors. Subcontractors should be capable of submitting performance bond and to comply with 5 GCA 58D106 requirements. The Prime contractor shall be responsible to DPW for the acts and omissions of all subcontractors or agents and of persons directly or indirectly employed by such subcontractors, and for the acts and omissions of persons employed directly by the contractor. Further, nothing contained within this document or any contract created as a result of any award derived from this RFP shall create any contractual relationship(s) between any subcontractor and DPW.

#### 3.4 TAXES

Offerors are cautioned that they are subject to Guam Business Privilege Taxes and Guam Income Taxes. Specific information regarding taxes may be obtained from the Director of Revenue and Taxation.

#### 3.5 LICENSING

Offerors are cautioned that they are subject to Guam Licensing laws. Specific information on licenses may be obtained from the Director of Revenue and Taxation.

Offeror shall have a Current Certificate of Authorization (COA) to contract for architectural or engineering services issued by the Guam Board of Registration for Professional Engineers, Architects and Land Surveyors prior to the award.

#### 3.6 <u>RECEIPT/OPENING OF PROPOSALS</u>

Proposals shall not be opened publicly, and shall be opened in the presence of two or more procurement officials. Proposals and modifications shall be time-stamped upon receipt and held in a secure place until the established due date. After the date established for receipt of proposals, a Register of Proposals shall be prepared which shall include for all proposals the name of each Offeror, the number of modifications received, if any, and a description sufficient to identify the supply, service, or construction item offered. The Register of Proposals shall be opened to public inspection only after award. Proposals and modifications shall be shown only to government personnel having a legitimate interest in them.

#### 3.7 <u>CLASSIFICATION OF PROPOSALS AS RESPONSIVE OR NON-RESPONSIVE</u>

All proposals will initially be classified as either "responsive" or "non-responsive". Proposals may be found non-responsive any time during the evaluation process or contract negotiation if any of the required information is not provided or the proposal is not within the plans and specifications described and required in the RFP. If a proposal is found to be non-responsive, at the discretion of either committee, the proposal may not be considered further, may be subject to point deductions as provided in 3.10 or, may be waived or corrected as provided in 3.11.

#### 3.8 <u>DETERMINATION OF RESPONSIBILITY</u>

The Evaluation Committee will determine whether an Offeror has met the standards of responsibility. Such a determination may be made at any time during the evaluation process and through contract negotiation if information surfaces that would result in a determination of non-responsibility. If an Offeror is found non-responsible, the determination must be in writing, made a part of the procurement file and mailed to the affected Offeror.

#### 3.9 <u>COMPLETENESS OF PROPOSALS</u>

Selection and award will be based on the information contained in the Offeror's proposal. Proposals may not include references to information located elsewhere, such as Internet websites or libraries, unless specifically requested by DPW. Information or materials presented by Offerors outside the formal response or subsequent discussion/negotiation will not be considered, will have no bearing on any award, and may result in the Offeror being disqualified from further consideration.

#### 3.10 FAILURE TO COMPLY WITH INSTRUCTIONS

Offerors failing to comply with the instructions set forth in this RFP may be subject to point deductions. The Selection Committee may also choose to not evaluate, may deem non-responsive, and/or may disqualify from further consideration any proposals that do not follow this RFP format, are difficult to understand, are difficult to read, or are missing any requested information.

#### 3.11 DPW RIGHTS RESERVED

While DPW and the government of Guam have every intention to issue an award as a result of this RFP, issuance of the RFP in no way constitutes a commitment by DPW or the government of Guam to award and execute a contract. Upon a determination such actions would be in its best interest, DPW, in its sole discretion, reserves the right to:

- Cancel or terminate this RFP as provided in the Guam Procurement Regulations;
- Reject any or all proposals received in response to this RFP in the best interests of DPW or the government of Guam as provided in the Guam Procurement Regulations;
- Waive any undesirable, inconsequential, or inconsistent provisions of this RFP which would not have significant impact on any proposal;
- Waive any minor informalities in proposals received, or have them corrected by the Offeror in accordance with applicable regulations;
- Not award if it is in the best interest of DPW or the government of Guam not to proceed with contract execution; or
- If awarded, terminate any contract if DPW determines adequate funds are not available.

#### 3.12 NONDISCLOSURE OF DATA

In accordance with Guam Procurement Regulations § 3114(h) (2), Offerors may identify trade secrets and other proprietary data contained in their proposals. If the Offeror selected for award has requested in writing the nondisclosure of trade secrets and other proprietary data so identified, DPW shall examine the request to determine its validity prior to entering into negotiations. If the parties do not agree as to the disclosure of data, DPW shall inform the Offeror in writing what portion of the proposal will be disclosed and that, unless the Offeror withdraws the proposal or protests under 5 G.C.A. Chapter 5 Article 9 the proposal will be so disclosed.

#### 3.13 <u>DEBARMENT</u>

The Offeror certifies, by submitting its proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any governmental department or agency. If an Offeror cannot certify this statement, attach a written explanation for review by the DPW.

### SECTION 4-A: DESIGN/CONSTRUCTION/RENOVATION/DEMOLITION SCOPE OF WORK

#### 4.0 OVERVIEW

The scope of work for this RFP includes financing and lease financing for rehabilitation, construction, expansion and renovation (inclusive of architectural and engineering design) of thirty five (35) schools with a total of cost of up to One Hundred Million Dollars (\$100,000,000.00). Simon Sanchez High School shall be the first priority. The Offeror shall include project approach for Simon Sanchez High School with their proposal including furniture and equipment.

A component of this RFP is the development of a Comprehensive Capital Improvement Plan for the Guam Department of Education (GDOE). The plan must take into consideration the physical condition of each school, along with attendance area population, enrollment patterns, and bussing logistics, it shall also include how each school meets the instructional needs of GDOE and prioritizes repairs of existing schools and renovation and construction of new school facilities in order to deal with GDOE limited resources. As per section 2.0 as required by PL 32-120 and PL 32-121.

The Awardee shall work with the Guam Department of Education, Department of Public Works and Guam Economic Authority to identify and prioritize potential projects to be completed based on the assessment report generated by U.S Army Corps of Engineers in August 2013, and the latest Federal and Local Building Code Standards. With the findings and identification of available funding, it is the intention of the DPW to enter into an Indefinite Delivery/Indefinite Quantity (IDIQ) contract with the successful Offeror. Task Orders will be issued and released under the IDIQ Contract for the rehabilitation, construction, expansion and renovation of the remaining (34) public school facilities on Guam, and such other items as are discussed in this RFP. The construction period is expected to be completed within five years after issuance of the Task Order.

- 4.0.1 The Offeror shall include project approach and cost estimates for Simon Sanchez High School and the Development of the Capital Improvement Plan with their proposal based on the August 2013 US Army Corps of Engineers assessment report the listed deficiencies and also for providing furniture and equipment to facilitate the function of the schools. The remaining thirty four (34) schools will be issued as Task Orders based on the results of the Comprehensive Capital Improvement Plan in which the cost estimates will be requested.
- 4.0.2 The Offeror shall prepare cost estimate and project approach to provide capital maintenance and insurance for Simon Sanchez High School. Capital maintenance shall include the capital structure which includes civil, structural, mechanical and electrical excluding collateral equipment. Capital maintenance will also include all inclusive routine interior and exterior maintenance.

Task Orders will be issued for the remaining 34 schools based on the results of the Capital Improvement Plan in which the cost estimate for capital maintenance and insurance will be determined.

4.0.3. In addition the Offeror shall also include a separate project approach and cost estimate for design, construction/renovation and demolition in whole or in part of Simon Sanchez High School to be in compliance with the latest Federal and Local Building Code Standards and construction of additional new facilities such as cafeteria, auditorium, Sports Facilities, Gymnasium, Track and Field, etc. and to provide furniture and equipment, maintenance and insurance as mandate under Public Law 32-121.

**4.0.3.1** The Offeror shall include in his proposal, Conceptual Plans showing the civil and architectural layout for Simon Sanchez High School based on SSHS Requirements. It shall also include all offsite development such as proposed access roads and any modifications to existing roadways or pedestrian facilities, utilities, landscaping, etc. It shall also include concept building elevations (front, side and rear elevations), and an architectural rendering depicting the type of structure, color schemes, and structures orientation relative to grounds improvements. (**Please see attached sample, ATTACHMENT A-9**)

4.0.3.2 The Offeror's proposal must also include a work plan to sequence renovation and construction work of a live and occupied facility that will not result in campus closure, double session, and utility service disruption. The plan must insure 180 instructional days are met as mandated in P.L. 28-45. (Please see attached sample, ATTACHMENT A-10)

#### 4.1 TASK ORDERS

Task Orders will be negotiated, issued and released under the Contract for the rehabilitation or construction of the GDOE schools beginning with Simon Sanchez High School educational facilities. The construction task order shall contain contractual obligations including, but not limited to:

- a) Warranties;
- b) Liquidated damages;
- c) Performance and Payment bonds;
- d) Indemnity;
- e) Insurance;
- f) Standard specifications:
- g) Technical specifications;
- h) Progress schedule;
- i) Daily reports;
- j) Maintenance;
- k) Compliance with Guam labor regulations;
- l) Compliance with Guam prevailing wage rates for employment of temporary alien workers (H2) on Guam;
- m) Compliance with Public Law 29-98: restriction against contractors employing convicted sex offenders to work at government of Guam venues.

In negotiation of subsequent task orders, Awardee pricing and costs shall be based on RS Means Facilities Construction Cost Data. The pricing and costs for each task order when submitted to the government by Awardee shall be based on the most recent information, city costs indexes, location factors, unit prices, coefficient percentage factor and other factors or data as contained in the RS Means Facilities Construction Cost Data. Each Offeror must identify their coefficient attributed to each ordering period for Task Order Coefficients.

Architect-Engineer limitation. The total cost of the architect or engineer services shall not be included in the coefficient, must be separately itemized and must not exceed 6% of the

estimated cost of the construction project plus any fees for related services and activities such as set forth below:

The six percent (6%) fee limitation does not apply to the following architect or engineer services:

- a) Investigative services including but not limited to: determination of program requirements, including schematic or preliminary plans and estimates; determination of feasibility of proposed project; preparation of measured drawings of existing facility; subsurface investigation; structural, electrical, and mechanical investigation of existing facility; and surveys: topographic, boundary, utilities, etc.;
- b) Special consultant services that are not normally available in organizations of architects or engineers and that are not specifically applied to the actual preparation of working drawings or specifications of the project for which the services are required;
- c) Reproduction of approved designs through models, color renderings, photographs, or other presentation media; travel and per diem allowances other than those required for the development and review of working drawings and specifications; supervision or inspection of construction, review of shop drawings or samples and other services performed during the construction phase; and all other services that are not an integral part of the production and delivery of plans, designs and specifications;
- d) The cost of reproducing drawings and specifications for bidding and their distribution to prospective bidders and plan file rooms.
- e) Collateral equipment, are not specified in the RS Means Cost Data Book, therefore the coefficient shall not apply. The Awardee shall not charge more than 15% overhead and profit of the direct cost of collateral equipment. GRT rate shall be added after the direct cost and 15% overhead and profit.

#### 4.2 OFFEROR REQUIREMENTS

A primary consideration of DPW and the Government of Guam is the benefits to be derived through lease financing for improved public school facilities. DPW and the Government of Guam recognize that significant public benefits can be derived through public/private partnerships and other mechanisms that, considered as a whole, exceed the benefits derived from more traditional transactions. Offerors are required to address the following requirements in their proposals:

- **4.2.1** The following minimum criteria shall be met by the Offeror/Awardee:
  - 4.2.1.1 An Offeror may be a team consisting of a Developer and/or a Contractor organized and operating under the laws of any state or territory of the United States and who may be subject to Guam Licensing laws. Specific information on licenses may be obtained from the Director of the Revenue and Taxation. A

- **4.2.1.2** If the Offeror is a Developer; it is the responsibility of the Developer to hire a Contractor based on the minimum experiences and qualifications required by this RFP. The Developer must submit his Construction Team personnel qualifications, experiences plus all other documentations necessary to assist the Evaluation Team during the evaluation process.
- 4.2.1.3 If the Offeror is a Contractor; it is the responsibility of the Contractor to hire or partner with a Developer based on the minimum experiences and qualifications required by this RFP. The Contractor must submit his Developer Team personnel qualifications, experiences plus all other documentations necessary to assist the Evaluation Team during the evaluation process.
- **4.2.1.4** Bid Bond. DPW will require that all Offerors include a Bid Bond of not less than 15% of the \$100M to be financed.
- 4.2.1.5 The Offeror or prime Construction Contractor must be bondable as required by this RFP and by law. A one hundred percent (100%) performance and payment bond must be obtained by Offeror or its prime Construction Contractor. The bond must be issued by a company authorized to do business on Guam, and listed in the U.S. Department of the Treasury's Listing of Approved Sureties (Circular 570) and delivered by the Offeror or prime Construction Contractor to DPW at the same time the construction contract is executed.
- **4.2.1.6** The Awardee shall be responsible for all costs, expenses and fees of any kind or nature, associated with the rehabilitation, design, civil improvements, on-site and off-site infrastructure, construction, permits, and financing associated with the completion of an education facility.
- **4.2.1.7** The Awardee shall work with the Guam Economic Development Authority to finance the design (including architectural and engineering), renovation or construction of all thirty-five (35) school facilities and to provide furniture and equipment.
- **4.2.1.8** The Awardee must be able to provide capital maintenance for any of the schools leased as a result of this RFP. Funding shall be by annual legislative appropriation.
- **4.2.1.9** The Awardee must be able to provide fire, earthquake and vandalism insurance for any of the schools leased as a result of this RFP. Any adjustment in insured value may be made between Awardee and Government of Guam. Funding shall be by annual legislative appropriation.
- 4.2.1.10 All thirty-five (35) school facilities shall be designed, constructed and /or renovated using certified recognized sustainable design measurement

  Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools

  (Beginning with Simon Sanchez High School)

  Project No.: 730-5-1056-L-YIG

- **4.2.2 Construction Services To Be Provided By Offerors.** The Offeror and/or the Offeror's team must be able to provide the following:
  - 4.2.2.1 Codes, Standards, Regulations and Permits. The Offeror will abide by applicable building, electrical and safety codes and all applicable legislation with regard to the Work. All permits, visas, certifications and authorizations required for execution of the work shall be obtained by the Offeror at its own cost.
    - 4.2.2.2 Safety Program. The Awardee shall provide a safety program appropriate for the Project prior to Work commencing. A description of the safety program is to be provided with the technical offer. The Awardee, its employees and subcontractors must be trained in the requirements of the safety program.
    - 4.2.2.3 Quality Control Program. The Offeror shall provide a quality control program appropriate for the Project. A description of the quality control program is to be provided with the technical offer.
    - 4.2.2.4 Coordination of the Work. The Awardee shall designate a single point of contact to act as a liaison with the committee representative. The Awardee shall review the Basis of Design for the project. Project tracking is to be accomplished utilizing scheduling software acceptable to DPW. Regular status meetings shall be conducted by the Awardee to update project status, work open issues and review change orders. Participation in these meetings by the Awardee and its liaison is mandatory.
    - 4.2.2.5 Testing. Depending on the design requirements, the Awardee may be required to conduct a geotechnical analysis and other additional testing. Testing shall be conducted by an approved independent laboratory. Results of all testing shall be made directly available to DPW.
  - 4.2.3 Jobsite Criteria and Requirements.
    - 4.2.3.1 The Awardee shall provide licensed surveys, as necessary, for the purpose of precisely locating all work to be performed.
    - 4.2.3.2 The construction site boundary will be defined by GDOE and DPW and agreed upon by the Awardee. The Awardee may, as necessary, erect and maintain a safety/security fence around the boundary of the construction site. Construction boundaries at individual structures shall be erected and maintained by the Awardee as needed during various phases of the work for safety and security.

- 4.2.3.3 The Awardee shall maintain appropriate and safe traffic control during construction phase. All traffic control during school hours shall be reviewed and approved by GDOE and DPW.
- 4.2.3.4 All fencing shall meet GDOE and DPW requirements.
- 4.2.3.5 Any construction vehicles within the construction site boundary shall have a company placard clearly visible on the vehicle.
- 4.2.3.6 The Awardee shall install and maintain proper erosion control measures to prevent run- off during construction.
- 4.2.3.7 Parking for Awardee personal vehicles shall be as directed by GDOE and DPW.
- 4.2.3.8 Temporary Utilities. The Awardee shall be responsible for connecting and disconnecting all temporary utilities at the construction site.
- 4.2.3.9 Record Documents. The Awardee shall be responsible for maintaining specifications and as-built drawings during the construction phase. At the substantial completion of the construction, the as-built drawings shall be converted into recorded documents by the Awardee. The record documents shall be in a CADD format acceptable to GDOE and DPW.
- 4.2.3.10 Operation and Maintenance. The Awardee shall be responsible for collecting, organizing, verifying accuracy and submitting an Operations and Maintenance manual to GDOE and DPW for approval. This manual shall be Comprehensive in identifying all operational and maintenance requirements to maintain applicable warranties. It shall also be instructive for maintenance personnel to operate and maintain the completed work for the expected lifetime of the material and equipment utilized in the work.

#### 4.2.4. Other Requirements. Proposals must adhere to the following:

- 4.2.4.1. The arrangement does not raise taxes or fees, or create new taxes or fees;
- **4.2.4.2.** The financial impact on the government of Guam is as stated in current public law.
- **4.2.4.3.** To ensure acceptability of the intended lease agreement by the public and the government of Guam, additional requirements may be imposed and/or negotiated that are not specifically identified in this RFP, at the discretion

of DPW, GDOE, GEDA or the government of Guam. By submitting a proposal in response to this RFP, Offerors understand and agree with this requirement.

#### 4.3 OFFEROR'S RESPONSIBILITIES

Offerors are required to review Public Laws 32-120 (Attachment A-11) and 32-121 (Attachment A-12). Should there be inconsistencies between the requirements of this RFP and the stated Public Laws, the requirements of law shall prevail.

These laws set forth the required contractual obligations to be included in the construction contract.

A leaseback agreement may be prepared once negotiations with the successful Offeror have concluded on a task order basis. Since the leaseback agreement will require the Offeror to carry out various responsibilities, including, but not limited to those listed below, proposals must indicate concurrence with paying the costs for and carrying out the major responsibilities listed below:

- **4.3.1.** Environmental Remediation. Accept responsibility for performance and costs of any environmental remediation required to rehabilitate, construct, expand and renovate public school facilities caused by the Awardee.
- **4.3.2. Insurance**. Obtain all required property, liability and workmen's compensation insurance.
- **4.3.3. Indemnification.** Indemnify the government of Guam, GDOE, GEDA and DPW from any liability arising from the implementation of the Offeror's proposal.

#### SECTION 4-B: FINANCING SCOPE OF WORK

The Scope of Work for Financing is part of the criteria in which all the proposals submitted would be based on. This section will be scored based on assigned weights as indicated in Evaluation Form. The overall weight of the financing is thirty percent (30%). The Offeror shall work with the Guam Economic Development Authority (GEDA) to finance the design (including architectural and engineering), renovation or construction of thirty-five (35) schools (beginning with Simon Sanchez High School) and to provide furniture and equipment. The Offeror must also be able to provide capital maintenance for the schools as a result of this RFP for the duration of the lease agreement. Funding shall be by annual legislative appropriation. The Offeror shall be evaluated on the following:

- a. Term Sheet to include all interest charges, fees and expenses.
- b. Responsiveness of proposal.
- c. Ability of the Lessor to lease to Lessee the facilities described in Scope of Work 4-A of this RFP.
- d. Ability of Lessor to structure municipal leases from \$100,000,000.00 to over \$300,000,000.00. Please provide examples of municipal leases financed.
- e. Ability of Lessor to offer suggestions on various arrangements for service and maintenance contracts in support of the upkeep and service of the leased facility. Please provide detail on suggested payment arrangements.
- f. Ability of Lessor to allow the purchase of the leased school facility by Lessee at any time during the lease period. Please provide detail on pre-payment arrangement scenario.
- g. Ability of Lessor to allow Lessee to cancel the lease obligation, without penalty, at the end of the current fiscal year in which appropriations were last budgeted, or otherwise made legally available, in the event budgetary funds become unavailable for appropriation in future years (Event of non- appropriation).

Non-Appropriation Clause (defined): In event that sufficient funds (a) are not appropriated by the governing body of the Government Body prior to the beginning of any Renewal Term for the payment of the Base Rentals on the Base Rental Payment Dates and reasonably estimated Additional Rentals payable during such Renewal Term, or (b) are otherwise not legally available for such purpose, then an Event of Non-appropriation shall be deemed to have occurred. If an Event of Non-appropriation shall occur, the Government Body shall not be obligated to make payment of the Base Rentals or Additional Rental's provided for herein beyond the last day of the Renewal Term during which such Event of non-appropriation occurs, except for the Government Body's obligation to pay Rentals which are payable prior to the termination of the Lease.

h. Ability of Lessor to provide 100% financing for the facility, including rehabilitation,

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools

(Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

construction, expansion, renovation, maintenance and other related costs to complete the project as per Section 4-A Scope of Work.

i. Ability of Lessor to develop a payment schedule that can be structured on an annual basis.

#### 4.4 FINANCING OFFEROR QUALIFICATION

The following minimum criteria shall be met:

- 4.4.1. Offeror as set forth in 4.2 shall be a Developer, Contractor or Finance Company who may be subject to Guam Licensing Laws, and, must be licensed to do business within Guam prior to the submission of proposal.
- 4.4.2. Offer must have and be willing to commit sufficient staff, resources, and capital to finance, develop, perform and deliver the services required by this Request For Proposal, in accordance with the terms and conditions specified herein.
- 4.4.3. Offeror must have knowledge in the municipal leaseback business. Examples should be provided or proposal to complete this financing.
- 4.4.4. Offeror must have knowledge in managing municipal leases for schools or related public and private buildings. Examples should be provided or a detailed proposal be provided to manage this project.

### 4.5 PLEDGE OF REAL PROPERTY TAX REVENUES AND BUSINESS PRIVILEGE TAX REVENUES

4.5.1 Rental payments under the lease and the lease-back may be secured by a pledge from the Territorial Educational Facilities Fund (TEFF) or other reservation of revenues by the government of Guam pursuant to § 22425(q)(4) and (6) Article 4, Chapter 22 Division 2,Title 5, Guam Code Annotated. These statutes are available on the World Wide Web at <a href="http://www.guamcourts.org/CompilerofLaws/GCA/11gca/11gc022.PDF">http://www.guamcourts.org/CompilerofLaws/GCA/11gca/11gc022.PDF</a> and the attached Public Law 32-120 Section 58D 109 (Attachment A-11)

The Territorial Educational Facilities Fund was created by Public Law 22-19 (as amended by Public Law 23-14) to account for all real property tax revenues received by or on behalf of government of Guam.

The government of Guam levies taxes on all real property at a fix rate of seven-eightieths percent (7/80%) of the assessed value and levies taxes on improvements to real property at a fix rate of seventwentieths percent (7/20%) of the assessed value of the improvements. By statute, all real property and improvements are assessed at ninety percent (90%) of appraised value. The first half of all property taxes is due December 15<sup>th</sup> of each year. The second half of all property taxes is due February 20<sup>th</sup> of each year. The entire tax on property may be paid when the first installment is due (http://www.guamcourts.org/CompilerofLaws/GCA/11gca/11gc024.PDF).

Fiscal Year	Audited Revenues
2009	20,310,866
2010	19,452,108
2011	20,147,143
2012	19,225,091
2013	21,263,267

Source: Government of Guam Audited Financial Statement

- 4.5.2 In accordance to Public Law 32-121 (Attachment A-12), rental payments under the lease and the lease-back for the public elementary and secondary schools on Guam, to include its athletic fields and playgrounds, excluding the five leased schools under the Guam Department of Education may be secured by a pledge or other reservation of revenues collected by the government from the following:
  - 1. Taxes collected under the Business Privilege Tax Law (namely, Title 11 Guam Code Annotated Chapter 26, excluding the alcoholic beverage taxes, liquid fuel taxes, automotive surcharges, tobacco taxes and real property taxes). The unpledged portion of the business privilege tax (currently one percentage point of the current four percent business privilege tax rate) in the sum of approximately One Million Eight Hundred Eighty-Two Thousand Eighty-Two Dollars (\$1,882,082) shall fund interest in Fiscal Year 2015, and the sum of approximately Two Million Five Hundred Sixty Four Thousand One Hundred Sixty-Five Dollars (\$2,564,165) shall fund interest payment annually for Fiscal Years 2016 through 2018.
  - 2. The sum of One Million Two Hundred Thousand Dollars (\$1,200,000) from revenues received pursuant to Section 22425 (q)(5) of Article 4, Chapter 22, Division 2, Title 5, Guam Code Annotated will be available annually beginning in Fiscal Year 2016. This statute is available on the World Wide Web at <a href="http://www.guamcourts.org/CompilerofLaws/GCA/11gca/11gc022.PDF">http://www.guamcourts.org/CompilerofLaws/GCA/11gca/11gc022.PDF</a> and the attached Public Law 32-121 Chapter 58E. Please also refer to Section 4.5.1 of this RFP for description of the revenues and collections.
  - 3. The sum of Four Million Eight Hundred Thousand Dollars (\$4,800,000) from the maturity of Business Privilege Tax Bonds Series 2013C shall be available annually beginning in fiscal year 2019.

Revenues pledge or reserved shall be remitted in the following manner:

1. The Business Privilege Tax shall only pay for the interest payments of the lease and the lease-back pending the maturity of the Business Privilege Tax Bond Series 2013C in Fiscal Year 2019, and said interest payments shall cease.

- 2. Revenues received pursuant to § 22425 (q)(5) of Article 4, Chapter 22 Division 2, Title 5, Guam Code Annotated, upon availability; and
- 3. Upon the maturity of the Business Privilege Tax Bond Series 2013C.

Business Privilege Tax Revenues are assessed and collected monthly against persons on account of their businesses operating within Guam measured by the application of the business privilege tax rate against values, gross proceeds of sales or gross income, as applicable, pursuant to Article 2 of Chapter 26 of Title 11 of the Guam Code Annotated. The Legislature is responsible for setting business privilege tax rates. Business privilege taxes consist of five categories: the general business privilege tax (formerly known as the gross receipts tax), the alcoholic beverage tax, the liquid fuel tax, the tobacco tax and automotive surcharges. Other than the general business privilege tax, which has remained at the current level of 4.0% for more than ten years (with the exception of a period of time between April 1, 2003 and March 31, 2004 when the rate was increased from 4.0% to 6.0% under P.L. 27-05 and then reduced again to 4.0% under P.L. 27-76), the other categories are taxed at varying rates on the basis of volume of fuel, or the amount of beverage or tobacco purchased. The Business Privilege Tax Revenues derived from the levy of three percentage points, out of the total percentage points of the Government's general business privilege tax levied from time to time (currently four percentage points) are pledged to secure the payment of the Government of Guam Business Privilege Tax Bonds, Series A, Series B and Series C. From the one percentage point that is not pledged to secure the repayment of the Bonds, 0.16 percentage points is currently required by statute to be deposited in the Guam Memorial Hospital Authority Pharmaceuticals Fund for appropriation by the Legislature to fund pharmaceutical, drug, medical supplies, medical equipment, blood and blood products, and medicine requirements for Guam Memorial Hospital. No portion of the alcoholic beverage tax, the liquid fuel tax, the tobacco tax and automotive surcharges is pledged to secure payment of the 2013C Bonds.

The Government levies the business privilege tax on a broad base of services and goods, including the sale of tangible personal property and the provision of professional services; however, certain entities or sales, including most wholesale businesses, governmental entities, charitable and community organizations, hospitals, most agricultural producers and fisheries, home industries, licensed child care facilities and certain fuel sales, are exempt from the business privilege tax. In addition, under P.L. 24-12, as amended by P.L. 29-02, certain small businesses with gross annual income under \$50,000 are granted exemption from the business privilege tax on the first \$40,000 of annual revenues. Banks, banking institutions, small lenders, building and loan associations, and other lending institutions are taxed annually at the business privilege tax rate on their net income. There are no limitations on business privilege tax rates,

#### Business Privilege Tax Collections

The Government has levied, collected and enforced the collection of business privilege taxes since 1953. Business privilege taxes are payable on a monthly basis, no later than the 20th day of the month following the taxable activity, except that banks and other lending institutions are required to pay business privilege taxes annually, no later than 90 days following the close of the taxpayer's tax year.

#### Enforcement of Collection of Business Privilege Taxes

Any business privilege taxes levied, due and uncollected become a debt due the Government and a lien upon any property of the debtor for the amount of the unpaid balance plus all penalties and

interest. The office of the Commissioner of Revenue and Taxation (the "Tax Commissioner") may also collect delinquent business privilege taxes through suit, issuance of a warrant for collection, or injunction to restrain the delinquent taxpayer from continuing to carry on its business until the delinquent tax liability is paid. The statute of limitations for collections of unpaid business privilege taxes is seven years after the return is filed. There is no statute of limitation for revenue not reported.

Unless it is shown that the taxpayer's failure to timely remit business privilege taxes is due to reasonable cause and not due to willful neglect, there will be imposed a specific penalty to be added to the tax in the amount of 5% of the amount of such tax if the failure is not more than 30 days, with an additional 5% for each additional 30 days, or fraction thereof, not to exceed 25% in the aggregate. Penalties are also imposed on fraudulent and false returns. Interest at the prime rate (as determined and adjusted from time to time by the Tax Commissioner) is collected on past due business privilege taxes and on any penalties related thereto. In the case of corporations, officers, directors and employees are personally liable for unpaid gross receipts taxes in the same manner such persons may be liable for failure to withhold taxes on wages under applicable provisions of the Internal Revenue Code.

Criminal penalties are also available for failure to pay business privilege taxes, submission of false or fraudulent returns and aiding another's tax evasion.

In addition, after exhausting administrative remedies, a taxpayer may file an action in the Superior Court of Guam, irrespective of the amount involved, for the refund of any business privilege tax alleged to have been erroneously or illegally assessed or collected, or of any penalty claimed to have been illegally or erroneously collected, or of any sum collected alleged to have been excessive.

TABLE 1
Government of Guam Business Privilege Tax Collections
Fiscal Years 1991 – 2013

Fiscal Year	<b>Business Privilege Tax Collections</b>
1991	\$144,453,058
1992	155,936,253
1993	147,772,341
1994	151,150,400
1995	172,475,799
1996	180,377,835
1997	184,500,199
1998	172,063,088
1999	148,963,676
2000	146,488,599
2001	137,394,940
2002 <sup>(1)</sup>	119,345,725
2003 <sup>(2)</sup>	156,095,935
2004 <sup>(2)</sup>	170,610,706
2005	149,081,382
	155,386,098

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

2006	
2007	172,745,349
2008	185,795,875
2009	182,583,996
2010	188,621,364
2011	200,047,641
2012	221,443,640
2013	221,672,983

(1) Decrease is a result, in part, of the economic effects of super typhoon Pongsona, typhoon Chataan and the "9/11" attacks on the U.S. mainland, all of which occurred or had material effects in Fiscal Year 2002.

(2) Reflects temporary increase in the business privilege tax rate from 4% to 6% from April 2003 through April 2004.

Government of Guam Audited Financial Statements for Fiscal Years 1991-

2013

#### 4.6 SPECIAL PROVISIONS

Indebtedness Limitation

Section 11 of the Organic Act of Guam provides that no public indebtedness of the Government shall be authorized or allowed in excess of ten percent of the aggregate tax valuation of the property in Guam.

On March 27, 2007, the Supreme Court of the United States issued its decision in the case of Limtiaco v. Camacho, which, among other things, interpreted "aggregate tax valuation" to mean the assessed valuation (i.e., the amount upon which the property tax rate is levied, as opposed to appraised value). At the time, the assessed valuation of property in Guam was defined by Guam statutes to mean 35% of the property's appraised value, as ascertained by the Guam assessor. Guam's property taxation statutes have since been amended so that assessed value is now defined as 90% of appraised value, with related amendments to property tax rates so that revenue impacts were neutral.

The Certificates will not be treated as public indebtedness of the Government for purposes of Section 11 of the Organic Act of Guam.

#### 4.7 CONTENT OF FINANCIAL PROPOSAL

Proposal should be prepared simply and economically, providing straightforward, concise description of the proposer's ability to fulfill requirements of the proposal. In order to ensure a uniform review process and to obtain the maximum degree of comparability, it is required that proposals be organized in the following manner:

- 4.7.1. Please provide a brief overview of your firm, including a description of capital, credit ratings and experience.
- 4.7.2. Please include your firm's proposed structure in detail, as well provisions for Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

extension of maturity or roll-over, or any other hypothetical scenario.

- 4.7.3. Provide a preliminary term sheet or similar format outlining the terms and conditions of the proposed lease agreement including interest rates.
- 4.7.4. Discuss the estimated time line for the issuance of this lease and describe your firm's ability to conduct this transaction in a timely matter. Please feel free to outline certain variables such as credit committees, and their effects, if any, on the terms and conditions of the financing.
- 4.7.5. Please include your firm's three (3) years latest audited financials or as provided in Sections 4.9.2.6 and 5.3.2
- 4.7.6. Please describe any other terms and conditions required by your firm, in regards to this financing.
- 4.7.7. Organizational Chart. Indicate the principal personnel that would be available to DPW, DOE, GEDA and the government, as well as describe their experience and responsibilities for this financing.
- 4.7.8. References. Include a reference list of at least FIVE (5) clients to whom Offeror's Team has provided services similar to this RFP. This list will include the following information:

Name of Client

Date of Services

Address

Contact Person

Telephone Number(s) and Email Address

- 4.7.9. General Statement of Experience. Include a written statement of experience in financing, providing and managing similar services. If the proposer does not possess an experience similar to the services required, proposer shall provide any pertinent information or experience Proposer feels may qualify for consideration of award.
- 4.7.10. Operational Plan. Include a narrative description and/or organization chart outlining the method of operation, operational structure, and services to be provided by the proposer. This description should fully and completely demonstrate the intended methods for servicing the requirements. This plan should specifically identify obligations of the Government of Guam (e.g financing, rehabilitation, construction, expansion and renovation) upon which the proposed plan is contingent. Proposers are encouraged to provide any other pertinent information, which will assist the Government of Guam in evaluating the proposed method of operation.

### 4.8 TERMS OF PAYMENTS

- 4.8.1. If the Government fails to perform as lessee under the lease or decides not to appropriate lease payments, consequently, if the lessee takes possession of the building, investors or the trustee will typically be permitted to operate the financed facility for a period of time specified in the ground lease, however, once the term of the ground lease expires, the Government Body is entitled to repossession of the site together with all improvements on the site free and clear of any interest of the investors or trustee on their behalf.
- 4.8.2. Payments shall be made in accordance with, subject to applicable provisions of § 22425(q)(4) and (6) Article 4, Chapter 22 Division 2, Title 5, Guam Code Annotated or 5 G.C.A. 58E107, where applicable The Developer or Finance Company shall submit one (1) annual invoice in original form, for lease payments due.
- 4.8.3. Non-Appropriation Clause: In event that sufficient funds (a) are not appropriated by the Government Body prior to the beginning of any Renewal Term for the payment of the Base Rentals on the Base Rental Payment Dates and reasonably estimated Additional Rental Payment Dates and reasonably estimated Additional Rentals payable during such Renewal Term, or (b) are otherwise not legally available for such purpose, then an Event of Non-appropriation shall be deemed to have occurred.
- 4.8.4. If an Event of Non-appropriation, the Government Body shall not be obligated to make payment of the Base Rentals or Additional Rental's provided for herein beyond the last day of the Renewal Term during which such Event of non-appropriation occurs, except for the Government Body's obligation to pay Rental which are payable prior to the termination of the Lease.
- 4.8.5. If the Government fails to perform as lessee under the lease or decides not to appropriate lease payments. Consequently, if the lessee takes possession of the building investors or the trustee will typically be permitted to operate the financed facility for a period of time specified in the ground lease. However, once the term of the ground lease expires, the Government Body is entitled to repossession of the site together with all improvements on the site free and clear of any interest of the investors or a trustee on their behalf.
- 4.8.6. If the Government of Guam loses the use of the leased facility under certain circumstances, lease payments will be made only during the times DPW and DOE has full use of the leased facility. This will result in partial lease payments for the entire contract period.
- 4.8.7. Offeror's Affirmation and Declaration. Complete and have notarized the Offeror's Affirmation and Declaration form provided in the RFP Package. An authorized representative of the firm must sign this form as defined in 14.1h below.

In addition, the affidavit shall contain the name and address of any person who has received or is entitled to receive a commission, gratuity or other compensation for procuring or assisting in obtaining business related to the bid for the bidder and shall contain the amounts of any such commission, gratuity or compensation. The affidavit shall be open and available to the public for inspection and copying. Failure to submit the affidavit concerning commissions paid shall be deemed non responsive and cause for rejection upon receipt of the proposal.

4.8.8. Proposal Signature forms. An authorized representative of the firm as defined below must sign this form:

When an offeror is a corporation, the president or vice president signing shall set out the corporate name in the full beneath which he/she shall sign his/her name and give the title of his/her office. The proposal shall also bear the seal of the corporation attested by its corporate secretary.

When the offeror is a partnership, the proposal shall be signed in the name of the partnership by a general partner or other person duly authorized to bind the partnership. The capacity and authority of the person signing shall also be given.

When the offeror is an individual or sole proprietorship, the proposal shall be sign by the individual owner stating name and style under which the offeror is doing business.

If the offeror is doing business under a fictitious name, the offeror must submit a copy of Certificate of Registration.

When the offeror is a joint venture, each joint venture must sign the proposal as herein above indicated.

- 4.8.9. Each proposal submitted will be graded and evaluated based on the combined total weighted score of Section 5.2 of this RFP. Financing Capability has a maximum score of 25%. Each proposal submitted will be evaluated using Evaluation Form provided in this RFP.
- 4.8.10. Only after the qualifying of the proposals will discussions begin.
- 4.8.11. The basis for the negotiations will be the leaseback program proposed by the highest rated proposer based on the evaluation.

# 4.9 EVALUATION OF FINANCING PROPOSAL

- 4.9.1. The Selection committee will review and evaluate all proposals submitted in response to this RFP. The committee shall conduct a preliminary evaluation of all proposals on the basis of the information provided and other evaluation criteria set forth in this RFP. All proposals submitted will be evaluated by the evaluation committee and will be ranked by the criteria provided in this RFP, including the following:
  - 4.9.1.1. Term sheet to include all interest, fees and expenses.

    Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

    Project No.: 730-5-1056-L-YIG

- 4.9.1.2. Responsiveness of Proposal
- 4.9.1.3. Ability of the Lessor to lease to Lessee the facilities described in Section 4: Scope of Work
- 4.9.1.4. Ability of Lessor to structure municipal leases from \$100,000,000 to over \$300,000,000.
- 4.9.1.5. Ability of Lessor to offer suggestions on various arrangements for service and maintenance contracts in support of the upkeep and service of the leased facility. Please provide detail on suggested payment arrangements.
- 4.9.1.6. Ability of Lessor to allow the purchase of the leased school facility by Lessee at any time during the lease period. Please provide detail on pre-payment arrangement scenario.
- 4.9.1.7. Ability of Lessor to allow Lessee to cancel the lease obligation, without penalty, at the end of the current fiscal year in which appropriations were last budgeted, or otherwise made legally available, in the event budgetary funds become unavailable for appropriation in future years (Event of non-appropriation).
- 4.9.1.8. Ability of Lessor to provide 100% financing for the facility, including rehabilitation, construction, expansion, renovation, maintenance and other related costs to complete the projects as described in Section 4: Scope of Work. Please provide examples of experience involved in similar financing.
- 4.9.1.9. Ability of Lessor to develop a payment schedule that can be structured on an annual basis. Please provide example of payment scenario.
- 4.9.1.10. Company's Experience: Company history, organization and experience in Rehabilitation, construction, expansion, renovation and maintenance as per required in the RFP.
- 4.9.1.11. Resources and Availability: Architectural-Engineering designers, consultant, construction managers, contractors, sub-contractors, quantity of personnel, equipment that will assigned to projects as per required in the RFP.
- 4.9.1.12. Responses of the client reference.
- 4.9.1.13. Such other information that may be required or useful in fateful performance of the contract.
- **4.9.2.** The Government of Guam reserves the following rights to:
  - 4.9.2.1. Conduct pre-award discussion and/or pre-award/contract negotiations with any or all responsive and responsible proposers who submit proposal

determined to be reasonably acceptable of being selected for award; conduct personal interviews or require presentations of any or all proposers prior to selection; and make investigations of the qualifications of the proposers as it deems appropriate, including, but not limited to, a background investigation.

- 4.9.2.2. Request that proposer(s) modify their proposal to more fully meet the needs of the Government of Guam or to furnish additional information as the Government of Guam may reasonably require.
- 4.9.2.3. Accord fair and equal treatment with respect to any opportunity for discussions and revisions of proposals. Such revisions may be permitted after submission of proposals and prior to award.
- 4.9.2.4. Negotiate any modifications to a proposal that it deems acceptable, waive minor irregularities in the procedures, and reject any and all proposals.
- 4.9.2.5 Process the selection of the successful Proposers without further discussion.
- 4.9.2.6. **Financial Statements**. The Government of Guam requests the Offerors to submit their annual financial statements for the last three (3) fiscal years, including company financial statement summaries, cash flow, certified by a Certified Public Accountant. If the organization has been in business for a period of less than three (3) years Offerors are required to submit a detailed business plan, a list of its key team players (with their experience and education) and any other pertinent information that would allow the Government of Guam to evaluate the sufficiency of financial resources and the ability of the business to successfully perform the services enumerated in the contract.

# 4.9.3 CONTRACT REQUIREMENT

- 4.9.3.1. Basis of Award. A contract will be awarded to the most responsible and responsive offeror whose proposal delivers the best value for Guam in meeting the objectives of the Department of Education."
- 4.9.3.2. Contract Term. The period of the contract shall be not later than for a period of thirty (30) years from the schedule date of completion.

# SECTION 5: EVALUATION CRITERIA

# 5.0 **EVALUATION**

After receipt of all proposals, the Selection committee will be convened to review and evaluate the proposals according to the following criteria based on a maximum possible value of 100 points. Offerors are required to address each evaluation criterion listed herein in their proposals.

### 5.1 CRITERIA

The Committee will first review each proposal for compliance with the minimum qualifications and mandatory requirements of the RFP. Failure to comply with any requirements may disqualify a proposal. Proposals will be evaluated and rated based on the criteria stated in the RFP, including but not limited to the following:

# 5.1.1. COMPETENCY OF OFFERORS

The Government may require offerors to present satisfactory evidence that he has sufficient experience and he is fully prepared with necessary capital, material, machinery and skilled workmen and supervision staff to carry out the contract satisfactorily.

Accordingly, the Offeror and/or Offeror's Team must submit for review the following statements;

- a) Experience on similar work.
- b) Past performance of firm in accomplishing government projects in agreed time.
- c) Availability of plant, machinery and other equipment necessary for work.
- d) Quality of work presently performed for Government of Guam or other agencies.
- e) Diligence in carrying out responsibility.
- f) Record of good owner-contractor relationship.
- g) Previous record of bids or proposals qualification.
- h) Quality of supervisory personnel and areas of their performance.
- i) Record of past performance of government contracts including record of default and nonpayment of obligations.
- j) Possession of Government of Guam appropriate contractor's license.
- k). Financing capabilities.
- 1) Financial resources.

Financial resources report shall be dated not more than six (6) months prior to bid opening, must be prepared by a certified accountant and shall contain at least the following information:

- 1) Total Assets
- 2) Total Liabilities
- 3) Total Current Assets

5) Bonding Capability

Any Offeror who at the time of bidding was determined liable to pay liquidated damages for delay in completion of the last two projects contracted from the Government of Guam shall be subject to rejection unless the bidder completed the project or was not determined to be in default of their contract.

- 5.1.2. Responsiveness of the Proposal to perform the scope of work including the submittal of cost of the development of Comprehensive Capital Improvement Plan, the Capital Maintenance and Insurance for Simon Sanchez High School and cost estimate for design, construction/renovation and demolition in whole or in part of Simon Sanchez High School.
- **5.1.3**. Such other information that may be required or useful in fateful performance of the contract.

# 5.1.4. Project Approach:

Offeror shall provide a description of the financing and construction plan and the methods to be used that will convincingly demonstrate to DPW, GDOE, and GEDA what the Offeror intends to do, the timeframes necessary to accomplish the work and how the work will be accomplished to include addressing and resolving potential difficulties of critical tasks and plans.

Offeror shall include Conceptual Plans showing the civil and architectural layout for Simon Sanchez High School based on SSHS considerations and as further defined in section 4.0.3.1 and also include a work plan to sequence renovation and construction work of a live and occupied facility that will not result in campus closure double session and utility service disruption. The plan must insure 180 instructional days are met as mandated in P.L. 28-45 as further defined in section 4.0.3.2.

**5.1.5.** Ability, capacity, and skill of the Offeror to innovatively design, construct and or renovate all thirty five (35) school facilities using certified recognized sustainable design measurement systems so as to be energy efficient, achieve cost effective operation and environmental compatibility.

# 5.2 Construction Experience Criteria

- **5.2.1** Ability, capacity, and skill of the Offeror to perform the scope of work as described in Section 4-A.
- **5.2.2** Experience of the Offeror or Offeror's Construction Team in accomplishing similar construction for the past 10 years on Guam, and or in a remote, resource constraint environment with logistical challenges. The Offeror or Offeror's Construction Team must have at least 5 years of actual and direct experience in

construction of minimum \$5,000,000 of schools or other similar facilities/structures.

# 5.3 Financing Capability Criteria

- **5.3.1** Ability, capacity, and skill of the Offeror to perform financing as described in Section 4-B and the evaluation factor in Section 9.
- **5.3.2.** Financial Statements. The Government of Guam request the Offerors to submit their annual financial statements for the last three (3) fiscal years, including company financial statement summaries, cash flow, certified by a Certified Public Accountant. If the organization has been in business for a period of less than three (3) years, Offeror are required to submit a detailed business plan, a list of its key team players (with their experience and education), and any other pertinent information that would allow the Government of Guam to evaluate the sufficiency of financial resources and the ability of the business to successfully perform the services enumerated in the contract.

# 5.4 Comprehensive Capital Improvement Plan (CCIP) Criteria

Comprehensive Capital Improvement Plan: The Offeror shall submit project approach and cost for the development of a Comprehensive Capital Improvement Plan for the Guam Department of Education (GDOE). The plan must take into consideration the physical condition of each school, along with attendance are population, enrollment patterns, and bussing logistics. It shall also include how each school meets the instructional needs of GDOE and prioritizes repairs of existing schools and renovation and construction of new school facilities. The CCIP shall utilize the assessment report generated by U.S. Army Corps of Engineer in August 2013 and the latest Federal and Local Building Code Standards.

In the evaluation, rating and selection of proposals, the evaluation factors and their relative importance are as follows:

All proposals submitted will be evaluated by the Evaluation Committee and will be rated using the criteria and form provided in this RFP including the following:

EVALUATION CRITERIA	MAX SCORE	SCORE
Financing Capability.  Offeror's capability to provide 100% financing and the ability to execute the best financing plan that could give the Government the least interest rate during the course of the 30 year agreement as described within this RFP.	30	
Project Expertise and Experience. The education and experience of key personnel to be assigned to design, construct and manage this project in accordance with this RFP.  Experience of the Offeror or Offeror's Construction Team in accomplishing similar construction for the past 10 years on Guam, and or in a remote, resource constrained environment with logistical challenges. The Offeror or Offeror's Construction Team must have at least 5 years of actual and direct experience in construction of minimum \$5,000,000 of schools or other similar facilities/structures.	30	
Project Approach and Innovation: Specific methods to complete the requirements including the sequence and timing of work. Understanding of critical tasks and plans for addressing and resolving potential difficulties and specific methods of innovation of the Offeror to innovatively design, construct, and or renovate as described in Section 5, Sub-Section 5.1.4 and Section 4-A, Sub-Section 4.0.3.1 and 4.0.3.2.	20	
Comprehensive Capital Improvement Plan: The Offeror's submitted project approach for the development of a Comprehensive Capital Improvement Plan for the Guam Department of Education (GDOE) as described in Section 5.	20

# SECTION 6: PROPOSAL STRUCTURE

Offerors must organize their proposals into the sections delineated below, with tabs separating each section. The proposal should be prepared simply and economically, providing straightforward, concise description of the Offeror's ability to fulfill requirements of the proposal. In order to insure a uniform review process and to obtain the maximum degree of comparability, it is required that proposals be organized in the following manner:

The first page of the proposal must show the coversheet that is required to be returned with their offer.

#### 1. Introduction.

- a. Cover letter (must be on Offeror's letterhead) with the name, address telephone, and facsimile numbers of the Offeror (and electronic address if available). The Offeror shall use the exact legal name, as registered or to be registered with the Department of Revenue and Taxation.
  - i. Point of Contact. The individual executing the letter shall be identified by name and position and shall be authorized to bind the Offeror contractually. Name, title, and signature of person authorized to sign the proposal. Proposals signed by an agent shall be accompanied by evidence of that agent's authority, unless that evidence has been previously furnished to the issuing office.
  - ii. Contact Information. Include the Offeror's name, address, telephone and facsimile numbers, and email address. Also include the Offeror's principal place of business. Names, titles, and telephone and facsimile numbers (and electronic addresses if available) of persons authorized to negotiate on the Offeror's behalf with the Government in connection with this RFP; and
- b. A statement specifying the extent of agreement with all terms, conditions, and provisions included in the RPF including amendments. A point-by-point response to all numbered sections, subsections, and attachments to the RFP is required. If no explanation or clarification is required in the Offeror's response to a specific subsection, the Offeror shall so indicate in the point-by-point response or utilize a blanket response for the entire section with the following statement:

"(Offeror's Name)" understands and will comply.

# 2. Company Overview.

- a. Type of firm. State whether Offeror is a corporation, partnership, sole proprietorship, joint venture, etc. Provide the organizational documents for Offeror and a certificate of good standing from the state or territory of formation. Provide a brief overview of your firm, including key team members, and a description of capital, bondability by US Treasury listed company and experience. Provide a list of your key team members with a brief background of their experience and education. Include any pertinent or applicable awards, commendations and publications by team members.
- b. <u>Year firm established</u>. Indicate the number of years the Offeror has been in business under its present business name and the number of full-time personnel employed by Offeror in the last twelve (12) months.
- c. Other firm names. Indicate all other names by which Offeror has been known and the length of time known by each name.
- d. <u>Participating branch offices</u>. If applicable, state the branch offices that participated in the development of the proposal, will participate in the evaluation phase, and will participate in the conduct of any services provided (office name and address).

# 3. Experience of Offeror.

- a. <u>Primary point of contact</u>. Identify the overall project coordinator or manager who will serve as the single point of contact and liaison between the DPW and the Offeror for all work under the contract. The manager candidate may be subject to the approval of DPW.
  - i. Provide his/her resume and describe his/her qualifications
  - ii. Explain why this person has been selected as the overall project coordinator/manager.
- b. <u>Key personnel</u>. Provide the name(s), education, qualifications, experience, and the role of each key personnel assigned to perform the services under this RFP. Present an organizational chart identifying the relationships and duties of both the corporate staff and all proposed management and staff to be assigned to assist with the services under this RFP. At a minimum, if the Offeror is an individual, the proposal should include a complete resume of the individual. If the Offeror is a firm, the proposal should include a resume of all the individuals who will be working on any aspect of the project.
- c. <u>Client list and work</u>. Include a listing of current and former clients and a description of the type of work performed or is being performed.

- d. <u>References</u>. DPW welcomes references of entities to which Offeror has provided services.
- 4. Financing, construction, maintenance and management plans.
  - a. <u>Capabilities.</u> Demonstrate and show that as a business entity, Offeror has sufficient financing, construction, maintenance and management competency and that its personnel have appropriate experience and ability to finance, operate, and maintain the nature and scale of the project proposed in this RFP.
  - b. <u>Construction Experience.</u> Provide a write up of not more than 15 pages in 8.5 inch x 11inch with font size not smaller than 10 points, to demonstrate Offeror's experience in new construction and/or renovation experience of 5 school projects or similar facilities/structures with a minimum contract amount of \$5 Million for the past 5 years on Guam and/or in a remote, resource constrained environment with logistical challenges.
  - c. Work plan. Offeror should provide a description of the financing and construction plan and the methods to be used that will convincingly demonstrate to DPW what the Offeror intends to do, the timeframes necessary to accomplish the work, and how the work will be accomplished.
  - d. <u>Finance Plan.</u> Offerors shall work with the Guam Economic Development Authority to provide approximately \$100,000,000.00 financing for design, rehabilitation, construction, renovation of up to 35 schools and provide collateral equipment. Alternative financing shall be considered if such financing will better serve the government's desire to obtain the least expensive costs associated with this RFP.
  - e. <u>The most current RS Means Facilities Construction Cost Data.</u> Provide the coefficient up to four (4) decimal points (example 0.0150 instead of 15%) for the maintenance and upkeep for 30 years or for the life of the debt for up to 35 schools.
  - f. <u>Insurance.</u> Demonstrate the Offerors ability to provide the amount of fire, earthquake and vandalism insurance for the insured value of up to \$100,000,000.00 on any lease-leaseback arrangements for up to 30 years.
- 5. Conflicts of Interest. The proposal shall also indicate any current or historical engagement or relationships with any public or private party that could potentially create a conflict of interest with GEDA, the Government of Guam, DPW, DoE or any of the government's agencies or instrumentalities.
- 6. Qualification to do Business. The Offeror must be licensed to do business in Guam and must possess such prior to the submission of proposal.

- 7. Affirmative Action. Include a statement that the Offeror has established and implemented an Affirmative Action Plan for equal employment opportunities.
- 8. Required documentation:
  - a. Affidavit Disclosing Ownership and Commissions (Attachment A-1)
  - b. Affidavit Non-Collusion (Attachment A-2)
  - c. Affidavit No Gratuities or Kickbacks (Attachment A-3)
  - d. Affidavit Contingent Fees (Attachment A-4)
  - e. Affidavit Ethical Standards (Attachment A-5)
  - f. Local Procurement Preference Application (Attachment A-6)
  - g. Declaration Re Compliance With U.S. DOL Wage Determination (Attachment A-8A)

# **EXHIBIT A**

#### SIMON SANCHEZ HIGH SCHOOL CONSIDERATIONS

#### New High School Considerations:

- 1. 2,300 student capacity
- 2. 122 Estimated Number of Classrooms
- 3. Considerations for a GREEN School solar panels, natural lighting, recycling area, energy efficient equipment etc...
- 4. Facility to meet all ADA Compliant regulations and applicable local and federal codes and regulations.
- 5. Rotunda/Center court yard/outdoor space common area.

## Offices required

- Administrative office (5 administrators) For assistant
- Student Support (Discipline) w/ unisex restroom and holding area
- 2 Conference rooms 25pax
- 1 Business Office with security
- 1 Nurse's Office (with private triage room, separate lobby area to receive students that can't see the sick beds, file room, room to accommodate 5 sick beds
- 9 Counselor Offices (w/ small counseling conference room for group meditations, segregated waiting area for visitors, 2 clerical desks)
- ESL Coordinator's Office with small testing room
- 5 small SPED CRT Office (4 offices for CRTs and 1 office for Speech pullout) an additional medium size (12pax) conference area for IEP meetings
- Male and Female PE Offices (accommodate 6 teachers each office),
- ROTC large enough for 3 instructors to include a conference room for battalion commander meetings (Secured Armory for weapons/sensitive items),
- Librarian's Office
- 1 School Resource Officers Office (2 pax)
- 1 parent holding/waiting area
- 1 Faculty Workroom, Lounge with restroom

SUBJECT	ESTIMATED NUMBER OF CLASSROOMS NEEDED
English Standard Instructional Classroom	22
Math Standard Instructional Classroom	16
Science Specialized Curriculum Classrooms (*Classroom specifications provided) *Combination Lab/Classroom Class size of 24 Students in 1440 Square Feetrefer to Science Department Considerations pages 13 through 16	16
Social Studies Standard Instructional Classroom	16
ESL and SPED (Special Populations-Small Kind) Standard Instructional Classroom	
ESL (capacity 18 students)  • 4 ESL classrooms  • 1 ESL room dedicated for Science to include a lab	5 ESL
<ul> <li>SPED (capacity 12 students)</li> <li>5 SPED classroom</li> <li>1 SPED classroom for Basic Life Skills class (1-Lab setup for life skills and a classroom setting for instruction)</li> </ul>	6 SPED
GCC (Classroom specifications provided)  Specialized Curriculum Classrooms  Pro_Start  Lodging Management Program  Marketing  Carpentry  Electronics  Automotive  Allied Health	7
Standard Instructional Classrooms Fine Arts - 6 PE - 6	34

Health - 5 World Language - 3 FACS - 3 ROTC (2 Classrooms connected to office) next to RR m/f Chamorro 4 + 1 room for Chant = 5 total Business - 4	
ESTIMATED TOTAL NUMBER OF CLASSROOMS NEEDED:	122

#### Standard Instructional Classroom:

- Student capacity not to exceed 32 students per classroom
- Classroom dimensions shall be 30' x 32' (960 sf) to ensure flexibility of usage.
- Classroom storage space must able to be secured and large enough for an audio visual cart, class set books, 2 computer desktops. Storage space shall not impede classroom dimensions.
- Classroom equipment/cabinets/woodwork must be made of school grade quality and shall not contain pressboard type materials.
- Must have adequate electrical outlets on each wall with GFCI outlets as required by code
- Electrical and Data Wiring for overhead multimedia equipment
- Classrooms must be equipped with bulletin boards, whiteboards, storage cabinets.
- All doors must be security type doors with viewing window to view classrooms from the outside; all door locks can be opened with 1 master key
- GCC classes to be located in their own wing (Pro-Start, Lodging Management, Marketing, Allied Health, Electronics, Automotive). GCC CTE classrooms equipped with their respective tools, equipment as required by their programs.
- ESL classes with the general education classes

### **Special Education** (12 student capacity - special population)

- Special Education Basic Life Skills (BLS) 1 classroom with space for Home Life Skills room AND classroom setting - BLS need to be equipped with sink and restroom, and wiring/plumbing/ventilation for laundry equipment such as washer and dryer (BLS Class should also contain wiring for refrigerator, stove, and microwave)
- BLS Class should be equipped with its own shower and restroom
- Adaptive PE Equipment with the PE teacher teaching the course

### ESL (18 student capacity- special populations)

- 4 ESL classrooms
- 1 ESL Science classroom equipped with Lab

## ROTC

- 2 classrooms 30-35 capacity
- 2 Air-conditioned storage room for uniforms, books, ribbons, school supplies

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

- Cadet's administrative office with workstations
- 3 Army Instructors' Offices
- Multi-purpose regulation drill pad / rifle range / full battalion inspection site located adjacent to the Gym locker rooms

# School Guidance Office (for School Guidance Counselors)

- Storage file room for safe keeping (Recommend the storage file room large enough to fit both health and cumulative folders. File room will be both accessible to Nurse and Counselors like a Jack-&-Jill type of entrance)
  - Equipment storage room
  - 9 counselors' offices
  - 1 small room for group mediations 5-10 pax

# School Health Counselor's Office (Nurse's office)

- Storage file room for safe keeping (Recommend the storage file room large enough to fit both health and cumulative folders. File room will be both accessible to Nurse and Counselors like a Jack-&-Jill type of entrance)
- Equipment storage room
- Small private triage room to assess students individually
- Sick bay large enough for 5-6 sick beds
- For confidentiality purposes, waiting area separate and away from the triage beds, intake area
- Restroom equipped with shower room

# Content Department Bookrooms/Storage Room

- Extra Large School Supplies and Equipment Storage Room for administration
  - 2 Chemical/Custodial Cleaning storage room one on each floor
  - English
  - Math
  - Science
  - Social Studies
  - Shared FACS, Business, Health
  - World Language (Chamorro/Japanese/Spanish)
  - Band Equipment Storage Room / Music File Room within the classroom
  - Choir Equipment Storage Room
- GCC Storage Rooms in the classroom with their respective requirements based on program
- PE Equipment Storage Room in the Gym (to be used for Interscholastic equipment, PE equipment, etc. This needs to be larger than the regular book rooms.

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

## Computer Labs

• 5 computer labs equipped with wireless internet, printing capabilities, computer desks/chairs whiteboards, bulletin boards, multimedia projector, document camera, smartboards

#### Cafeteria

- Seating for up to 700 students, Cafeteria benches
- Connected to the PA System
- Service area to accommodate 2 lines
- Kitchen must be designed to accommodate food preparation and storage for Simon Sanchez and 5 satellite school cafeterias. Approximately 4,100 breakfast and lunch meals prepared daily.
  - Warewashing
  - Walk-in refrigerator/freezer
  - Dry storage
  - Laundry room
  - Custodial and chemical storage
  - Trash
  - Carts
  - Manager's office
  - Kitchen staff lockers/restroom

#### Library

- Enclosed library to include a media center, computer lab, silent reading for 250 pax
- Wireless capability
- Security doors to include equipment to prevent theft of library materials
- Multi-purpose storage room for media equipment and software (i.e. videos, dvds, etc.)
- Librarian's Office
- Book shelves for library books
- Book anti-theft system (gate sensor/alarm)
- Ceiling embedded projection screens and PA system speakers for facilitation of addressing large groups
- Group study tables, semi-private study carrels, and adequate comfortable seating for 250 pax. PREFERENCE for Library furniture to have wheels for a mobile, modular-design for flexible mix and match set ups.
- Periodical display rack
- Reference 2003 Massachusetts School Library Media Program Standards for the 21st Century Learning for Design Considerations

#### Auditorium

• Auditorium with a seating capacity of up to 750 for the performing arts, Choir, Band, etc.

- Orchestra/Band pit/area in front of the stage
- Movable risers (at least 3 steps) for 100 pax on stage
- Stage Curtains
- 1 grand piano
- 2 Spot Lights in addition to house lights
- Simple rail system for backgrounds/suspension
- Built in Multimedia projector infrastructure
- Audio System with phantom power, condenser mics, cardioid mics, wearable wireless mics with transmitters
- Situate the performing arts classes adjacent to the Auditorium
- Stage, 2 stage wings
- Display/Ticket area
- Dressing rooms -2
- Control booth for sound and lighting
- Activities Director's office
- Equipment storage room

#### Staff/Faculty Rooms

- Faculty Lounge/work room equipped with a multimedia equipment, computers, furniture, bookshelves, bulletin boards, whiteboards
- Staff lounge
- Faculty restrooms -- must have urinals, multiple stalls

#### Restrooms

- All restroom walls must be anti-graffiti and meet all Public Health ratio requirements.
- Restrooms shall have the adequate number of facilities based on 2,300 student population and the 2009 IBC/IPC (Table 2902.1).
- Restrooms for faculty and staff will also be required.
- Faucet necks must be long enough so that water splash is minimal
- SPED Resource rooms to have unisex ADA restrooms; must be wide enough to fit in a wheelchair, change student's diapers, shower...etc
- JROTC M/F RR shall include showers.
- Outdoor restroom to accommodate outdoor sport facility and events.

#### **Sports Facilities**

- Capacity to be determined by current Building and Fire Code Compliance and standards for a school enrollment of 2300
  - Climate controlled environment
  - Locker/Shower Rooms, 100 student capacity with open floor concept.

Benches for seating in the middle. Flooring should be tiled for easily cleaning from red dirt stains. At least 10 separate shower stalls in both boys' and girls' shower rooms. Locker rooms should have two exits — one leading to the gym, the other leading outside to prevent mud and water being tracked into the gym

- Stadium bleacher seating with a total Gym capacity to seat 2300 students
- Rooms for Table Tennis, Weight Room, Mat storage room, Aerobics

Room, Kinetic Machine, and separate Athletic and PE storage room

- PA System
- Scoreboard System
- Upper Level Press box and AD office
- PE Office should large with view into the GYM. PE Offices should have a full bathroom and shower in addition to locker room view for supervision
  - Concession stand area
  - Game pole standards inserts
  - GYM Multi-Sport Wood Flooring System
  - o Multi-sport gym floor with regulation game lines for Basketball, Volleyball
  - Full size basketball court + 2 width size basketball courts that run through the main court forming additional 6 baskets
    - Curtain divider that can divide the court in half

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

- Public restroom in the Gym to accommodate the athletic or outside events.
- 4 regulation tennis courts with tennis hitting walls equal to the width of the tennis court that also serve as wind breakers. Volleyball inserts along with tennis pole inserts. Tennis courts need to be surrounded by chain link fence and aluminum bleachers outside for spectators under a 20' X 20' covered shelter.
  - Regulation Softball and Baseball field –
  - Each field should have 2 enclosed dugouts with access only from the field.
    - o Chain link front, concrete walls for other 3 walls.
    - Storage room building to store baseball/softball

field maintenance equipment and sport equipment

- o Aluminum bleachers for spectators
- At least a 10foot chain link fencing enclosing the

fields for security and safety of players and spectators

- o Lights for night games
- o Batting cage
- o Electronic scoreboards
- Press box or small dugout for official scorekeeper or other game officials behind the back stop
  - Regulation Track and Field Venue
- Rubberized track with regulation length and markings for various relay exchanges
  - Jumping pit for Long/Triple Jump, Dry Sand Pit
  - o Official marked area for High Jump mat and Bar

Stands

- Throwing pit for Discus, Shot Put, Javelin
- o Adequate drainage, fencing and storage for track

equipment

#### Additional Facilities:

- -Restrooms on each sides of Track
- -Locker rooms for outdoor sports
- -shower with stalls
- -lockers
- -Storage rooms (Storage for track and field and Football equipment)
- -Press Box
- -Lights
- -Bleachers

-Storage space under concrete bleachers for team meeting area, equipment storage, and field maintenance equipment.

- Practice field for Football, Rugby, and soccer 150' X 90'
- · Regulation multi-purpose Game Field for Football, Rugby, and

#### Soccer

- Artificial turf preferred
- o Marked areas with different colors for Football,

Rugby, and Soccer

o Chain link surrounding Game Field to prevent

spectators on the field

• 3500 square feet Weight Room, 3000 square feet table tennis room, 300 square feet wrestling/aerobics room.

#### Fine Arts/Performing Arts Buildings

- Band and choir rooms arena-style, with multi-level built-in risers
- Music rooms' acoustics need to be conducive to sound quality (no echoes, sound bouncing off the walls)
- 2 practice rooms for 10 to 15 pax in choir room
- 2 practice rooms for 5 to 10 pax in band room
- 1 piano in choir room
- 1 digital piano In each choir practice rooms
- Large Dance Studio space for wooden dance floor and separate classroom space with student desks in one section. Dance floor side will be adjacent to the full length wall mirrors with ballet barres around the 3 walls of the dance room section. Locker room or dressing room adjacent to the Dance room.
- Art classroom with cleaning area (sink and drying counter) and storage area and book room for equipment and supplies within the classroom.

# Additional ART Room requirements are as follows:

QTY	DESCRIPTION	SPECIFIC REQUEST
2	INDUSTRIAL SINKS WITH MULTIPLE FAUCETS	POSITION SINKS TOWARDS THE BACK OF THE ROOM. INDUSTRIAL SINKS PREFERRED FOR PROPER DRAINAGE IN ART STUDIO SETTING

	MULITPLE ELECTRICAL OUTLETS	POSITION MULTIPLE POWER OUTLETS AROUND THE ROOM.
1	EXIT DOOR TO OUTSIDE ACCESS OF WATER FAUCET	POSITION DOOR TO THE BACK FO THE ROOM NEXT TO SINKS.
6 PCS	ART STUDIO TABLES. FLAT OR ROUND SHAPE. NON-METAL NON-TEXTURED SURFACE. WOOD TOP.	Non-textured surface needed to ensure proper instruction of media techniques and maintenance.  Each table must seat a minimum of 4 persons and a maximum of 5.
24	STUDENT CHAIRS – NON-FABRIC SEAT	Student chairs must be non-fabric to ensure durability
6	7' STORAGE CABINETS. NON-METAL. DOUBLE DOOR ENTRY. W/ INTERIOR SHELVING. Each shelf measures approximately 48"W × 18"D. OD 84"H x 22" D x 48"W	Storage cabinets must have interior shelving for proper storage of class materials and resources.
2	5-DRAWER FLAT FILE STORAGE W/CAP COVER	Flat file storage for unmounted art work and paper resource storage.
2	6' STORAGE CABINET WITH LOCK. METAL. DOUBLE DOOR ENTRY W/INTERIOR SHELVING.	Storage cabinet must be metal to ensure proper storage of paint and paint solvents, vanishes, and other potentially hazardous materials (as needed).
3	ART VERTICAL ART RACK (WALL MOUNTED)	Position art racks for vertical use. Wall mounted preferred.
2	DRY ERASE MARKER BOARDS. 96"X48"	Position 1 marker board at the front of the classroom, and 1 marker board at the back of the classroom.
1	72" x 48" RECYCLED RUBBER TACK BOARD/CORKBOARD	Position tack board in any available space.
1	3 SHELF UTILITY CART	

2	8' PORTABLE ROOM DIVIDERS	Ensure item is portable for proper storage and availability for off-
		campus student art exhibits.

#### Additional Art Room Considerations:

#### DISPLAY SPACE

- 1. Design lots of easy to use display space with white or neutral tack board. Some types of cabinet doors can also be used for display space. Have some display walls in the room so a class can put up all their work and discuss it. Provide more space in the hall for public view. An art class that does not display and discuss their own work is missing at least half of the potential art learning. Nearby hallway display surfaces provide a convenient way to share work with other students, teachers, and visitors to the school.
- 2. In an art classroom every inch of wall space is educationally valuable. Often electrical and mechanical drawings are not specific enough when locating switches, fire alarms, heat registers, thermostats, and other stuff that interferes with the display space in an art room. Many workers who install these things tend to place them too far into the center of a wall area that would otherwise be available to display artwork or educational material. Plans need to include specific placement specifications and notes so that contractors can be held accountable for ruining display spaces with thoughtless placement of fixtures, switches, and so on.

#### STORAGE

Include lots of storage and drying racks. An art room is a production facility with many different groups of students using the same space. Without storage for supplies and for inprocess projects, the room soon becomes clogged with individual projects and nothing more can happen. Learning is seriously curtailed when lesson plans are limited because there is no place to put he work from session to session. Include some deep and wide drawer type shelving with suspension hardware for large flat paper and display posters. Consider a few lockable spaces for "teacher only" access for materials and equipment that may be too hazardous or valuable to use without supervision or special instruction.

#### LIGHTING

Typical classrooms have lighting that is too general and uniform. Shading and shadows are not visible enough to learn drawing from observation and good sculptural modeling. A visual art learning studio needs direct lighting options and zoned lighting options that can be used when needed. Provide adjustable lighting options or zoned lighting especially for digital media projection where the projection area needs to be dark for proper usage but enough light in the student audience area for notetaking.

### • ELECTRICAL OUTLETS

Art classrooms need power for projectors, computers, and charging units for camera batteries, pencil sharpeners, hot glue guns, paper-making equipment, etc. Require four outlets per box every six feet or less along the perimeter. Island worktables need power as well. If worktables are movable, consider ceiling outlet boxes that allow for drop cords or slim pre-wired power posts mounted on the end of worktables to power strips on the sides under the top of worktables. Avoid interfering with the work surface. **PROVIDE MULTIPLE POWER OUTLETS IN VARIOUS LOCATIONS.** 

#### WINDOWS

Of all the rooms in a school, the art room needs to be located so it has windows with the best possible view for inspiration and for learning. Art rooms need windows for observation drawing and for teaching art concepts about space, depth, form, and perspective. If a view is impossible, insist on windows for light and ventilation. No other school subject or office space is as dependent on windows and good viewscapes as the art room.

#### SINKS

Cleanup time is not art learning time, but it has to be done. Good design saves time. Bad design results in lots of standing around and discipline problems. Ask for sinks that are in a peninsula with plenty of room for people around them and for traffic flow. Never locate sinks in a corner where they create congestion. Space sinks as far apart from each other as possible so more people can get at them. Get at least two sinks with two completely separate drain systems in every room. When one clogs, the other should work. If I am only allowed one sink, I try for a big double sink and two faucets and two drains.

#### Door/Exterior Access to Water faucet.

It is important to have an exterior access to a water source directly outside the classroom. This is to ensure that water access is available in case of the sinks not working or any safety concerns with ventilation. A door that goes directly outdoors from the art room allows opportunities for natural observation exercises. These processes cannot be done indoors. Students love to do their drawing and painting outdoors when the weather permits.

#### FLOORING

Use a sealed surface. Never use carpeting. Paint destroys carpet. The best art rooms have floor drains to facilitate daily floor washing if needed.

#### Rotunda/Courtyard,

 There should be a holding area for students to congregate as a whole before school (after drop-off); during the breaks and lunch time. Preferred holding area example is JFK center court yard.

- Minimize the crevices that students can hide in.
- Hallways and congregation areas should have adequate amount of benches and/or tables to accommodate when students are out during lunch and break
- Centralized Flag Pole
- Benches to be situated away from the walls to prevent students from learning their feet or spitting
- A centrally located stage for lunch performances and assembly of pep rallies, etc.
- Adequate outlets alongside the walls
- Retractable or extended awnings for the courtyard to shield during heavy rains
- Equipped with solar panel lights
- Stage

## Lobby

- Showcase awards, trophies, pictures, etc.
- Greeter's Desk/Help Desk Area

#### Multipurpose rooms

• Should have movable dividers equipped with folding chairs

#### **Traffic Considerations**

- Site improvement: Build a separate traffic (possibly one-way) from the bus stop by Nissho Terrace to Chalan Pasaheru for drop off/pick up of students. This will minimize traffic congestion along Juan Jacinto Road leading to FBLG.
- Easy access drop-off point (outside of fence line, just off traffic access road) to minimize parents stopping and holding up traffic on main road.

#### Acoustics

- Acoustics in the rooms, library, gym, multipurpose rooms need to be regulated to eliminate echoes.
  - Soundproofing offices in the interest of confidentiality.

#### Indoor Quality / HVAC

- Easy access for temperature controls for AC or perhaps the ability to control temperature from a general unit.
- Automatic thermostats

### Lighting

- Energy efficient lighting
- Solar panel lighting around the school and parking lots

## Safety

- Plan for maximizing the flow of foot traffic during passing times as well as during evacuations Identify an adequate area for building evacuations location
  - Design the building to maximize hallways & grounds supervision
  - Control access to grounds/buildings by individuals or POVs.
  - Faculty parking secured access
  - Student parking secured access
  - Hallway (wireless) cameras and security alarm system
- Elevators in the event it will be a 2-story build (able to accommodate large equipment, multiple wheelchairs, etc.)
- Access Doors to buildings should be self-closing and closes properly if double doors.
  - Intercom (audio/visual capabilities)
  - Evacuation area markings (room locators)

# Interior Design / Technology Updates

- All classrooms, hallways, and exterior be wired for a Public Address system with the capability to wire for video feeds into the classrooms
- Secured wireless internet

#### **ProStart Classrooms**

- Classroom must meet Guam Public Health Code and Standards in order for us to obtain a SANITARY PERMIT.
  - Include a STOREROOM for classroom restaurant equipment.

#### **Grounds Considerations**

- Consider rain gardens: gardens located on four cardinal points next to building; storm drainage combined with plants divert and filter water, can be visual and used as a resource for instruction--an outdoor classroom--teaching space
- Red palm trees
- Gardenia
- Trees that provide an excellent canopy overtime--lots of shade for students
- Planting native trees
- Consider collecting water from gutters to irrigate rain garden, plants, trees, school ground...
- Consider classrooms with high windows and more wall space. Rooms with many high windows, allows more natural light coming in
- Consider day lighting; it provides physical and psychological benefits to both students and teachers; it reducing electrical energy consumption in the building
- Consider patterns in the walls or floors that students can decipher
- Consider having classrooms' ceiling be 10 feet high and can be used as a teaching tool.
- Consider a periodic table on the ceiling of a chemistry laboratory/classroom
- Consider footprints and fossils of amphibians and animals in a courtyard sidewalk

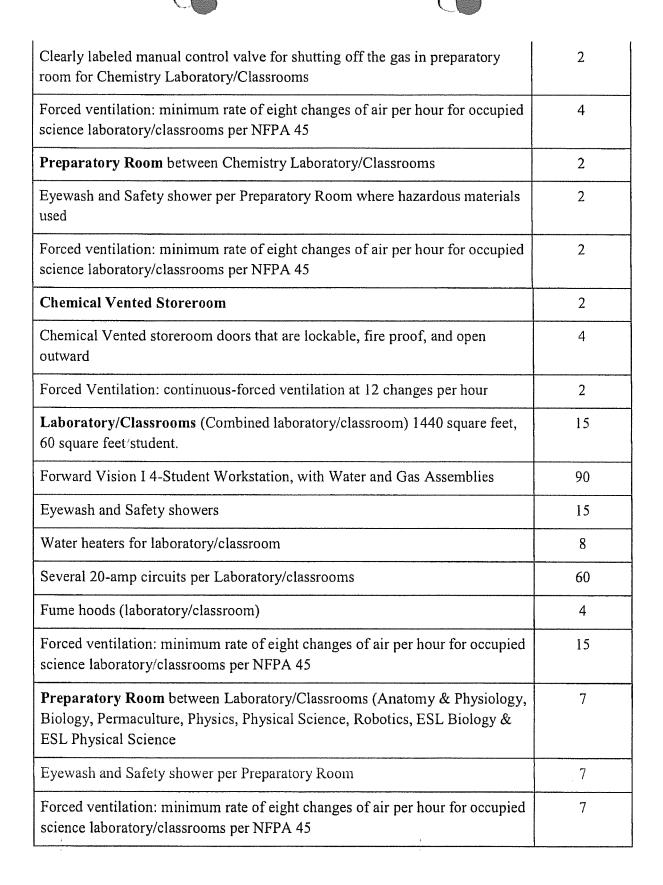

- Consider fractal pattern in resilient floor tile
- Consider painting and sealing the laboratory/classroom concrete floor with a large example of a DNA strand.
- Consider painting and sealing the laboratory/classroom concrete floor with large examples of an animal and plant cells
- Consider having a contest for students to create artwork (educational, esthetics, appreciation...) for the school; student art work can be represented by department.

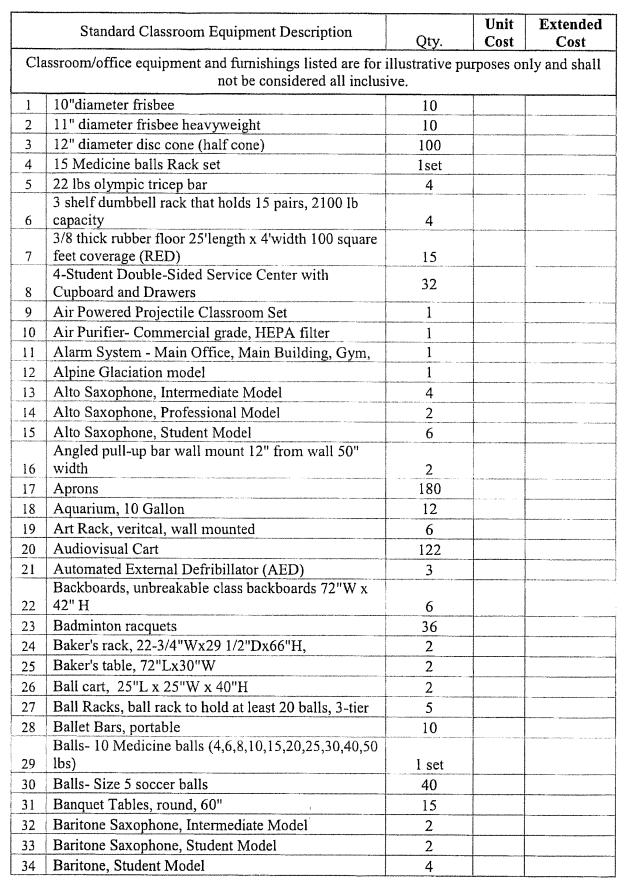

# Science Department Considerations (Department recommendation for classroom sizes for Science will be 24 per class)

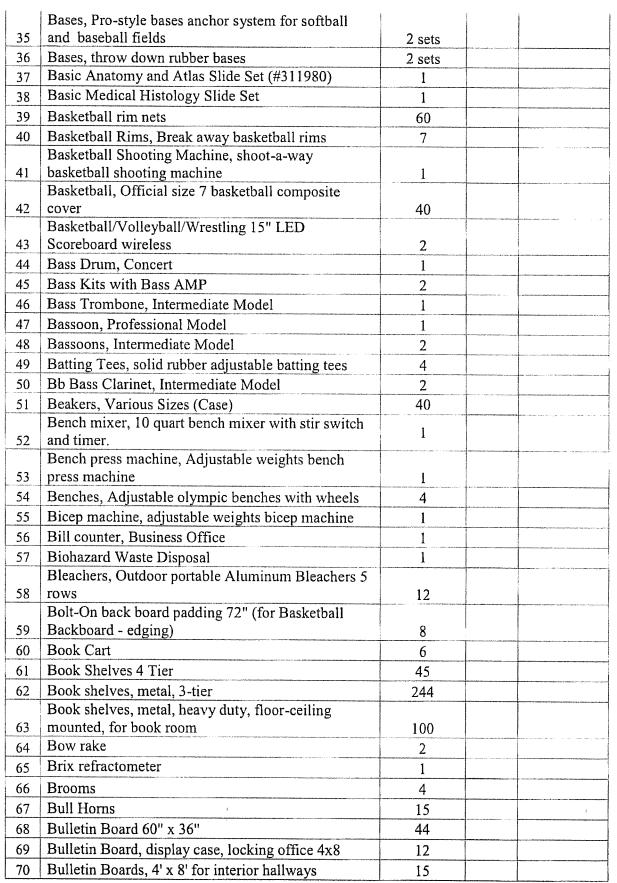

Adequate Space "The single most critically important factor in <u>designing safe science facilities is adequate space</u>. Research shows that overcrowding due to lack of space is the factor that correlates most closely to an increased rate of accidents in a classroom (West et al. 2003). This guideline is distinct from parallel lines of research on links between increased student performance and the teacher/student ratios. A significant increase in science accidents occurs in the science laboratory/classroom when space is inadequate." (NSTA Guide to Planning School Science Facilities Second Edition LaMoine L. Motz, James T. Biehle, and Sandra S. West, pg.29)

NSTA guidelines recommend 60 square feet/occupant for "combined laboratory/classroom".

Science Facilities Specifications	Quantity
** All classrooms, book rooms, storage rooms shall be equipped with fire alarm, sprinkler system, GFI outlets	
** 8 Science Laboratories situated in between classrooms to allow for a shared lab (i.e. Jack & Jill Labs with either removable walls OR a partial glass partition for observation purposes)	8
Chemistry Laboratory/Classroom (Combined laboratory/classroom) 1440 square feet, 60 square feet/student.	4
Forward Vision I 4-Student Workstation, with Water and Gas Assemblies	24
Water heaters	2
Eyewash and Safety shower per Chemistry Laboratory/Classroom	4
Several 20-amp circuits per Chemistry laboratory/classrooms	16
Fume hoods (two per chemistry laboratory/classroom)	8
Gas lines	4

AG Procurement Form 005 (Jul. 12, 2010)	

#### LOCAL PROCUREMENT PREFERENCE

Please place a "x" on the block indicating the item that applies to your business:

Five G.C.A. § 5008, Policy in Favor of Local Procurement, states:

All procurement of supplies and services shall be made from among businesses licensed to do business on Guam and that maintain an office or other facility on Guam, whenever a business that is willing to be contractor is: [] (a) a licensed bonafide manufacturing business that adds at least twenty-five percent of the value of an item, not to include administrative overhead, using workers who are U.S. Citizens or lawfully admitted permanent residents or nationals of the United States, or persons who are lawfully admitted to the United States to work, based on their former citizenship in the Trust Territory for the Pacific Islands, or [ ] (b) a business that regularly carries an inventory for regular immediate sale of at least fifty percent (50%) of the items of supplies to be procured, or [] (c) a business that has a bona fide retail or wholesale business location that regularly carries an inventory on Guam of a value of at least one half of the value of the bid or One Hundred Fifty Thousand Dollars (US\$150,000) whichever is less, of supplies and items of a similar nature to those being sought, or  $[\ ]$ (d) a service business actually in business, doing a substantial portion of its business on Guam, and hiring at least 95% U.S. Citizens, lawfully admitted permanent residents or nationals of the United States, or persons who are lawfully admitted to the United Stales to work, based on their citizenship in any of the nations previously comprising the Trust Territory of the Pacific Islands. \*Bidders indicating qualification under (d) may be considered QUALIFIED for the Local Procurement Preference only if the Government's requirement is for service. "Service" is defined in 5 G.C.A. § 5030. \_\_\_\_\_, representative for \_\_\_ have read the requirements of the law cited above and do hereby qualify and elect to be given the Local Procurement Preference for RFP No. \_\_\_\_\_. I understand that GEDA will review this application and provide me with a determination whether or not the 15% preference will be applied to this bid. I agree to provide such information or evidence as may be requested by GEDA to substantiate the offeror's qualification for the local procurement preference. I, \_\_\_\_\_\_, representative for \_\_\_\_\_\_, have read the requirements of the law cited above, and do not wish to apply for the Local Procurement Preference for RFP No. \_\_\_\_\_. Date

Lease Financing for Design, Renovation Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

Project No.: 730-5-1056-L-YIG

Note: Offerors that do not complete this form will not be considered for the local procurement preference.

Non-completion of this form is not a basis for rejection of the Bid.

12/30/2016	12/30/2016	,		

Note: Executive Order (EO) 13658 establishes an hourly minimum wage of \$10.20 for calendar year 2017 applies to all contracts subject to the Service Contract Act for which the solicitation is issued on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least \$10.20 (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2017. The EO minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

## ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: \$4.02 per hour or \$160.80 per week or \$696.79 per month

VACATION: 2 weeks paid vacation after I year of service with a contractor or successor; and 4 weeks after 3 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year, New Year's Day, Martin Luther King Jr's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4174).

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer

professionals, (29 C.F.R. 541. 400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

- (1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;
- (2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;
- (3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or
- (4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).
- 2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordinance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordance, explosive, and incendiary

ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordance, explosives, and incendiary material differential pay.

#### \*\* UNIFORM ALLOWANCE \*\*

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at <a href="http://www.dol">http://www.dol</a>. gov/esa/whd/ or through the Wage Determinations On-Line (WDOL) Web site at <a href="http://wdol.gov/">http://wdol.gov/</a>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

#### Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6

(C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed. The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.

## **DECLARATION re COMPLIANCE WITH U.S. DOL WAGE DETERMINATION**

Procurement No.:
Name of Offeror Company:
I, hereby certify under penalty of perjury:
(1) That I am[please select one. the offeror, a partner of the offeror, an officer of the offeror] making the bid or proposal in the foregoing identified procurement;
(2) That I have read and understand the provisions of 5 GCA § 5801 and § 5802 which read:
§ 5801. Wage Determination Established.  In such cases where the government of Guam enters into contractual arrangements with a sole proprietorship, a partnership or a corporation ("contractor") for the provision of a service to the government of Guam, and in such cases where the contractor employs a person(s) whose purpose, in whole or in part, is the direct delivery of service contracted by the government of Guam, then the contractor shall pay such employee(s) in accordance with the Wage Determination for Guam and the Northern Mariana Islands issued and promulgated by the US Department of Labor for such labor as is employed in the direct delivery of contract deliverables to the government of Guam.
The Wage Determination most recently issued by the US Department of Labor at the time a contract is awarded to a contractor by the government of Guam shall be used to determine wages, which shall be paid to employees pursuant to this Article. Should any contract contain a renewal clause, then at the time of renewal adjustments, there shall be made stipulations contained in that contract for applying the Wage Determination, as required by this Article, so that the Wage Determination promulgated by the U.S Department of Labor on a date most recent to the renewal date shall apply.
§ 5802. Benefits. In addition to the Wage Determination detailed in this Article, any contract to which this Article applies shall also contain provisions mandating health and similar benefits for employees covered by this Article, such benefits having a minimum value as detailed in the Wage Determination issued and promulgated by the US Department of Labor, and shall contain provisions guaranteeing a minimum of ten (10) paid holidays per annum per employee.
(3) That the offeror is in full compliance with 5 GCA $\S$ 5801 and $\S$ 5802, as may be applicable to the procurement referenced herein;
(4) That I have attached the most recent wage determination applicable to Guam issued by the US Department of Labor. [INSTRUCTIONS - Please attach!]

23	Kåhat Act	of 2013."
21	§ 58D102.	Legislative Findings and Policies. I Libeslation
25	Guahan finds (1	at Simon Sanchez High School faces the combined
26		morating conditions, out of date design, and overcrowding.
27		detrefencies impair the quality of teaching and learning and

contribute to health and safety problems for staff and students. It should be noted that it is critical for the Guam Department of Education to develop a comprehensive capital improvement plan to provide a roadmap for prioritizing facility improvements beyond Simon Sanchez

İ

ì

()

2.1

I Liberlanara finds that after reviewing the summary of outstanding General and Limited Obligation debts as of March 1, 2013, that the debt ceiling assessed value is at One Billion One Hundred Thirty Nine Million Four Hundred Sixty Four Thousand Fight Hundred Fifty Three Dollars (\$1,139,464,853). It also states that the General Obligation Debt is Four Hundred Forty Six Million Four Hundred Seventy Three Thousand Eight Hundred Fifty Three Dollars (\$446,473,853); and the Limited Obligation Debt is Six Hundred Sixty Three Million Eight Hundred Ninety Six Thousand Fight Hundred Three Dollars (\$663,896,803), with an accumulated total of One Billion One Hundred Fen Million Three Flundred Seventy Thousand Six Flundred Fifty Six Dollars (\$1,110,370,656) Subtracting the debt ceiling limit less the General and Limited Obligation Debts leaves the amount for future debt obligation at Twenty Nine Million Ninety Four Thousand One Hundred Ninety Seven Dollars (\$29,094,197).

I Inhestatura further finds that the cost for the renovation of construction of a new Simon Sanchez High School would exceed Guant's debt ceiling obligation cap if a General Obligation Bond is pursued. To encumient the debt ceiling cap, I I the slatura finds that the construction of Olkodo High School, Astumbo Middle School, Liguan Elementary School, Adacao Elementary School, John F. Kennedy High School and the expansion of Okkodo High School validates the fundamental soundness of using a municipal lease as a vehicle to build new educational facilities. By utilizing municipal leasing to tenovate or construct a new Simon Sanchez

i

High School, the remaining future debt obligation may be used to fund other priorities of the government.

17

I Liheslatura further intends to authorize I Maga'lahen Gudhan to pledge or reserve the additional proceeds as a source of payment for a municipal lease financing, secured for the purposes stated herein, either to renovate or construct a new Simon Sanchez High School. To overcome the financing hurdles, I Liheslaturan Gudhan supports the government of Gnam to enter into a contract for the financing, design, renovation or construction and long-term capital maintenance of Simon Sanchez High School with a private sector contractor who can provide long-term financing obtained through tax-exempt obligations or other competitive alternative financing based on long-term lease-backs to the government of Guam. In order to facilitate system-wide improvements. I Liheslaura shall authorize the Guain Department of Education to develop a comprehensive capital improvement plan for prioritizing capital improvements to all Guam Department of Education schools. To facilitate the financing, design, renovation or construction and maintenance of an education facility envisioned by this Act, the government of Guam will be authorized to lease, for up to thirty (30) years, government of Guam property on which the facilities will be constructed to the contractor, who will design, renovate or construct a new education facility in accordance with specifications approved by Guam Department of Education. The education facility and land will be leased back to the government of Guam for a period not to exceed thirty (30) years or the initial ground lease to the contractor over which time the government of Cham will amortize, as lease payments to the contractor, the cost of the financing, design, renovation or construction

I	and related expenses of the education facility. The contractor will also
2	be responsible for the capital maintenance of the education facility
3	constructed under this Act, which costs shall be paid by the government of
4	Guam, as provided for under this Act. At the expiration of the lease-back
5	period, the government of Guam real property and the education facility
6	that is renovated or constructed on the government of Guam real property
7	will revert to the government of Guam with no further obligations to the
8	Contractor.
9	§ 58D103. Definitions. For purposes of this Chapter and unless
10	otherwise specified, the following words and phrases are defined to mean:
11	(a) Act means Chapter 58D of Title 5, Guant Code
12	Annotated, known as the "Ma Kåhat Act of 2013."
13	(b) Comprehensive capital improvement plan means a plan
1-1	that takes into consideration the physical condition of each school.
15	along with attendance area population, enrollment patterns, and
16	bussing logistics. It shall also include how each school meets the
17	instructional needs of GDOF and prioritizes repairs of existing
18	schools, and renovation and construction of new school facilities in
10	order to deal with GDOI: limited resources.
2()	(c) Contract shall mean the various design, renovation or
21	construction and financing agreements entered into by and between
2.7	the education agency and the contractor following negotiations on the
23	response to the Request for Proposal.
24	(d) Contractor shall mean the authorized entity which shall
25	be the signatory on the Contract and shall be fully responsible for
3()	carrying out the design, renovation or construction, financing and
27	maintenance of the education facility. The contractor may cooperate

ı	with another entity or entities in any manner the contractor deems		
2	appropriate to provide for the financing, design, renovation,		
3	construction or maintenance of the public school facilities envisioned		
4	by this Act		
5	(c) Education agency shall mean the Guant Department of		
6	Education		
7	(f) I ducation facility is used in this Act, shall mean the		
8	renovation or construction of a new high school, and to include its		
4)	athletic facilities to be located on the existing site of Simon Sauchez		
1()	High School		
11	(g) Lease shall mean a lease from an education agency to the		
12	contractor entered into at the time of the contract for the property		
11	(h) Louse-back shall mean the lease from the contractor to		
11	the education agency.		
15	(i) Lease-back period shall mean the term of the lease from		
16	the contractor to the education agency		
17	(j) Property shall mean any property on which an education		
18	facility is located.		
19	§ 58D104. Authorization to Enter Into Long-Term Leases. For		
20	the purpose of facilitating the financing of the design, renovation		
21	or construction and maintenance of an education facility encompassed		
22	by this Act, the government of Guam or an education agency, as the case		
23	may be, is authorized to fease, if required, to the contractor sufficient		
21	government of Guain real property on which to renovate or construct a		
35	new education facility, provided, such property is in the inventory of the		
26	education agency or the government of Guam. The property may be the		

site of an existing education facility under the control of an education

agency, which existing facility may be renovated or demolished and rebuilt under the provisions of this Act. The education agency is also authorized to lease back from the contractor the property for a period mutually agreed upon between the education agency and the contractor as may be reasonably necessary to amortize over the lease-back period the costs associated with the financing, design, renovation or construction of the education facility. In no event shall the end of such lease back period be later than the date thirty (30) years from the scheduled date of completion of the education facility. The lease-back may be structured as an annually renewable lease with provision for automatic renewals to the extent that pledged or reserved revenue under \$22425(q)(4) and (6) of Title 5. Guam Code Annotated, is available. The base back shall not be construed as a debt under any applicable debt lumitation under the Guam Organic Act or Guam law.

I

1 1

§ 58D105. Procurement. Subject to the approval of I Liheslaturan Guahan, the government of Guam or an education agency shall solicit Requests for Proposals (RFP) through the Department of Public Works, in compliance with the Guam procurement law, for the development of the comprehensive capital improvement plan, the financing, design, renovation or construction of the education facility, together with insurance and maintenance of the education facility over the lease-back period, according to the needs of the education agency and consistent with this Chapter. The choice of the contractor shall be made by a selection committee comprised of the Superintendent of the Department of Education, serving as Chairman, and including the Director of the Department of Public Works or Deputy Director, the Director of the Department of Land Management or Deputy Director, the Administrator of the Guam Environmental Protection Agency

į

or Deputy Administrator, and the Administrator of the Guam Economic Development Authority or Deputy Administrator. The committee *shall* access the prior performance of the contractor on similar projects and may disqualify any Contractor that does not have a successful record of project completion on Guam.

26

27

The selection of a contractor *shall* be based upon the proposal that delivers the best value for Guain in meeting the objectives of the education agency.

The RFP *shall* be issued within thury (30) days of enactment of this Act for the renovation or construction of a new Simon Sanchez High School on the existing site, which may include demolition of such portions of the existing facility as necessary.

§ 58D106. Responsibilities of Contractor. The contract shall require that the contractor will work with GDOE to develop the comprehensive capital improvement plan in connection with the design of a renovated or construction of a new Simon Sanchez High School, Further, the contractor shall be responsible for all costs, expenses and fees of any kind or nature, associated with the design, civil improvements, on-site and off-site infrastructure, construction, permits, and financing associated with the completion of an education facility, including the financing of furniture and equipment for the education facility, as, and to the extent, provided by the education agency in the Request for Proposals. The contract will also require that all major subcontracts be covered by a performance bond, and further, that there be a specific delivery date with liquidated damages for failure to deliver the school by the specified date. The contractor shall also be responsible for the capital in untenance of the schools during the lease back period, but shall not be

Sales

The lease-back may provide that if sufficient funds are *not* appropriated or otherwise available for the payment of amounts due under the lease and any maintenance agreement, the education agency will have the obligation to vacate the education facility, and the contractor *shall* have the right of use and occupancy of the education facility for the remainder of the term of the lease, *unless* new unitually satisfactory terms are entered into. For this purpose, the lease may provide that its term shall be extended for a period *not to exceed* the shorter of ten (10) years beyond the original term of the lease back or such period of time as is necessary to repay in full any financing arranged pursuant to § 58D108. The capital maintenance costs *shall* be paid by the education agency on a periodic basis as incurred by the contractor on terms to be agreed to in the contract tor the education facility

ř

(1)

2.7

§ 58D107. Assignments. To facilitate the purposes of this Act and to provide security for the holders of any financing instruments issued pursuant to this Act, the contractor may assign, without the need of the consent of the education agency, the contract, the lease, and the lease-back to any underwriter, trustee, or other party as appropriate, to facilitate the issuance of the tax exempt obligations, other financial instruments or alternative financing for the education facility.

§ 58D108. Use of Tax-Evempt Bonds for Financing. To minimize the financing cost to the education agency, financing utilized by the contractor to fund the design, renovation or construction of an education facility shall be through tax-exempt obligations or other financial instruments, provided, such financing is available at interest rates

1)

Alternatively, the contractor may use an alternative method of financing, including, but not fimited to, a short term debt, mortgage, loan, federally gnaranteed loan or loan by an instrumentality of the United States of America, if such financing will better serve the needs of the people of Guain. Such alternative financing shall be approved by I Liheslaturan Guahan. The purpose for the requirements of this Section is to assure the education agency pays the lowest possible interest rate so that the cost to the education agency of financing the design, renovation or construction of an education facility, amortized through the lease-back payments from the education agency to the contractor, will be lower than regular commercial rates.

§ 58D110. Utilities and Routine Maintenance and Repair. The education agency *shall* be responsible for the connection and payment of all utilities, including without limitation, power, water, sewer, telephone and cable, and all routine interior maintenance and repair and exterior groundskeeping and landscaping, and upkeep of the education facility.

§ 58D111. Maintenance Fund. The contract of a separate maintenance agreement with the contractor, and the lease-back, shall provide that all capital maintenance of the education facility be performed by the contractor as a separate cost, the terms of which, and the manner for establishing the amount of payment, shall be determined as a part of the contract; provided, however, that said documents may, at the discretion of the education agency, provide that capital maintenance with respect to equipment (including collateral equipment), onsite utilities, offsite utilities, access roads and other similar improvements need not be performed by the contractor

§ 58D112 Contractual Safeguards. Prior to undertaking the work of renovating or constructing a new Simon Sanchez High School, the Guam Leonomic Development Authority, the Department of Public Works, the Guam Department of Education, and the developer or contractor shall

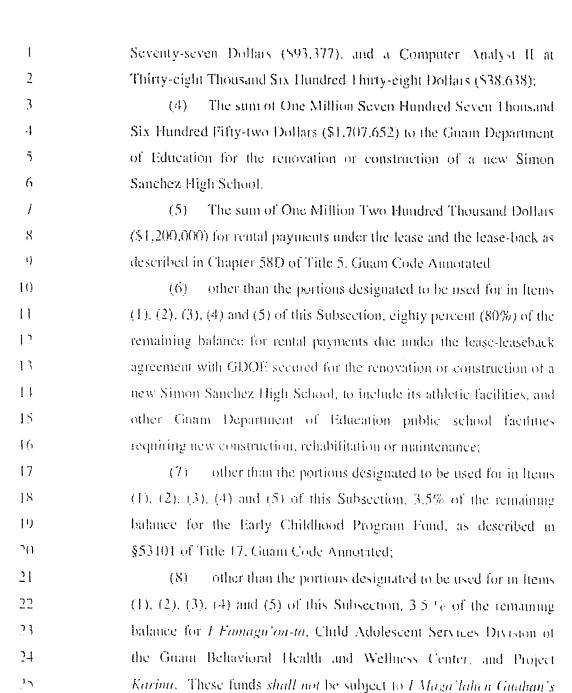

1	negotiate and enter into a binding construction contract to renovate or			
2	construct a new Simon Sanchez High School in accordance with the Guam			
3	Building Code (21 G.C.A. Ch. 67), and any other applicable requirements			
4	The construction contract shall contain contractual obligations typically			
5	found in government of Guant construction contracts, including, but more			
6	limited to:			
7	(a) warranties;			
8	(b) liquidated damages;			
ı)	(c) performance and payment bonds;			
10	(d) indemnity;			
1	(e) insurance:			
12	(f) standard specifications;			
3	(f) technical specifications;			
	(g) progress schedule;			
15	(h) maintenance;			
16	(i) compliance with Guam labor regulations,			
7	(j) compliance with Guam prevailing wage rates for			
18	employment of temporary alien workers (H2) on Guam;			
9	(k) compliance with Public Law 29/98, restriction against			
P()	contractors employing convicted sex offenders to work at government			
21	of Gnam venues.			
22	The contract shall be submitted for review and approval to all entities			
2,3	charged by law with the duty to review and approve government contracts,			
24	including the Office of the Attorney General.			
5.	§ 58D113. Severability. If any provision of this Act or its			
6	application to any person or circumstance is found to be invalid or contrary			
17	to law, such invalidity shall not affect other provisions or applications of this			

1	Act which can be given effect without the invalid provisions or application,
2	and to this end the provisions of this Act are severable."
3	Section 3. \$22425(q) of Article 4, Chapter 22, Division 2, Title 5, Guam
-1	Code Annotated, is hereby amended to read.
5	'(q) Notwithstanding any other provision of law, any additional real
6	property tax revenues received as a result of the most recent valuation of real
7	property due to commence during the calendar years 2013 and 2014 is
8	hereby continuously appropriated annually, not to exceed Eight Million Five
9	Hundred Thousand Dollars (\$8,500,000), from the Territorial Educational
1()	Facilities Fund in the amounts and for purposes set forth in this Subsection:
11	(1) The sum of One Million One Hundred Fifty Eight
12	Thousand Two Hundred Fighty Three Dollars (\$1,158,283).
13	beginning in FY 2014, for the construction of the Student Services
14	Center and Engineering Annex at the University of Guam, as a source
15	of payment to the University of Guam Capital Improvements Fund for
16	the purpose of paying rental payments due under the lease-leaseback
17	agreements with the University of Guam Endowment Foundation for
18	a term of forty (40) years;
19	(2) The sum of Two Hundred Seventy-eight Thousand Nine
20	Hundred Twenty one Dollars and Fifty-two Conts (\$278,921.52),
21	beginning in FY 2014 for forty (40) years, for the construction or
22	renovation of Building 100 and the DNA Laboratory at the Guam
2,3	Community College;
11	(3) The sum of One Hundred Thirty-two Thousand Fifteen
25	Dollars (\$132,015) to the Guam Public Library System to hire a

R. J. Respicio
T. C. Ada
V. Anthony Ada
B. J.F. Cruz
Vicente (ben) C. Pangelinan
Michael F. Q. San Nicolas

AN ACT TO *ADD* A NEW CHAPTER 58E TO TITLE 5, GUAM CODE ANNOTATED, RELATIVE TO THE FINANCE, DESIGN, RENOVATION, REHABILITATION, CONSTRUCTION OR MAINTENANCE OF PUBLIC SCHOOLS.

#### BE IT ENACTED BY THE PEOPLE OF GUAM:

- 2 Section 1. A new Chapter 58E is hereby added to Title 5, Guam Code
- 3 Annotated, to read as follows:

4 "CHAPTER 58E

1	THE FINANCE, DESIGN, RENOVATION,			
2	REHABILITATION, CONSTRUCTION OR MAINTENANCE OF			
3	PUBLIC SCHOOLS			
4	§ 58E100. Legislative Findings and Intent.			
5	§ 58F101. Definitions.			
6	§ 58E102. Authorization to Enter into Long-Term Leases.			
7	§ 58E103. Identification of Projects and Procurement.			
8	§ 58E104. Responsibilities of Developer/Contractor.			
Ŋ	§ 58E105. Contractual Safeguards.			
10	§ 58E106. Assignments.			
11	§ 58E107. Pledge of Revenues.			
12	§ 58E108. Use of Tax-Exempt Bond and Other Financing			
13	Instruments for Financing.			
14	§ 58E109. Utilities, Maintenance and Repair.			
15	§ 58E110. Severability.			
16	§ 58E100. Legislative Findings and Intent. I Liheslaturan			
17	Guahan finds that Guam public school facilities face deficiencies in its			
18	roofing, exterior, interior, structural, mechanical, electrical, plumbing, and			
19	school grounds, which create a non-conducive environment that hinders			
20	learning and the work and production of teachers and students.			
21	I Liheslaturan Guåhan linds that the Guam Department of Education			
22	is about \$90 Million behind on maintenance projects for the island's public			
23	schools, according to a report commissioned by the Department of the			
24	Interior in 2012, and recently submitted to the Guam Department of			
25	Education in August 2013.			
26	It is, therefore, the intent of I Liheslaturan Guähan for the			
27	government of Guam to use one quarter of the business privilege tax to pay			

for the interest payments of the lease and lease-back as a form of bridge financing until the maturity of the Business Privilege Tax bond series 2013C.

4 5

y)

I Liheslatura finds that after reviewing the summary of outstanding General and Limited Obligation debts as of March 1, 2013, that the debt ceiling assessed value is at One Billion One Hundred Thirty Nine Million Four Hundred Sixty Four Thousand Eight Hundred Fifty Three Dollars (\$1,139,464,853). It also states that the General Obligation Debt is Four Hundred Forty Six Million Four Hundred Seventy Three Thousand Eight Hundred Fifty Three Dollars (\$446,473,853), and the Limited Obligation Debt is Six Hundred Sixty Three Million Eight Hundred Ninety Six Thousand Eight Hundred Three Dollars (\$663,896,803), with an accumulated total of One Billion One Hundred Fen Million Three Hundred Seventy Thousand Six Hundred Fifty Six Dollars (\$1,110,370,656). Subtracting the debt ceiling limit less the General and Limited Obligation Debts leaves the amount for future debt obligation at Twenty Nine Million Ninety Four Thousand One Hundred Ninety Seven Dollars (\$29,094,197).

I Liheslatura further finds that the cost to fund the rehabilitation of the public schools will certainly exceed the debt ceiling obligation if a general obligation bond is pursued. To circumvent Guam's debt ceiling cap, I Liheslatura finds that the construction of Okkodo High School, Astumbo Middle School, Liguan Elementary School, Adacao Elementary School, John F. Kennedy High School, and the expansion of Okkodo High School, has demonstrated the fundamental soundness of using municipal lease as a vehicle to build new educational facilities. By making the most of municipal leasing to rehabilitate and construct Guam public schools, the remaining

l	future debt obligation may be used to fund other priorities of the
2	government.
3	§ 58E101. Definitions. For purposes of this Chapter and unless
4	otherwise specified, the following words and phrases are defined to mean:
5	(a) Comprehensive capital improvement plan means a plan
6	that takes into consideration the physical condition of each school
7	along with attendance area population, enrollment patterns, and
8	bussing logistics. It shall also include how each school meets the
9	instructional needs of GDOE, and prioritizes repairs of existing
10	schools and renovation and construction of new school facilities in
11	order to deal with GDOE limited resources.
12	(b) Contract shall mean the design, renovation
13	rehabilitation, construction, and financing contract entered into by and
14	between the education agency and the contractor chosen by the Guant
15	Economic Development Agency and approved by I Liheslaturan
16	Guåhan.
17	(c) Contractor shall mean the authorized entity which shall
18	be the signatory on the contract and shall be fully responsible for
19	carrying out the design, renovation, rehabilitation, construction,
20	financing, or maintenance of the education facility. The contractor
21	may cooperate with another entity or entities in any manner the
22	contractor deems appropriate to provide for the financing, design,
23	renovation, rehabilitation, construction or maintenance of the public
24	school facilities envisioned by this Act.
25	(d) Education agency shall mean the Guant Department of
26	Education.

- (e) Education facility as used in this Act shall mean public elementary and secondary schools on Guam, to include its athletic fields and playgrounds, excluding the five leased schools under the education agency.
- (f) Lease shall mean a lease from an education agency to the contractor entered into at the time of the contract for the property.
- (g) Lease-back shall mean the lease from the contractor to the education agency of the rehabilitated, renovated or newly constructed education facility.
- (h) Lease-back period shall mean the term of the lease from the contractor to the education agency.
- (i) Property shall mean any property on which an education facility is located.

§ 58E102. Authorization to Enter into Long-term Leases. For the purpose of facilitating the financing, design, construction and rehabilitation and maintenance of an education facility encompassed by this Act, the government of Guam or an education agency, as the case may be, is authorized to lease, if required, to the contractor sufficient government of Guam real property on which to rehabilitate an education facility; provided, such property is in the inventory of the education agency or the government of Guam. The property may be the site of an existing education facility under the control of an education agency, which existing facility may be rehabilitated under the provisions of this Act

The education agency is also authorized to lease back from the contractor the property for a period mutually agreed upon between the education agency and the contractor as may be reasonably necessary to amortize over the lease-back period the costs associated with the design,

renovation, rehabilitation, construction or maintenance of the education facility. In no event shall the end of such lease-back period be later than the date thirty (30) years from the scheduled date of completion of the education facility. The lease-back may be structured as an annually renewable lease with a provision for automatic renewals to the extent that pledged revenue under § 58E107 is available. The lease-back *shall not* be construed as a debt under any applicable debt limitation under the Guam Organic Act or Guam law.

§ 58E103. Identification of Projects and Procurement. Under the Superintendent of Education's direction, the education agency shall utilize the Program Study, and the report generated by the Department of Interior (DOI)-funded assessment report by the Army Corps of Engineers, to identify and prioritize potential projects to be completed. The list of projects shall be included in a Request for Proposals developed by the education agency. Upon receipt of the Program Study, the Superintendent of Education shall solicit Requests for Proposals (RFP) through the Department of Public Works, in compliance with the Guam Procurement Law, for the financing, design, construction and rehabilitation of the education facility, according to the needs of the education agency and consistent with this Chapter. The choice of the contractor shall be made by a selection committee comprised of the Superintendent of the Department of Education, serving as Chairman, and including the Director of the Department of Public Works or Deputy Director, the Director of the Department of Land Management or Deputy Director, the Administrator of the Guam Environmental Protection Agency or Deputy Administrator, and the Administrator of the Guam Economic Development Authority or Deputy Administrator. The committee shall assess the prior performance of the contractor on similar projects, and shall

be free to disqualify any contractor that *does not* have a successful record of project completion on Guam.

The selection of a contractor *shall* be based upon the proposal that delivers the best value for Guam in meeting the objectives of the education agency.

The RFP *shall* be issued within thirty (30) days after the receipt of the Program Study for the design, renovation, rehabilitation, construction or maintenance of the education facility.

§ 58E104. Responsibilities of Developer/Contractor. The contract shall require that the contractor be responsible for all costs, expenses and fees of any kind or nature, associated with the rehabilitation, design, civil improvements, on-site and off-site infrastructure, construction, permits, and financing associated with the completion of an education facility, including the financing of furniture and equipment for the education facility, as and to the extent provided by the education agency in the Request for Proposals. The lease back may provide that if sufficient funds are not appropriated or otherwise available for the payment of amounts due under the lease, the education agency will have the obligation to vacate the education facility, and the contractor shall have the right of use and occupancy of the education facility for the remainder of the term of the lease, unless new mutually satisfactory terms are entered into. For this purpose, the lease may provide that its term shall be extended for a period not to exceed the shorter of ten (10) years beyond the original term of the lease-back, or such period of time as is necessary to repay in full any financing arranged pursuant to § 58E108 of this Chapter. The capital maintenance costs shall be paid by the education agency.

1	§ 58E105. Contractual Safeguards. Prior to undertaking the work
2	of rehabilitating educational facilities, the Guam Feonomic Developmen
3	Authority, the Department of Public Works, the Guam Department of
4	Education, and the developer or contractor, shall negotiate and enter into a
5	binding construction contract to build or refurbish the educational facility in
6	accordance with the Guam Building Code (21 G.C.A. Ch. 67), and any other
7	applicable requirements. The construction contract shall contain contractua
8	obligations typically found in government of Guam construction contracts
9	including, but not limited to:
10	(a) warranties;
11	(b) liquidated damages;
12	(c) performance and payment bonds;
13	(d) indemnity;
14	(e) insurance;
15	(f) standard specifications;
16	(g) technical specifications;
17	(h) progress schedule;
18	(i) maintenance;
19	(j) compliance with Guam labor regulations;
2()	(k) compliance with Guam prevailing wage rates for
21	employment of temporary alien workers (H2) on Guam;
22	(l) compliance with Public Law 29-98; restriction against
23	contractors employing convicted sex offenders to work at government
24	of Guam venues.
25	The contract must be submitted for review and approval to all entities
26	charged by law with the duty to review and approve government contracts,
27	including the Office of the Attorney General.

§ 58E106. Assignments. To facilitate the purpose of this Act and provide security for the holders of any financing instruments issued pursuant to this Act, the contractor may assign, without the need of the consent of the education agency, the contract, the lease and lease-back to any underwriter, trustee or other party as appropriate to facilitate the contractor financing.

§58E107. Pledge of Revenues.

(a) Rental payments under the lease and the lease-back may be secured by a pledge or other reservation of revenues collected by the government of Guam from the following:

§ 58E108. Use of Tax-Exempt Bond, Taxable Bond and Other Financing Instruments for Financing. To minimize the financing cost to the education agency, financing utilized by the contractor to fund the design, renovation, rehabilitation, construction or maintenance of an education facility shall be through tax-exempt obligations, taxable bond obligation, or other financial instruments, provided, such linancing is available at interest rates determined by the education agency to be reasonable and competitive. Alternatively, the contractor may use an alternative method of financing, including, but not limited to, a short term debt, mortgage, loan, federally guaranteed loan or loan by an instrumentality of the United States of America if such financing will better serve the needs of the people of Guam. Such alternative financing shall be approved by I Liheslaturan Gudhan. The purpose for the requirements of this Section is to assure the education agency pays the lowest possible interest rate so that the cost to the education agency of financing the design and construction of an education facility, amortized through the lease-back payments from the education agency to the contractor, will be lower than regular commercial rates.

§ 58E109. Utilities, Maintenance and Repair. The education agency *shall* be responsible for the connection and payment of all utilities,

 $\Pi$ 

including without limitation, power, water, sewer, telephone, and cable, and
all maintenance and repair and exterior groundskeeping and landscaping,
and upkeep of the education facility.
§ 58E110. Severability. If any provision of this Act or its

3 4

5

6 7

8

application to any person or circumstance is found to be invalid or contrary to law, such invalidity shall not affect other provisions or applications of this Act which can be given effect without the invalid provisions or application, and to this end the provisions of this Act are severable."

Phose II Report - August 2013

### **Executive Summary**

This report documents the findings of an assessment of the physical condition of public schools (Kindergarten – Grade 12) in the US Insular Areas (Commonwealth of the Northern Mariana Islands, Guani American Samoa and US Virgin Islands). This "Phase II" report is part of the US Department of the Interior/Office of Insular Affairs "Insular ABCs in tative (Assessment of Buildings and Classrooms) to improve the condition of insular area schools, a goal of DOI's FY 1- FY 16 Strategic Plan. The report is the second in a series of steps associated with the ABCs Initiative. The first report provided situational awareness, a preliminarly assessment of school conditions and a methodology for conducting a comprehensive school condition assessment. This report documents the findings and recommendations of that comprehe is we assessment. The third step will be to implement the recommendations following the general scope and time the provided in this report.

All 115 public K-12 schools in the four insular areas were surveyed between August 2012 and April 2013. Close coordination between the assessment leart, school district leadership and stall, and school principals was maintained to gain input and participation and maximize results of the assessment process. Data was imput into a relational database which is also accessible via a secure project website. Conditions of key building elements for each building were scored in the field and approximations of associated deferred maintenance (DM) cost were generated through a cost algorithm in location adjusted, 2013 dollars. Quantities, costs and a condition "score" can be aggregated at the building system level, building, school, island, insular area and all insular area levels, and provides OIA and the insular areas with simple metrics to

gauge condition of insular schools – and to monitor progress. The accompanying table provides a high level overview of the school inventory.

### Insular Schools Summary

	Schoa's	Bu ld ngs	Total S= (M)*	DWISMI	Replacement Cost** (\$VI)
Ал Бапса	28	293	0.9	S10 D	\$100
CNMI	20	293	09	\$11.3	\$162
Guam	35	<b>64</b> 3	3.0	\$89 9	\$870
TVZL	32	344	25	\$66.2	\$606
Total	115	1,576	7.3	\$177.A	\$1,738

desertion room mazzonements

The Insular area school replacement value is estimated at approximately \$1.7 billion. Deferred maintenance is estimated at approximately \$177 million, of which approximately 9% is associated with high prior ty health and safety issues. School grounds conditions were also assessed (e.g., site drainage, pavement conditions, fencing, etc.) and deficiencies were dentified, but associated costs were not calculated as part of the Phase II enter this own environment quarty assessments menuncular actions, now cost options to immediately improve classroom condition (e.g., recogning sealed windows, improving natural lighting and installing/repairing fans) that are also not directly included in the DM discolog. Energy audits identified cost-effective energy conservation measures to significantly reduce utility bits and improve occupant comfort while reducing electrical and water consumption.

it is recommended that OIA and the insular areas engage closely in a cartnership to achieve significant progress in completing ABCs in tiative Phase II recommendations within the next five years.

<sup>\*\*</sup>Ration no local legiscement in a nata

Deferred maintenance estimates were based on a simple condition rating system using scores ranging from five (no CM) to one imagor DM) with zero representing inot present but required.

Phase II Report - August 2013

### 1 Introduction

The Insular ABCs initiative represents a partnership cetween OIA and Inuinsular areas (American Samoa, the Commonwealth of the Northerr Mariana Islands (CNM), Guam, and US Virgin's ands (USVI)) to improve the physical condition of X-12 public schools. This report represents Phase II of a three-phased in tiative: the first was a feasibility study undertaken to gein situational awareness, collect orelin inary inventory data and establish assessment methodology. The Phase II report provides a first-ever baseline inventory and condr. on assessment of the insular X-12 public schools (115) identifying deferred maintenance (DM) costs (maintenance that should have been performed but was delayed for a future period), energy conservation measures to reduce overal lift ity costs and increase energy security, and measures to improve indoor environmental quality conditions to poost student performance.

The Insular Schools: Assessment of Buildings and Classrooms (ABCs) initiative, or Insular ABCs, was initiated to support the US Department of the Interior's (DOI) FY 2011-2016 Strategic Plan Goal A2, Empower Insular Communities, Strategy M1, Improve Quality of title in the insular areas, the supporting performance measure of which is "Percent of schools in acceptable condition based on specified safety and functionality standards." As stated in the Strategic Plan, the DOI through its Office of Insular Affairs (OIA) "will assist the insular areas to improve the quality of life by pairing access to financial resources for capital improvements and public services with robust oversight, and by improving interagency coordination on insular issues." Implementation of the Phase II recommendations represents the third and final phase and is outlined in Chapter 6.

The report is organized into six chapters. Chapter 1 provides a general introduction and overall context. Chapter 2 summarizes methodology including descriptions of assessment techniques and cost model.

Chapter 3 provides a high level overview of the insular school districts ald general findings from the condition assessment. Chapter 4 summarizes insular area-specific findings. Chapter 5 summarizes the various work products produced as part of the Phase Fleffort. Chapter 6 presents the implementation plan.

# 1.2 Value to OIA and Insular Areas

1.1 Purpose

DOI's Strategic Plan, dentifies the need to improve insular school conditions as an important performance measure in improving quality of if e. Comprehensive condition assessments currently do not exist for all areas and prioritization of school facility investments is inconsistent and in some cases subject to strong political pressures.

Condition assessment and deficiency reporting established in Phase II of the Insular ABCs initiative provides insular school stakeholders (OIA, Governors, School District officials, etc.) with a clear view of how building elements and school facilities throughout the respective districts are gerforming and provides a snap shot, based on standard metrics (e.g., score and DM backlog), of the relative condition of insular schools. The comprehensive view of facility condition provided in this phase will help nform investment strategies and enhance facility longevity. The condition assessment also identified health and safety concerns that need mmediate attention, as well as more systemic problems such as deteriorated roofs, and supporting utility systems, etc. that will need to be addressed in a sustained, programmatic approach-

Phose II Report - August 2013

· Provide comprehensive, verifiable data to assess needs

- · Lack of awareness regarding exisiting deficiencies and funding needs
- Existing investment decisions

· Develop estimates of deferred maintenance cost needed to Improve condition of insular schools

based funding repurements.

rely on incomplete information.

Deferred maintenance is defined by The Federal Accounting Standards Advisory Board (www.FASAB.gov) as: maintenance that was not performed when it should have been or was scheduled to be and which, therefore, is put off or delayed for a future period. For our poses of this standaro, maintenance is described as the act of keeping fixed assets in occeptable condition. It includes preventive maintenance, normal repeirs, replacement of parts and structural companents, and other activities needed to preserve the asset so that it continues to provide acceptable services and achieves its expected life. Maintenance excludes activities aimed at expanding the copacity of an asset or otherwise upgrading it to serve needs different from, or significantly greater than, those originally

intended. Statement of Federal Financial Accounting Standard 5

A comprehensive, geo-referenced facility Inventory was created to support the condition assessments, establishing the first-ever insular facilities database of a liserpol buildings. Costs estimates were developed for the 131 building elements assessed, accounting for a subset of major building costs, referred to as current replacement value (CRV). It is important to note that the parametric cost estimates provided are for high level planning purposes and are not substitutes for projectlevel design costs. Facility floor areas and CRVs provide valuable metrics for facilities planning and analyzing maintenance program alternatives.

DV percentage of total CRV (DM/CRV), or cost of needed repairs compared to the respective asset value, is referred to as the facility condition index (FCI) and is provided at all levels, from insular area to building element, and helps inform funding needs. FCI can help identify the magnitude of particular problems regardless of cost (e.g., an FCI over 50 percent may indicate replacement is warranted). Based on survey results, 25 percent of elements rated had FCI's above 15 percent and are considered, for the purposes of this report, to have a high FCI.

Phase II Schedule

Phase II Report - August 2013

### 1.3 Project Schedule

The overall project was conducted over a fourteen month period (May 2012 through June 2013) as indicated on the accompanying chart. Assessment criteria and methodology were developed from May through August 2012. A prototyping exercise took place at ChMI schools in August 2012 to validate/refine assessment tools and methods, before full surveys began in September 2012. School surveys started in CNMI in September 2012, moved to Guant il November, Artie ican Samoa in January 2013 and finally, to USVI in March 2013. School surveys concluded in April 2013.

Status briafings with O A were provided in September 2012, and March and July 2013. Report findings were briefed to each of the insular area. Governors in late July and early August 2013. Training sessions on how to access HMS information were also provided to insular a least-aff during this period. This final report is to be published on the O A website in late. August 2013.

### 1.4 Team Organization

O A contracted with the US Army Corps of Engineers (USACE) Honolulu District to undertake the ABCs in tiative - USACE retained Helber Hastert & Fee, Planners and its multi-disciplinary team of subject matter experts to lead the effort. HHF was the primary liaison with school district personnel

### insular ABCs Team Members

3

Phase II Report - August 2013

### 2 Methodology

Phase II of the insular ABCs included assessment and rating of building elements and DM estimation (based on component cost and condition score) to identify specific needs. DM estimates were aggregated at the building, building system, school, and regional levels to identify budgetary needs and help prioritize investment decisions. The initiative required development of the overall assessment approach, a cost model to date DM costs, an information management database, and a website data reporting system.

### 2.1 Overall Approach

The Insular ABCs used a rapid condition assessment model following a standard set of assessment procedures, a simple condition score range and score-based DM calculations. Data summaries were then provided by composite system and building level score, DM, and FCI.

### Schematic of overall approach

Rep diFacility Condition Associations

Rate condition or building systems (aggregate cuilding and campus condition scores)

Estimate DtA totals and hierarchy-specific FCI system, building, campus, is and and insular area

Provide information and tools to help identify and provide investment decisions

Key components of the insular ABCs initiative included development of assessment standards, stakeholder engagement practices, and data reporting systems. Data complation and reporting tools are to be provided to school districts upon project completion.

Condition assessment standards included defining items to be assessed, assessment criteria, establishing data do lection practices and needed tools, and developing systems for compring data and reporting back to school principals, school district personnel, and OIA officials. Health and safety concerns were also recorded when immed ate nazards to student safety were identified such as potential for falling concrete, jagged edges on finishes on fixtures, electrocution or fire risk, failed/near-failing integrity of structural elements, lack of emergency exits, serious air quality problems, fall risk, septic system problems (leaks or backups), or lack of nearby fire hydrants.

Engagement with insular area school superintel dents and school facility managers (crincipals, channing, programming and budgeting offices maintenance personnel, and other school district staff) was critical to capturing facility inventory date and existing needs. Facility management personnel were invited to carticipate in the assessments and were engaged throughout the assessment process to max in zelawaleness of the process and findings.

A facility information management system (FIMS) was developed to collect and store assessment bata, geocode facilities and related data, crocess calculations, and report findings. In addition to FIMS use, data compilation and reporting assessment findings included immediate reports back to school principals when safety risks were observed, out-briefs to school principals when safety risks were observed, out-briefs to school eistrict personnel on major and common findings delivering narrative reports in each insular area, and presenting summary condition data on the project website.

4

Phase II Report - August 2013

Insular Schools: Assessment of Buildings and Classrooms

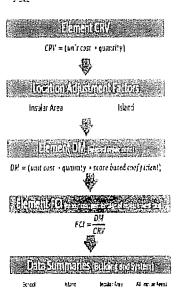

### 2.2 Cost Model

The Insular ABCs assessment model as described in the Phase I report is based on the NASA DM Parametric Est mating Method (NASA model). Summary scores and costs from the Insular ABCs condition assessments are reported at the system level, including seven building systems generally following the NASA model. "Site" was added to account for school grounds conditions, including drainage problems.<sup>2</sup>

<b>Building Syst</b>
----------------------

- 1 Smirture
- 5 Mechanica (HVAC)
- 2 Footing
- 5 Electrical 7 Plumbing
- 3 Exterior
- 3 Site

Key components of the cost model (identified in the schematic diagram to the right) include estimating element level CRV, applying location adjustment factors, estimating DM based on a score coefficient (shown or the system contained CRV Percentages table), calculating FCI to assist in data interpretation, and reporting data summaries through the system

<sup>&</sup>lt;sup>2</sup> Site cel ciencies were identified but associated costs to address the deficiencies were not calculated as part of the Phase Teffort.

In eractny on the project, website.

The building component typology was established generally following the national standard UNIFORMAT II Elemental Classification for Building Specifications, Cost Estimating, and Cost Analysis guide (1999) with some adjustments provided by team SMEs. Element costs were then estimated from national average RSMeans data janother national standard source for cost estimating data), and then adjusted by location factors based on local construction cost history, all expressed in 2013 dollars.

A total of 54 assessment categories, or subsystems, (e.g., roof covering, exterior windows, exterior wall construction), and 162 cost selections (e.g. asphalt roofing, aluminum windows double hung, reinforced masonry bearing walls), were identified to capture construction material types and address key grounds and building components. 5. bsystem and element material choices allowed surveyors to rapidly select appropriate building element bypes and collect required quantity information during assessments.

The cost selection total asplinicules 22 "Site" elements for which assessments were conducted but costs not assigned. The Insular ABCs cost mode could be expanded during the implementation phase to include costs for Site work components.

CRV is only calculated for the assessed building elements so it does not represent full facility replacement cost.

The costs assigned to each element (elemental CRV) were calculated through the cost model via 13 primary formulas and ten secondary formulas (applied when data for the primary calculations were not available). Most calculations were based on unit costs multiplied by quantities (e.g., floor area, columns, derimeter length) obtained by the assessment team.

DM cost estimates were derived by applying a score to the individual element (abbreviated score definitions are provided below; each SME prepared and followed a more detailed set of system and subsystem criteria to ensure consistency). The rating system used scores ranging from five to zero, five indicating no DM, one indicating significant DM, and zero representing not present but required.

### **Element Score Definitions**

- 5. No DM. Only normal scheduled maintenance required
- 4. Minor DM. Some minor repairs needed. System functions as interced
- Moderate DM. More minor and some larger repair required. System
  occasionally unable to function as Intended.
- Significant DM. Significant repairs required. Excessive damage clear yields. Obsciete System not functional as intended. Parts not easily obtainable. Does not meet all codes.
- 1. Major DM. Major repair/replacement required to restore function. Unsafe to use
- 0. Not Present. Element needs to be acquired/installed

The scores corresponded with a system condition CRV percentage as shown in the table below

### System Condition CRV Percentages (for estimating DM)

System\Score	5	4	3	2	1	0
Structure	0%	28	25%	50%	120%	100%
Exterior	0%	1%	10%	75%	100%	100%
Roofing	0%	9%	25%	90S	120%	100%
Interiors	0%	3%	10%	75%	101%	100%
Mechanical	0%	10%	25%	50%	120%	100%
Plumbing	0%	10%	25%	50%	120%	100%
Electrical	05	10%	25%	50%	120%	100%

Phase II Report - August 2013

System Condition CRV Percentages for Structure, Exterior, Roofing, and Interiors were developed by the respective SMEs to correlate with their assessment or teria. As shown, a score of 5 indicates no DM (0%). Rating an element with a lower condition score yields a higher DM percentage. Zero means an element is not present but requires installation, while 1 means full replacement, which often exceeds the installation costs due to other factors (e.g., demolition and disposal costs).

Insular area cost adjustment factors were developed, and applied to elemental CRVs, based on recent construction cost schedules collected from the insular areas and normalized to the US National average cost.

### Insular area adjustment factors:

Factor
1.00
0.86
1.22
1.95
1.63

Island adjustment factors, applied to adjusted insular area costs, were derived from cost estimate differences provided through local official interviews

Element costs, condition score, DM, and FCI were aggregated to system and building totals. These two "rollubs" are continued through school, siend, insular area, and total inventory to allow views into building and

Phase II Report – August 2013

Insular Schools: Assessment of Buildings and Classrooms

system issues at various levels and illustrate the scale of problems identified. This model was based on rough, order-of-magnitude parametric cost estimates developed for righ level budgetary purposes and is inappropriate to use following purposes. Building elements and costs can continue to be refined in the future to improve precision and more accurately account for actual building replacement values. Details on cost elements, associated cost factors and the various calculations used are provided in an accompanying technical paper.

Defining condition assessment or teria was a critical component to standardizing this process and included the definition of visual assessment queues that would be used to assign one of the six ratiligation each element assessed. Estimating DM costs for Site deficiencies was outside of the project scope; however, 22 Site elements were assessed to capture conditions of existing roadways, parking lots, padestrian paying, fences & gates, water supply, sanitary sevier, and storm server.

Deficiencies could be identified by the surveyors as health and safety concerns. Health and safety DM costs were totaled independent of other DM costs for priority attention.

The rapid assessment process provided the ability to assess general building conditions but stopped well short of a code compliance aubit. It is recommended that project planning and design for major renovations to address deferred maintenance also include identification of and correction of passible code compliance issues for structural, electrical and mechanical systems.

### 2.3 Assessment Procedure

Establishment of assessment procedures was undertaken early in project clanning to instill a consistent and replicable process that could be taught to and used by building surveyors and applied in any locate over time. Key components included:

- Local engagement
- School district personnel engagement
- Assessment protocol

### 2.3.1 Local Engagement

Close coordination between the assessment team, school district staff and school principals was maintained to minimize disruption to the teaching environment and maximize results of the assessment process.

# Inclofficals in a series of the

 Relevant government officials were briefed on project objectives and asked to provide information on recent school construction costs, Lt Ityrecords hard asset data, editing site and floor plans, schools with prainage problems, GIS data, capacity and enrollment data previous studies and planned improvements, and logistical matters.

# Principals

To engage school our cipals constructively and efficiently another
assessment process, a short questionnaire was sent to school
principals in advance of surveys with a read ahead of basic
project information. Information requested in the
questionnaires provided insight on existing conditions.

7

Phase II Report - August 2013

### liesetion schedule

 School assessment schedules were created based on school district communications, maintained by the assessment team, and shared with school district personnel throughout surveys of andard pacing was established early in the process laveraging about one school benday.

### Survey existence and participation

 Sid and district personnel were encloraged to accompany the assessment team for process ewareness and as a quality control measure. School administrative or maintenance staff typically sn. wild the assessment learn promotion for oer vasive problems with the school facilities and grounds.

# Uiligs

- Kickoff meetings with school district leadership were held within one month primit to the surveys to brief local officials in objectives, assessment methods, and assessment schedule and gain liput.
- In-triels were conducted the first working day of team arrival
  to introduce the surveyors, get school personnel assignments
  for those julining the team during surveys if apulicable involves.

protocol and standards, and go over logistics

 Dut-briefs were provided to facility management personnel at or near the completion of the surveys to report assessment findings, including common and major findings.

### 2.3.2 Assessment Protocol

A standard protocol was developed for the assessment team to complement the written assessment criteria

### Prior to school visits

- Review principal questionnaire and other available school information
- Notify principals if there are scredule changes: request permission to visit scrools on Saturdays and holidays
- . Confirm ability for the surveyors to access to each room

# AL the school:

- Check in at the front dask and in-brief the principal or assigned representative
- Get input on existing problems from school creintenance personne to the extent possible

# Differences

- Wear team identification badges and any school districtspecified corsonal protective equipment
- Walkthrough surveys of all rooms in buildings with minimal disruptions to angoing activities

# Postsurveys:

- Check out at front desk and provide feedback if requested by the principal
- Report observed life safety concerns to school principals or assigned representative immediately
- · Complete data entry and reporting

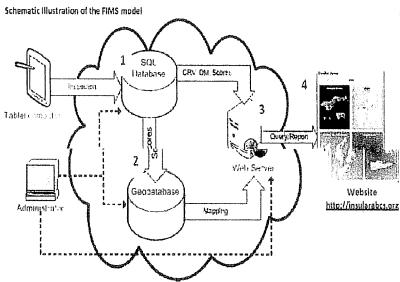

Phase II Report - August 2013

### 2.4 FIMS Design

The FIMS included laptops, tablets and cameras for data collection, GIS shapefiles to geocode referenced facility information, a relational database server to compile, store, and process data, and alwebsite to report findings. Access privileges for both entering and viewing information were developed to protect data integrity and safeguard insular area information.

### 2.4.1 Basic Database Structure

The FIVS database stores facility data and the score weighting. FCI, and DM algorithms used to calculate data summaries for reporting assessment findings. The system includes applications to capture, trick and report data to inform repair and replacement budgets and provide a foundation for possible IT-based facility management programs. The system is developed to support senior level managers' needs to report or funding and resource requirements and the surveyors' needs to efficiently record information.

### **Basic Components**

- Assessment data and other available facility data was gathered and uploaded to the SQL database via tablets and aptocs
- 2. Facility data was geo-referenced for map-based data viewing
- Query and reporting tools were developed to provide data summaries.
  - Data was made accessible to authorized users through a web interface.

### 2.5 Web Interface

The project website (<a href="http://insularabcs.ore/">http://insularabcs.ore/</a> was developed to provide data summaries of basic facility information queries to high level federal and insular area officials and more specific facility information and assessment data! is to facility managers. Database hierarchy is mirrored in the project webpages taking information summaries from the insular area to individual building levels. All pages identify hierarchy-specific OM totals, inventory CRV composite scores the number of buildings in each score range, and FCI est mares.

Insular Area and Island pages show regional system and school DM and FCI summaries. In addition to DM and FCI summaries, School pages provide graphical indications of builthing composite and system-level assessment scores. Additional school details are also provided.

But Iding pages Include DM and score summaries as well as elements assessed in each system, scoresig venicomments, and photos of deficiencies. Additional building details are also provided. Through the Building pages, facility managers can access element specific details to see where problems exist and review comments and protos.

Aerial maps on the School and Building pages [see image at right] provide color-coded score indications to give school district personner and facility imanagers a quick view of where problems exist by both building and system.

Website access permissions were developed to direct officials and facility management personnel to pages useful for their purposes to streamline web-browsing and screen area-specific information.

### Data Hierarchy

Home page view

Insular Areas

The home page (eft), provides a noll-up of all the insular area data for CIA use. Each insular area has access to its own page with associated data roll-ups at the school district, school (below), building and building systemleve.

Insular Schools: Assessment of Buildings and Classrooms

### 3 Insular Area Overview

This chapter provides a nightlevel overview of the K-12 school facilities and related matters in the insular areas.

The general lack of available data on facility inventory, school facility and campus standards, and funding metrics in the respective insular areas obscures existing programmatic and facility needs and impedes the ability to determine or track the effect veness of maintenance and repair (M&R) funding assistance. The lack of capital improvement project (CIP) planning in some areas also reduces facility management efficiency.

During the Insular ABCs surveys, it was observed that scrool district facility management personnel and maintenance staff were, by and large, committed to maintaining safe and secure facilities and educational environments for students, but varying levels of resources and experience creates challenges with maintenance programs and general practices.

### 3.1 Insular Area Comparison

Construction costs, school district management approaches and budgets, and demographics vary considerably across the insular school districts. The table below provides a general overview and comparison of the insular school inventory.

			Total SF1		Replacement
6-use: decouned unit circum	Schools	Buildings	(M)	Enrol ment	Cast* (\$N';

G.am²**	35	641	3.0	25,051	\$870
บรงา	32	344	2.5	15,192	\$606
Total	115	1,576	7.3	63,385	\$1,738

<sup>&</sup>quot;Het floor area based on room measurement:

### 3.1.1 Annual School District Budgets

Budget analysis was beyond the scope of the study, but information gathered during local engagement or supplemental project research was compiled to compare, at a gross scale, funding differences between insular areas.

	FY 2013	Gudgel	Budget
	Budget (SM)	\$/Student	\$/si
Am Samec	\$61	\$4,700	\$70
CNVI	\$61	\$6,064	\$68
Cuam	\$272	\$8,550	\$78
LSVI	\$210	\$13,799	\$83

### 3.1.2 CIP Planning and M&R Programming

The extent of C P planning, including capacity and construction metrics and dentification of basic facility standards, as well as long range goals and objectives, also varies considerably and is needed in American Samoal and USVI to define such matrics and establish goals and objectives.

Insular Area	Comprehensive	Track Yesped	Seek Tunding
-	CIP P anning	CIP Projects	as Yeesed
Am Samos	CHEST AND DESCRIPTION OF THE PROPERTY OF THE P	χ	
CNAI	Х		
Guam	`  X		,
JSVI			X

School CIP and M&R program organization varies by school district. The general model vests M&R responsibility with the school district, with CIP support services either solely provided by, or through shared responsibility with, the Public Works Department (DPW). Most of the districts have central office maintenance staff that support selected schools or building systems (e.g., plumbing, electrical, carpentry) and custodial staff at schools providing lighter-duty support. Generally,

step got themeskeenteed no pease"

<sup>\*\*\*</sup>Euliding len offment, and cost ligures for the 35 Minors: assessed (not col.) 40 public schools)

school principals are required to get dersonally involved in school maintenance oversight, which detracts from their primary responsibilities as school administrators.

The CNM Public School System is the most autonomous School District, handling all CIP planning and MSR internally or through consultant services. It also supports a seven-year CIP planning process which is undergoing its second revision. The Guam Department of Education is in the process of re-evaluating and updating its 1999 tem-year CIP plan. American Sannoa school CIP planning consists of a worsheet, providing a five-year projection of planned CIP projects, which is updated annually and submitted to the Governor for consideration in the annual budget process. It falls short of a comprehensive plan in that it lacks alvision statement, implementing politices, opportunities for public participation and engagement, and a clear articulation of facility needs and standards. USVI has a more limited school CIP planning process.

Guam DOE has recently moved to procuring its new schools through a design/build/operate/maintain program where the school district leases its new schools from a third party. It is also experimenting with outsourcing its CIP, M&R, custodial, and Joed preparation functions.

American Samoa DOE previously relied on its DPW for CIP and M&R services, but assumed M&R responsibilities some time ago in an effort to be more responsive to school needs. Based partly on reducing duplication and level of effort (the DOE and DPW both typically need to maintain M&R-related equipment and supplies), the new Apministration has proposed to move M&R responsibilities back to DPW as an efficiency measure.

USVI DOE maintains a close working relationship with DPW for CIP support. It operates the only multi-district system in the insular areas with a system wide, central maintenance office supporting the two separate school districts, each with dedicated maintenance staff.

Phase II Report - August 2013

School-based parent/teacher organizations provide important community support for minor school improvement projects. Current practices permit these organizations to undertake minor construction projects that may not mee, current code requirements and may lead to future problems. Policies are needed to provide structure and accountability for these types of projects.

Due to the aging physical plant, harsh coastal environments and chronic underfunding, all of the school districts' maintenance staff spend much of their time responding to trouble calls. These il mitations impact the school district's ability to focus on preventative maintenance programs, work order management systems, or training drograms and perpetuate the struggle to belance resources with needs. Annual MSII budgets are largely set by historic allocation trends, and are not based on empirical date or predictive Medycle modeling. Difficulty in tracking equipment and system records and warranties is also common and in some cases results in alsign from tioss of value.

Facility standardization provides is gnificant economies of scale for M&R programs and simplifies CIP programming. American Samoa adopted a standard 10-classroom, two-story concrete building, which is gradually replacing the 1960 stera concrete and wood fale classroom, reducing design and maintenance costs. ChiMi is pursuing a similar practice in developing new buildings based on plans from recent construction projects. USVI is in the process of standardizing its repair parts inventory (windows, doors, plumbing, etc.) to streamline replacement projects. Standardization efforts need to be supported and expanded.

12

### 3.1.3 Population and Enrollment Trends

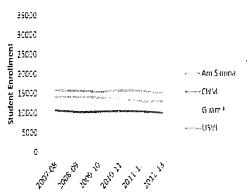

The insular areas experienced significant post-war growth as their conomies matured and air travel improved. In the pest occade however, all but Guam have experienced population declines (Guam +3%, USVI -2%; American Samoa -3%, CNIMI -22%; lasular average: -45%) Although overall population trends are not directly related to public school enrollment trends, for a number of reasons (e.g., age conorts, private school competition, etc.), they tend to track each other over time

To the extent this transition from decade-over-decade growth to stability and decline is more than a transitory phenomenon, the years of eaching school capacity may be transitioning to a period of school consolidation and replacement/renovation. Areas of localized growth and decline within each of the insular areas exist that require careful local analysis. For example, Guam is experiencing significant growth on its northern end and population decline in the south. While CNMI has experienced significant overall population decline, areas around Garapan and Tinian are growing. American Samoa is generally experiencing a population shift from the outer islands to the main island of Tutvilla.

On the margins, there is also interplay between public and private school enrollments. In Guam and American Samba, there is some shift from Public to Private schools while CMMI is experiencing the opposite trend.

Phase II Report - August 2013

### 5-Year Insular Area Enrollment Trend

\*Guant erroll ment for all 40 public schools

Over the last five years, American San oa public school enrollment has declined 8%, CMM lis down 6%, and USV is down 5%. Smilar to the population trend, Guam's public school student enrollment has increased 4% in five years.

The effects of these fluctuations are demonstrated in the school capacity charts presented on the following page.

Phase II Report August 2013

Insular Schools: Assessment of Buildings and Classrooms

### School Capacity Metrics<sup>3</sup>

# 35% 35% 49%

## **Elementary Schools**

Under Capacity (12)
 With r Range (38)
 Over Capacity (27)

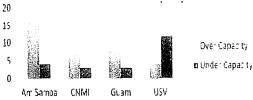

### Secondary Schools

Under Capacity (10)With a Range (11)Over Capacity (14)

Thirty-live percent of elementary schools (27 schools) and 40 percent of secondary schools (14 schools) were considered over capacity based on national gross area per student average ranges (Council of Educational Facility Planners). The Fewer were considered under capacity (see accompanying charts).

### Count of Under and Over Capacity Schools

<sup>&</sup>lt;sup>1</sup> Capacity estimated for 112 schools; Old Rote High (CNMI) was recently a cosed and enrollment figures were not available for Edith L. Williams Alternative Academy and Positive Connections Alternative (USVI).

### 3.1.4 Building Age

The average age of insular school buildings is approximately 40 years The insular Schools were generally constructed post WW-H in increments with the earliest in the 1950s and the latest in the 2000s - generally following the significant post war copulation growth experienced in the Insular areas. The main exception to this trend are the colonia -era buildings in the USVI inventory that are centuries old. Reinforced concrete buildings built in the '50s are often in relatively good condition compared to more recent, lightly-framed buildings, so building aga is not necessarily an accurate determinant of condition. There are no inherent I mits to how long a building can last, it decenas primarily on the level of consistent maintenance, but longevity is also a function of location (e.g., coastal exposed site vs. more protected in and site), construction materials and importantly, quality of construction. The insular areas are generally located in harsh, coastal environments with I mited capacity for preventative M&R programs, and buildings in many cases show the wear of time and climactic conditions

Older schools typically were planned following the "factory school" mode to git "fingers" of classificans, a multicurpose building like a calciforium, and an administrative building) that does not readly support current teaching models as effectively as more modern, open plan schools. So, in addition to age or physical condition of the building, functional obsolescence (i.e., the building's addity to support current and future use) is an equally compelling factor to consider in CIP planning.

<sup>&</sup>lt;sup>4</sup> Capacity estimate are based on gross square feet per student to nominally account for supporting facilities (e.g. branes, offices restrooms, cafeterias, auditoriums, and circulation).

Phase II Report - August 2013

### 3.2 Condition Assessment Overview

Building elements were rated based on observed conditions. These scores were used to estimate DM and FCI values and were assigned weights based on estimated element costs. Weighted scores were aggregated at the building and system levels for schools, islands, insular areas, and for all insular areas. Weighted scores for building assessed were grouped into ranges to summarize conditions.

### Distribution of School Buildings by Score

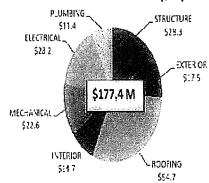

Score Ranges	Number of Buildings*				
5	14				
4.0 4.90	687	insular		ment Summa	ry
3.0 3.99	859	Score	H/S DM	Total DM	FCI
2.0 2.99	92	(1-5)	(\$M)	(\$M)	
1.0 - 1.99	18	3.9	\$17	\$177	12%
0.0 - 0.99	196				
Total	1,966				

<sup>\*</sup> notudes and flary structures in addition to inhabited buildings

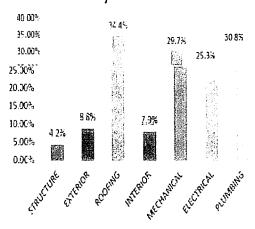

DM and FCI values were calculated and aggregated for all systems and buildings. Throughout all insular areas, roofing, mechanical (AC) and electrical systems were found to have the highest amount of DM. Ever though the plumbing system had relatively low DM costs, the estimated FCI values were relatively high, indicating relatively poor condition.

A general need for greater oversight during project bidding and execution to insure materials and installation specifications are met was reported by surveyors—particularly for roofing replacement and other repairs to building exterior enclosures.

# Deferred Maintenance (\$M)

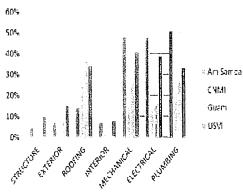

### **Facility Condition Index**

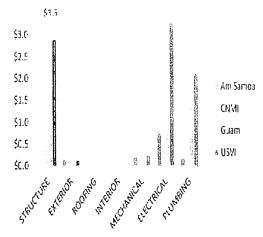

Phase II Report - August 2013

### System H/S DM by Insular Area (\$M)

### 3.2.1 Overview of Common Problems

Throughout all insular areas, fourteen assessed elements were centified that, based on assessment results commonly had relatively high FCIs (greater than 15 percent).

		DM				
Element	FCI	(SN')	A5	CVMI	Guam	USV
Intercom System - 12	1 0.750	cables class.		2.1.2.2.4.		,
Star ons	70%	\$3.5	X	X	X	Х
MEP Infrastructure	58%	\$3.4	Х	X	X	Х
Fire Alarm Command Center	41%	\$5.1	X	×		Х
Fuld Applied Rooting	40%	\$41.8	Х	×	X	Х
Gutlers	36%	\$0.6	Х		X	Х
Ductiess da split - air cod ed	32%	\$11.9	X		A	Х
Service Installation - 1,000 A	29%	\$9.4	X		X	X
Central ducted dx lair cooled	28%	\$7.5	X	х.	ĸ	Х
Roller Asphalt Roofing	27%	\$0.1		x	Х	X
F re Sprinklers	26%	\$15	χ	X	X	Х
5 ngle Phy Memorane - 60						
nr ls Booling	21%	\$0.3		X	X	X
Plumbing Fixtu es	21%	\$4.5	X		X	X
Security System	20%	\$0.8	X	X	X	
Fluorescent Lighting Fixtulles	19%	\$5.1	Х	X	χ	Х

FCIs for security and intercom systems were especially high because in many cases these were not present and full installation is required. Other relatively high FCI items include: failing roofing materials, underperforming air conditioning systems, MEP infrastructure, electrical service and lighting fixtures.

<sup>&</sup>lt;sup>5</sup> MEP infrastructure was used to account for the presence and costs of ancitary school utility buildings and equipment that serve more than one building (e.g. generators, water cistribution purios, water fair (s) that were not contured in the building inventory and assessment cost model and additional tems not included in element costing and assessment selections [e.g., kitchenhood fire suppression system]. Additional items to be added as specific element selections in further commode expansions.

### 3.2.2 Site Concerns

Site assessments (i.e., school grounds) were conducted, initially, to address flooding and drainage concerns at school with known drainage problems. Site assessments were expanded during early project planning to include roadways, parking lots, pedestrian paving, fances and gates, water supply, sanitary sewer, and storm sewer. Site conditions identified as health and safety issues and concerns commonly found are summarized below:

	Site Health and Safety Concern	5	Am 5amoa	CNMI	Guarn	USVI
	<ol> <li>Inadequate fire protection or or near campus</li> </ol>	7	X	X	X	X
	2. Lack emergency vehicle acce	155	X	Х	X	X
	3. Lack of backflow prevention	١	X	X	X	X
	4. Sewage backup or leaks	- 1		X	X	
	<ol> <li>Septicitant/leaching field concerns</li> </ol>		X	X	X	
	Redestrian hazards from pool vehicular circulation	ar	X			X
	7. nadequate perimeter		X			X
	fencing/gates					
	Other Common Issues					
1.	Lack site dra nage plans or angineering		X	Х		Х
2.	Inacequate dialnage system maintenance			Х	X	х
3.	Potable water system problems		X	X		
4.	Inadequate roadway signage, surfacing/maintenance		X			Х

In American Samoa, major regional needs were identified including regional drainage problems, requiring engineered site drainage solutions and large scale electrical infrastructure upgraces (existing conditions create serious safety concerns). Addressing these concerns through

Phase II Report - August 2013

major concerted regional projects and cross-departmental project planning is recommended.

Health and safety concerns identified by other disciplines (i.e., immediate safety hazards such as injury risk, electroducion hazards, or ser ous air quality concerns) are discussed in Chapter 4.

### 3.2.3 Building Structural Conditions

Structural deficiencies were relatively isolated and related to various building types; therefore, no single type of structural DM concern resulted in a relatively high FCI. While structural DM in all insular areas was relatively low, deficiencies were identified in all areas and should not be overlocked due to the costs and risks associated with deferring maintenance of structural components. Structural deterioration is primarily caused by corrosion of steel components, including steel reinforcing within concrete or masonry buildings, and termite damage or rot of wood framed components. Most of this deterioration is due to water infiltration or exposure to humid, salt-laden atmospheric conditions. Therefore, keeping water out of the interior end osure with well-maintained exterior wall and roof finishes and solation of stee components from the outside environment will prevent most structural deterioration. This will also eliminate wood decay and most termite activity.

The chart below provides an overview of structural deterioration based on building type for in each insular area and an indication of frequency of both the building types and the problems associated with each particular building type:

Phase II Report - August 2013

Each of the insular areas has been historically subject to relatively frequent hurricanes, typhoons or cyclones due to their tropical locations, and also earthquakes and tsunamis. Consequently, there are a high proportion of concrete and masonry buildings which are naturally resilient to extreme wind events. Building performance during earthquakes is largely dependent on the level of reinforcing in the walls and roofs. To evaluate reinforcing in typical buildings, "as-built" building plans were reviewed, as available, and a reinforcing scanner in the field was used on a sample of common building types. In general, most typical building types have at least a minimal level of reinforcing. Where there is light frame wood or light gauge steel construction, it is gellerally equipped with up lift ties.

A cursory structural building code assessment was done for common building types. Vost building types were found to have at least some reinforcing for resisting lateral loads and ties for resisting high wind up ift forces. However, the historic unreinforced stone masonry buildings found in USYI were identified to be the most deficient compared to current building standards. These buildings are well-built, and proven to be resilient over the decades, but are expected to be vulnerable to a large earthquake given the level of seismorty in the region. It is recommended that further structural assessments and probable nationity occupied and historically-significant buildings.

Some light framed buildings in various insular areas, had questionable load paths between the walls and roots and questionable wind uplift capacity and further structural investigation warranted. However, because occupancy is expected to be a greater concern during an eartinguake than a wind event, addressing the seismic vulnerability of the unit enforced stone masonry buildings in USVI is a higher prior by concern.

Phase II Report – August 2013

Insular Schools. Assessment of Buildings and Classrooms

3.2.4 Indoor Environmental Quality Recommendations Indoor Environmental Quality (IEQ) assessments for each school were prepared by the team architect to identify conditions that may be adversely affecting the health and academic performance of students. Based on pre-established assessment criteria, the team evaluated instructional spaces with regard to four environmental parameters:

- Thermal Comfort
- Indoor Air Quality
- Visual Comfort/ Lighting
- Accustics

These parameters are identified in green out ding research findings as major determinants of occupant performance. The assessment criteria were informed by current green building literature including methods established by the US Environmental Protection Agency for K-12 schools (Draft K-12 School Environmental Health Program Guidelines, February 2012), as we has guidelines for designing quality learning spaces using natural lighting.

At every school, each classroom building or building type was evaluated to identify adverse conditions that might negatively impact the student earning environment. Some conditions recorded were due to building design, campus site layout, school programming or scheduling, or environmental issues, while others were often due to localized incidents.

In recoonse to disserved conditions, a list of suggested actions to mitigate those conditions was developed. The suggested actions can largely be addressed a it of school district operations and maintenance funds that have been proven to directly benefit student performance, and include minor projects such as relamping, fan repair/upgrades, mold resistant paints, modest window repair and maintenance, or larger projects such as improvements that would increase the level of natural daylighting or ventilation, etc. These are generally readily achievable abrolects that will

jumpstart the ABCs Initiative (i.e., identify lower cost, interim fixes that provide immediate benefit—out don't replace the need for a robust and well planned M&R program). The chart below crovides an overview of the types of problems that were observed in each insular areas and indication of frequency.

### 3.2.5 Energy Audit Recommendations

Finergy Audits for each of the insular schools were prepared by the team's mechanical and electrical engineers. The general methodology followed

a hybrid of ASHRAE "Level 1" and "Level 2" energy audits. The Level 1 audit is refer ed to as a "walk-through audit" and is the basic starting point for building energy optimization. In the hybrid approach used, the building's energy cost and efficiency were also assessed by analyzing energy and water/sewer bills and using data collected during on-site building surveys. Once the Jield data and utility information were used to determine the approximate breakdown of utility consumption by major use category, a list of potential energy conservation measures (ECM's) for each school was developed. The fists of ECM's vary from low cost measures to capital investment measures and well based on observed existing conditions at each school. An energy analysis was also performed to estimate the energy savings for each measure. Cost estimates for each ECM were then developed based on current RS Means data and marked up to include taxes, lees, and local labor rates. A simple payback of 10 years or less was used as a metric to cetermine if each ECMI is financially attractive. The availability of trained maintenance staff and resource adequacy should be considered before implementing ECVIs.

Walk-through surveys included interviews with school administrators, maintenance/janitorial staff to provide information about fact trees that may not be easily observed. School operation hours and occupancy were collected during the interviews. Baseline modeling was approached at the school level and not by building. Historical utility usage was cased on an average of the previous 2-3 years' worth of data if available. Electricity

Energy analys's conducted for the audits showed that water/sewer and power consumption rates and costs vary greatly between insular areas as summarized below.

and water utility rates were based on an average of the most recent year.

Phase II Report - August 2013

rsular Area	yr √W/ sf/	Annual Electric B II (\$M)	kGal/ person/ yr	Arnua Water Bill (\$M)	Total Utility Costs (SM)

### 4.1 American Samoa Overview

4 Insular Area-Specific Findings

The overall American Samoa school facility score is 3.7 (on a scale of 1.5). Schools are 40 years old on average. Site surveys occurred following completion of ARRA? -funded facility improvements (e.g., roof repairs, painting, etc.). Key problems include electrical infrastructure, gutters and drains, regional drainage problems, if ooding school grounds and buildings, wehicular/pedestrian circulation hazards, carking I mitations, emergency vehicle access, and fire protection (i.e., ack of proximate fire hydrants).

### Site Concerns

Cost est mates for Site deficiencies were outside of the Phase I scope. In lieu of cost estimates, namelive lists were compiled to bring attention to major and common Site deficiencies identified during surveys. Major Site concerns identified include:

- 1. Inadequate fire plotection on or near campus
- 2. Lack of entergency vehicle access
- 3. Pedestrian hazards from non-delineatea readways, fall hazards
- 4. Lack of per meter fencing/gates
- 5. Lack of regular septic tank maintenance (overflow reported)
- 5. Lack of backflow prevention for potable water system.
- 7. Lack site are nage plans (including regional drainage issues).

Other Common ssues included

- 1. Inadequate roadway surfacing and maintenance
- 2. Tack of roadway access signage
- 3. Lack designated pick up/drop off areas
- 4 Lack student play areas (some sites)
- 5. Perimeter fencing absent or in poor condition

### 4.1.2 Collateral Findings

Site concerns in American Samoa were great relative to other insular areas and should be seriously considered in regional and cross-departmental project planning. Major needs identified by school surveyors include the need for regional drainage improvements and large scale electrical infrastructure upgrades. Regional drainage problems exist in many valleys and low lying areas, where many of the schools are sited in these cases, drainage issues cannot be rectified with only onsite improvements. Underground drainage system installation is warranted in some cases. The need for electrical upgrades is addressed in many of the

Phase II Report - August 2013

electrical health and sofety concerns captured in the survey data. Addressing these concerns through major concerted regional projects is advisable.

In many cases, inadequate planning when adding new structures to schools was observed resulting in site congestion, obstructed natural ventilation, vehicular circulation impacts, and site drainage problems. School site plans do not exist and are needed for facility siting.

Many schools are on or near the shoreline and vulnerable to tychool or tsunomi impacts. Accelerated building material deterioration occurs near the ocean due to high concentration of sait in the atmosphere. This was a greater problem in American Sampa than in other insular areas, primarry due to the close proximity of buildings to the ocean.

The predominance of gable and hip roof structures in American Semos school buildings (i.e., well sloped roofs) appeared to result in less water related structural damage than observed in the other itsular areas (which had a higher proportion of flat roof structures). However, breach of the interior enclosure can also occur forough cracks or openings in the walls, which leads to deterioration of corrodible components. Facilities in salty coastal environments are particularly vulnerable to moisture infiltration.

Replacement of termite damaged members and ancholage of root components for cyclones is needed in some cases. It was observed that opportunities to undertake these retrofits were missed during recent reroofing projects (for some light framed roofs). It is noted that these retrofits appear to be regular practice and were observed in other cases.

### 4.2 CNMI Overview

The overal facility score is 4.3 (or a scale of 1-5) for CNM. Public School System (PSS) facilities. Schools are 35 years old on average. Surveys occurred fellowing completion of ARRA-funded facility improvements (e.g., roof repairs, painting, etc.). Key problems include weather croofing, inadequate natural ventilation, emergency vehicle access, fore protection (including the hydrant provision), and site dramage.

### Site Concerns

Cost estimates for Site deficiencies were outside of the Phase II scope. In lieu of cost estimates, narretive lists were compiled to bring attention to major and common Site deficiencies identified during surveys. Major Site concerns Identified include:

- Inadequate fire protection distribution and storage on or near campus
- 2. Lack of emergency vehicle access
- Sewage backup; malfunctioning septicition (/ eaching field (pumped regularly))
- 4. Lack of backflow prevention for cotable water system
- 5. Non-potable water supply fed from fire hydrant (two schools)

### Other Common issues included

- Inadequate site crainage engineering including: missing, degraded, or inadequate swales, ditrines, culverts, drainage system, and/or detention basins.
- Regular maintenance of drainage systems, retention pasins, drainage ditches, swales, and culverts is repulred.

Phase II Report - August 2013

### 4.2.2 Collateral Findings

CNMI public school facilities are primarily constructed with concrete Structurally, concrete buildings generally perform well if a waterproof enclosure is maintained. Most problems observed stem from water cenetration of roof or wall components. Flat roof structures with carabets or those that rely on maintenance of a drainage system are more susceptible than naturally drained sloped roof structures. Wood and matal buildings tend to be more susceptible to deterioration due to termite or water damage and corrosion.

During the Phase I assessments, surveyors observed an on-going project and determined that the fluid-applied roofing material being used was mappropriate, and identified instances where this material failed in a short time period. Material and process specification requirements and review practices are needed to encourage repair project adequacy.

The common gractice of oulding single story buildings using flat roofs with inadequate drainage and reinforcing projecting out of the roof for future second story expansion, leads to pending issues, deterioration of the roofing materials and deterioration of the concrete roof structure. The roofing of these types of buildings needs to be sloped appropriately. When reroofing, exposed reinforcing should be eliminated or protected

Reroofing of light-framed roofs needs to include replacement of termine damaged members and typhophian chordage of roof components. This was observed to have happened for past projects, but was not evident in all recent reroofing projects.

School site plans do not exist and are needed for facility siting.

Phase II Report - August 2013

### 4.3 Guam Overview

The overall facility score is 4.0 (on a scale of 1.5) for Guarn Department of Education (DDE) facilities. Schools are 40 years old on average. Surveys occurred just crion to commencement of ARRA-funded facility improvements (e.g., roof repairs, electrical upgrades, painting, etc.). Five of Gram's 40 prioric schools are leased by GDDE; surveys excluded these schools. \*\* Key problems include noot slope, weatherproofing, corroding rebar, spalled concrete, freshiair provision, emergency years eleacess, fire crotection (including fire hydrant provision), and site drainage.

### Site Concerns

Cost est mates for Site deficiencies were outside of the Phase I scope. In lieu of cost estimates, narrative lists were compiled to bring attention to major and common Site deficiencies identified during surveys. Major Site concerns identified include:

- Inadequate fire protection distribution and storage on or near campus
- 2. Lack of emergency vehicle access
- 3. Sewage leaks or backup
- 4. Malfunctioning septic tank/ leaching field (cumped regula ly)
- 5. Lack of backflow prevention for potable water system.
- 6. Field equipment deteriorated and unsafe

Other Common ssues included:

 Regular maintenance of drainage systems, retention basins, drail age ditches iswales and culverts is required. Phose II Report - August 2013

### 4.3.2 Collateral Findings

Guarr DDE has experienced several major changes in the past 20 years including the standup of US Department of Defense Education Activity (DDDFA) schools in the late 1990's and development of a number of new, leased schools in the early 2000's. There is a so increasing enrollment pressure from private schools. The opening of DDDEA schools resulted in a drop in student enrollment and the loss of "DDD Impact Aid" assistance funds. Based in part on a 2009 study (Evergreen Solutions, LLC), Guarr DDE has initiated a review of its school maintenance programs and is evaluating opportunities to outseurce some of its internal functions. These initiatives need to be encouraged and dovetail will in the recommendations of this report.

Guam public school facilities are primarily constructed with concrete. Shucturally, concrete buildings generally perform well if a waterproof enclosure is maintained. Most problems observed stem from water penetration of roof or wall components. If at roof structures with parapets or those that rely or maintenance of a prainage system are more susceptible than naturally drained sloped roof structures. Wood and metal buildings tend to be more susceptible to deterioration due to termite or water damage and corrosion.

### 4.4 USVI Overview

The overall facility score is 3.6 (an a scale of 1-5) for U.S. Virgin Islands Department of Education (VIDE) facilities. Key problems include corroding rebar, spalled concrete, deteriorated wood elements, weatherproofing, air quality concerns, plumbing leaks, exposed electrical elements, vehicle circulation, emergency vehicle access, fire protections (including fire hydrant provision), and site drainage.

Phase II Report - August 2013

FCI, or the DM cost percentage of full replacement, can help identify major deficiencies. Based on assessment results, approximately 25 percent of elements rated had FCI's above 15 percent and are considered to have a high FCI. High FCI elements are summarized in the table below.

High FCI Elements:

Element	Estimated DM (\$M)	Estimaled FCI
Fire Alarm Command Center	54,532	107%
MEP Infrastructure <sup>12</sup>	\$2.007	72%
EFIS Coating	50.434	72%
Ductless dx splil - air cooled AC	\$4.634	61%
Steel Joists & Slab	\$1,250	578
Central Chilled Water - water cooled AC	\$0,C)4	535
Fire Sprintlers	\$0.257	50%
Fluid Applied	\$7. <b>£</b> )1	435

### Site Concerns

Cost estimates for Site deficiencies were outside of the Phase II scope. In ieu of cost est mates, narrative lists were compiled to bring attention to major and common Site deficiencies identified during surveys. Major Site concerns identified include

- Inadequate fire protection distribution and storage on or near cambus
- 2 Lack of emergency vehicle access
- 3. Lack of packflow prevention for optable water system
- Poor traffic access and circulation (parking/pick up drop off areas)

### Other Common issues included

- Iso ated site drainage and flooding grobiems (concrete swale/regrade/drainage system maintenance)
- 2. Asphalt and concrete pavements in poor condition
- Parking and roadway marking/s gnage in poor condition or absent
- Perimeter fencing and student play areas absent or in poor condition

### Phase II Report - August 2013

### 4.4.2 Collateral Findings

A general need for greater oversight during project cidding and execution to insure materials and installation specifications are met was reported by surveyors—particularly for roofing replacement and other exterior enclosure repairs. Abandoned AC equipment is compromising exterior enclosures. Roadway aschalt and concrete beings are in poor condition throughout the area.

In several cases, inadequate planning when adding new structures to schools was observed, resulting in site congestion, obstructed natural ventilation, vehicular circulation impacts, and site drainage problems. School site plans do not exist and are needed for facility siting.

Phase II Report - August 2013

### 5 Work Products

Phase II of the insular ABCs Initiative included the transfer of information gathered in the study, including facilities inventorly and condition data, and a recommended implementation plan for next steps to insular area and OIA officials as appropriate.

### Overall Delivery Schedule

The following chart provides a summary of the various reports and brickings presented as part of the Phase II process.

### 5.1 Reports

Reports and assessment data were transferred to School District descended as data compilation and processing was completed. Initial reporting was provided by the survey team through on-site verbal updates and more formally during kickoff chiefs and out chiefs for each insular area.

A workbook for each insular area was compled in tially as a means to vet draft findings with School District SVEs, and later as a repository of insular area-related information. School District comments were incorporated into reports before final zing trem. The workbooks provide contextual background and narrative descriptions of assessment in itigs to add depth to data compiled and reported on the website, and will be an enduring legacy of the Phase initiative. Workbook contents include.

- Narrative Condition Assessment Summaries
- IEQ Assessments
- Energy Audits
- Principal Questionnaires
- · Presentations (Insular Area Kickoffs Gut briefs)
- Condition Assessment Criteria
- Database reports
- Cost Mode Documentation
- School Site Plans

The project website (<a href="http://insularaccs.org">http://insularaccs.org</a>) eroy design insular area, island, school, building and building system level inventory condition, and cost information through weighted scores, DM totals, and ECI calculations as well as a repository for the insular workcooks. School district personnel can have gate through the website at various.

<sup>&</sup>lt;sup>17</sup> Access to the "summary of all insular areas" cage where summaries of all the insular areas are complied, is limited to CIA, insular areas officials each have access to their own information.

levels of the hierarchy and track associated DM cost and health and safety issues.

The "database reports" provided in the workbooks and downloadable from the website, are immediately useful to facility managers and include special zed reports summarizing a variety of topical data including

- L. Health and safety concerns
- 2. DM priorities (items with high FCI)
- 3. Insular area, island, school, and building reports

These reports will assist facility managers in identifying high priority needs and developing DM backlog reduction strategies.

### 5.2 FIMS Transition

The workbooks and webs te provide each of the territories with the detailed inventory and condition data as well as documentation of the cost model and condition assessment criteria used in the Phase II assessments. Excel tables included in the workbooks and the drill-down capacility in the website provide school facility planners the information they need to access Phase II data. OIA will continue to host the FIMS and will extend editing privileges to each of the territories as part of Phase III (see related discussion in Chapter 6)

Phase II Report – August 2013

Phase II Report August 2013

### 6 Implementation Plan

OIA and the insular areas need to continue to work together to Implement the recommendations of this report to improve the physical condition of insular area schools and transition the school districts to sound, adequately-funded preventative school maintenance programs. The following implementation plan should be considered notional and subject to change in distussions with each insular area. It provides general recommendations for OIA and the insular areas to follow and substantially accomplish insular area leadership to develop strategies for accomplishing these goals. The "cartnership" requires both OIA and the insular areas to engage by committing staff and dedicated funding, over a period of years, and elevating the concern to a high level of executive importance. The recommended implementation plan focuses on two key areas:

- Removing the DM backlog, resolving site deficiencies, and implementing the IEQ and Energy Audit recommendations
- Transforming school facility management to Industry Standard maintenance programs – to prevent the DM backlog from reoccurring

Each insular area needs to take max mum advantage of the awareness created by the Phase II report to recruit other partners and investors who share the same view – that the physical condition of insular area schools must be improved.

A general scope and timeframe for each task in the implementation plan is summarized below. A notional implementation scredule is provided at the end of this chapter. An initial three-month pre-planning/consultation period will provide time to firm up individualized implementation schedules for each insular area, based on its particular needs and requirements. A final report would be issued at the end of the initiative to document findings, lessons learned, and needed follow-on actions.

### 6.1 Remove DM Backlog/ Implement Report Recommendations

Removing the DM backlog is the most important recommendation of this report as it is fundamental to improving the condition of insular area schools. It is recommended that OIA and the insular areas establish a five-year timeframe to substantially remove the backlog. Establishing prior ty ists and strategies for addressing and correcting health and safety-related DM should be undertaken as a first step. Resolving school site deficiencies identified in the Phase Treport (e.g., site drainage pavement conditions, fencing, etc.), particularly health and safety-related problems, is a critical garallel recommendation. Implementing the range of short term, low cost initiatives out ined in the IEQ assessments, largely with existing operational funding, is also imperative because it will immediately improve the student learning environment and overall student performance. Implementing energy and trecommendations will lead to significant utility bill savings and a more sustainable, secure energy infrastructure. These initiatives are described below within the context of a long range CIP plan for public schools - a pre-requisite to addressing the DM backlog, site deficiencies, IEQ, and energy measures This section is subdivided into four distinct topic areas:

- Develop/update comprehensive CIP plans
- Develop strategies to prioritize and implement DM Backlog, Indoor Environmental Quality improvements, and Energy Conservation Measures
- Develop strategies to define, prioritize, and implements te infrastructure improvements
- · Execute plan recommendations

6.1.1 Develop/Update Comprehensive CIP plans

Long Range CIP plans are important not only to articulate local or orattes and strategies for addressing immediate and near-term repair needs, but

also for mapping out higher-level facility management considerations (e.g., decisions regarding school or building replacement or relocation, functional obsolescence in building design, closures, consolidations, new construction, regional needs, adaptation to changing teaching models, use of online/distance learning tools, decisions regarding outsourcing (i.e., privatization of) functions like maintenance and food service, and of critical importance, adoption of comprehensive facility standards to ensure equity and an objective context for priority setting). CIP clain development/revision is considered a pre-requisite to repair and other DM reduction efforts because it will inform facility investments and prevent undue expenditures in under-used, heavily deteriorated or out dated facilities. CIP plans help capture facility expansion or consolidation just fications, memorialize facility standards, and document facility adequacy in meeting existing and future requirements.

Infrastructure and utility support systems are an important element of a comprehensive CIP plan. Technical input provided through the process described in Section 6.1.3 should feed into the overall CIP planning process to ensure a comprehensive and well integrated plan.

The CIP planning process will rely on both objective D M data to identify major and common problems and deeper consideration of assessment indings to identify broader issues. CNMI and Guam have a history of supporting long range planning and CIA may be able to leverage these initiatives. American Samoa and CSVI need to develop long range planning programs and have a more fundamental need in this area.

Major projects undertaken should include a pre-installation assessment survey of relevant facilities to verify appropriate project definition, extents and budgets. New projects should include funding for associated infrastructure upgrades and ensure that M&R oudgets will adequately address maintenance and support of new yinstalled material and

Phase II Report - August 2013

equipment (e.g. electrical distribution upgrades as needed for new air conditioning systems, smart boards and computer station projects.)

Timelrame: Months 4-18

#### 6.1.2 DM Backlog, IEQ, and ECM Strategies

General awareness of the magnitude of DM backlogs through the publication of this report will raise political awareness and consensus towards resolving school condition issues. As part of the Comprehensive CIP plan process, an action-or ented process needs to be developed to prioritize DM backlog investments and immediately implement IEQ recommendations. Facility standardization efforts already underway need to be formalized and expanded

A DV cacklog investment strategy needs to be developed in each territory from a comprehensive perspective to focus on the highest priority areas (i.e., health and safety, specific schools, programs, systems, etc.) that can only be identified through the comprehensive planning process discussed above. A filtering process separating the larger, CIP-type projects from routine maintenance and repair projects needs to be undertaken early on, including identification of those projects that need to be implemented immediately. In composing strategies to address DM and IEQ concerns, facility planners can utilize FIMS database reports and workpook information to identify schools, buildings, systems or possibly building elements with major concerns, and prioritize action.

The Energy Audits identify substantial annual energy and water bill cost saving potential through a variety of energy conservation measures (e.g., renewable energy initiatives, HVAC upgrades, enhanced maintenance procedures, etc.). OIA can provide consultant services to assist each insular area in developing and arioritizing a comprehensive ECM investment strategy. It can also use its status to attract national and international developer interest, potentially broadening the investment

portfol o by including multiple school districts, thereby achieving scale economies not available to the individual school districts

Timeframe: Months 4-15 (in parallel with the CIP plan task)

#### 6.1.3 Site Improvement Strategies

Followion studies need to be initiated to develop the general Site assessment problems identified in Phase II into a prioritized list of defined and budgeted site imprevement projects. This needs to be done following a filtering process similar to that discussed in Section 6.1.2 (e.g., separating larger, CIP-type projects from routine maintenance and repair projects), with health and safety-related projects taking priority. This would typically include preparation of infrastructure master plans to prioritize and guide investment decisions.

Timeframe: Months 4-15 (in parallel with the CIP plan task)

#### 6.1.4 Execute Plan Recommendations

To further assist the insular areas, CIA can also provide technical support to execute the fast tracking of DM/ EQ/ECM projects by providing consulting services to develop work orders, design documents, cost est mates, system assessments, as well as project oversight/contract administration services. These roles and responsibilities would need to be closely integrated with existing DOE/DPW functions to ensure a seamless management framework.

All major projects undertaken should include a proper post-instal ation performance verification to ensure that the design objectives are being metiand to provide feedback for modifications, if necessary.

Timeframe: Months 16-57

Phase II Report - August 2013

#### 6.2 Initiate M&R Program Improvements

The second most important recommendation of this report is to prevent further DM accumulation. The best way to do this is through improving the efficiency and effectiveness of local M&R programs.

Three main steps are recommended

- Program Improvements
- Standup FIMS Inventory and assessment database and support transition to an enterprise asset management (EAM) system and provide related training and support if deemed appropriate and supportable by local officials
- · Periodic facility re-assessment to monitor progress

#### 6.2.1 Program Improvements

Systemic change is needed immediately to prevent DM back og from reoccurring (reducing the DM backleg without changing the underlying reason why it occurs does not meet initiative goals). An EAM (enterprise asset management) system should be instituted in the territorial facilities offices to support and monitor progress of the five-year implementation plan, to help track assets and expected economic useful life, submit and manage repair work orders, and organize repair and maintenance efforts. Introducing the EAM is an important technological step but at the same time, maintenance program procedures and programs need to be realigned to a creventative maintenance model based on modern building science (e.g., predicted failure rates, economic useful life, building reserve funds, etc.). Foremost is the need for insular area eaders to create a heightened awareness of the value of building maintenance as an important government function.

t is recommended that OIA use its assistance programs to help the insular areas institute this change through provision of consulting services and funding temporary staff positions, and reserving 5 to 10% of its aroual funding to support M&R programs (OIA currently reserves 5% in

American Samoa which is matched by a local fuel tax). Although each insular area is different in the way it approaches M&R programs, there are sufficient similarities to warrant development of common resource materials, including maintenance procedure manuals.

A critical first step is to deploy embedded facility maintenance teams in each district to support DM reduction/site improvements/IEQ/ECM in tiatives as well as support internal change and process improvement. To the extent they can meet pre-defined job qualifications, it's recommended that embedded staif be recruited locally. The embedded teams would also support an effort to prepare cost practice manuals for school district maintenance staff (e.g., everything from AC system maintenance procedures to review of standard specifications and eversight in project bidding and construction) and school principals who interact with maintenance and custodial staff and Parent-Teacher/self-help organizations (e.g., instructions on how to maintain school culvents and drainage ways, guidelines for self-help projects, etc.).

At a larger scale, an assessment of each insular area's M&R program is necessary to determine the optimal configuration and budgets, based on local conditions. This needs to be conducted as an extension of the EIMS/EAM deployment and would therefore engage insular area.

departments beyond education. Key criteria in the assessments would be cost effectiveness and overall value based on best practices and industry standards. The assessment would require the insular areas to stand up a working committee of relevant agency representatives (e.g., Governor's Office, DOE, DDW, IT, etc.) to engage in several workshoos to vet and prior tize organizational options, as well as support information requests related to the evaluation. Major outcomes would include recommendations for dedicated, adequate, annual funcing, associated staffing levels and general organization, and an annual review process to ensure continuous improvement.

Timeframe: Year One

Phase II Report - August 2013

#### 6.2.2 FIMS and Migration to an EAM System

The FIMS data model developed in the Phase II initiative <sup>4</sup> provides a web-viewable relational database, geocoded facility inventory, condition ratings, cost algorithm, and DM bost reporting capability that can serve as the core of a facilities management database. It provides OIA with the croad overview it needs to track the physical condition of insular area schools. Coupled with re-assessments, it can also assist the insular areas to track progress in reducing DM backlog, provide information for facilities planners to develop work orders and assist in the local budgeting process.

The FIMS can also serve as the basis of a more robust enterprise asset management (EAM) system that includes planning, programming, audgeting and work order management tools. A variety of EAM systems are in use in school districts across the country to improve capital asset management in ways that increase reliability, enhance predictive maintenance, ensure regulatory compliance, reduce energy usage, and support sustainability initiatives. The EAM software evolved from computerized maintenance management systems that focused on establishing and tracking preventive maintenance schedules (e.g.,

monthly quarterly and annual maintenance budgets and schedules based on economic useful life of building systems) and work order management software to budget and track service requests (from the Principal's desk to the school district facility manager). An EAV system can also assist with

- 1 SQL data base server
- Datasplice (data entry sortware)
- 3 ESR: Chine GIS maps
- 4 Web hosting

As currently designed, FIMS system expenses, not not ding hardware, cost approximate y \$1,200 per month, and include

capital plan creation, capital budget and expenditure analysis, building system automation (e.g., electrical, mechanical, and alarm), equipment monitoring and general inventory management (e.g., custodial, mechanical, technology, and food service). Expanded EAM capacity includes the ability to store and retrieve building system and equipment warranties, supplie is and vendor pricing information, contracts, automated purchase orders and tracking and reporting on energy consumption data relative to preset benchmarks. Upgrading to an EAM system will be particularly important to support the 5 year implementation plan. The ability to easily track work order status, for example, is critical to developing a cost effective and efficient system.

EAMS

• Work order management

• Preventative maintenance management

• Building system and equipment automation

• Capital planning assistance and

• Inventory management

Phase II Report - August 2013

Organizational change at the Cabinet level will be required to support this technological transition; the Governor's Office, IF, Public Works, Education and perhaps other insular area agencies will need to collaborate, share resources and take ownership. The insular areas should take advantage of DIA's grant programs to support this change ranging from providing consulting services, equipment ould lease and funding temporary staffipositions to help implement program enhancements.

Timeframe: Months 4-15

#### 6.2.3 Periodic Facility Re-assessment

This task is critical to monitoring the success of the ABCs in tiative. GIA is encouraged to directly or indirectly support this process through its access to consultant services. Two re-assessments are recommended in the first five years of implementation:

- First re-assessment to begin in the middle of year three as part of the EAM implementation, providing a mid-point condition update and an opportunity to acliect additional lab is as data or condition status.
- Second re-assessment is scheduled to occur at the end of the
  project execution phase to validate that all projects have been
  completed and that the DIV Backlog and other projects have
  been addressed.

Timeframe: Years 3 and 5

## EXHIBIT B

# PROTEST OF REQUEST FOR PROPOSALS

### PROJECT NO. 730-5-1056-L-YIG

Lease Financing For Design, Renovation, Rehabilitation, Construction and Maintenance of Public Schools (Beginning with Simon Sanchez High School)

February 8, 2017

#### VIA HAND DELIVERY

FEB U 8 2017

Mr. Glenn Leon Guerrero Director GUAM DEPARTMENT OF PUBLIC WORKS 542 North Marine Corp Drive Tamuning, Guam 96913

Re: PROTEST OF RFP FOR PROJECT NO. 730-5-1055-L-YIG

Dear Mr. Leon Guerrero:

Core Tech International Corp. ("Core Tech") hereby gives notice that it protests the method of procurement in the Request for Proposal process for the Lease Financing for Design, Renovation, Rehabilitation, Construction and Maintenance for Public Schools (Beginning with Simon Sanchez High School), Project No. 730-5-1056-L-YIG (the "RFP"). A copy of the RFP is marked and attached hereto as **Exhibit 1**. This protest is made pursuant to 2 GAR Div. 4 §9101.

#### 1. THE RFP FAILS TO INCLUDE COST AS AN EVALUATION FACTOR

The Department of Public Works was authorized to solicit Requests for Proposals by the Ma Kåhat Act of 2013, Public Laws 32-120 and 32-121, which enacted 5 GCA Chapters 58D and 58E, respectively. Pursuant to the Ma Kåhat Act of 2013, the Department of Public Works ("DPW") was required to issue an RFP in compliance with the Ma Kåhat Act of 2013 and Guam procurement law. DPW was required to base its selection on "the proposal that delivers the best value for Guam in meeting the objectives of the education agency." See 5 GCA §58D105 & §58E103 (emphasis supplied). The RFP further states that "[t]he proposal that delivers the best value for Guam in meeting the objectives of the Department of Education is determined by the evaluation criteria and negotiation phase of the procurement process." See, RFP at §2.0.

In order for the evaluation committee to determine which proposal "delivers the best value for Guam" mandated by §§58D105 and 58E103, and §2.0 of the RFP, the evaluation committee must review and evaluate price or cost of the project. Despite the requirement to consider value, DPW excluded the cost of A&E design fees, development fees, construction costs, and any other related costs, from the Evaluation Criteria in its Request for Proposal. See, Section 5.3 of the RFP.

Core Tech previously raised this issue with DPW over a year ago. In order to avoid delays and to correct what appears to be an error with the RFP, on January 27, 2017, Core Tech submitted Request for Information to DPW regarding this very issue:

1. Title 5 GCA §58D105, part of the Ma Kahat Act of 2013 which governs this procurement directs that "[t]he selection of a contractor shall be based upon the proposal that delivers the best value for Guam in meeting the objectives of the education agency." 5 GCA §58D 105. A "best value" determination involves a comparison of evaluation criteria including relative pricing, as "best value" cannot be determined without some comparison of pricing. The Request for Proposals ("RFP") does not include pricing as one of the evaluation criteria. See, §5.3, RFP. Section 2 of the RFP states that "[t]he proposal that delivers the best value for Guam in meeting the objectives of the Department of Education is determined by the evaluation criteria and negotiation phase of the procurement process." §2.0, RFP. Because the evaluation criteria for the ranking of offerors do not include pricing, the exclusion of the consideration of relative pricing in the evaluation phase is inconsistent with the statutory requirement that the contractor shall be selected on a best value basis. Please clarify how relative pricing will be used as an evaluation criterion in the ranking of offerors in the evaluation phase to compliant with the Ma Kahat Act of 2013.

See, Request for Information at 1 (January 27, 2017) attached hereto as **Exhibit 2**. DPW has not yet responded to Core Tech's Request for Information.

The legislative directive that the selection of a proposal be based on "best value" incorporates a procurement method, the "best value" method, which is commonly understood to involve consideration of technical and price factors to determine the offer of the greatest value to the government.<sup>2</sup>

The "best value" method of selection requires a consideration of the cost or price of the offer. Under federal regulations, for example, cost or price must be considered in a "best value" procurement in conducting the "trade off" between price and qualitative technical factors.

<sup>&</sup>lt;sup>1</sup>DPW was made aware of this issue over a year ago when Core Tech raised it in its January 7, 2016, protest. DPW denied Core Tech's January 7, 2016 protest on timeliness grounds without addressing the merits of the protest.

<sup>&</sup>lt;sup>2</sup> See, e.g., Rochester City Lines, Co. v. City of Rochester, 868 N.W.2d 655, 658 (Minn. 2015) ("Best-value bidding, as described by the FTA, is a procedure by which the award of a government contract depends on 'which proposal represents the 'best value' [based] on an analysis of the tradeoff of qualitative technical factors and price or cost factors.' U.S. Dep't of Transp., Third-Party Contracting Guidance, FTA Circular 4220.1F, VI–10 (Nov. 1, 2008, rev. Mar. 18, 2013) (hereinafter 'FTA Guidance'); see also Sayer v. Minn. Dep't of Transp., 790 N.W.2d 151, 156 (Minn.2010) (recognizing that the 'best-value process differs from the lowest responsible bid process in that it allows public agencies to consider factors other than cost when awarding contracts').").

The FAR notes that "[t]he objective of source selection is to select the proposal that represents the best value." 48 C.F.R. § 15.302. In determining which proposal represents the best value, the government must compare the relative costs and benefits of the competing proposals, including both price and non-price factors, in a best-value tradeoff analysis:

This process permits tradeoffs among cost or price and non-cost factors and allows the Government to accept other than the lowest priced proposal. The perceived benefits of the higher priced proposal shall merit the additional cost, and the rationale for tradeoffs must be documented in the file in accordance with 15.406.

Id. § 15.101–1(c). The FAR sets forth specific requirements for a best-value tradeoff analysis, see id. § 15.101–1, and sets forth a different set of requirements for a lowest-price technically acceptable procurement, see id. § 15.101–2.

Firstline Transportation Security, Inc. v. United States, 100 Fed. Cl. 359, 374 (Fed. Cl. 2011).

This understanding of the meaning of "best value" is also articulated in the Guam Procurement Regulations pertaining to the selection of contracts. Title 2 GAR § 3119(c)(1) directs, in relevant part:

The objective when selecting a contract type is to obtain the <u>best</u> <u>value</u> in needed supplies, services, or construction in the time required and at the lowest cost or price to the territory. <u>In order to achieve this objective, the Procurement Officer, before choosing a contract type, should review those elements of the procurement which directly affect the <u>cost</u>, time, risk, and profit incentives bearing on the performance.</u>

Among the factors to be considered in selecting any type of contract are:

- (A) the type and complexity of the supply, service, or construction item being procured;
- (B) the difficulty of estimating performance costs such as the inability of the territory to develop definitive specifications, to identify the

risks to the contractor inherent in the nature of the work to be performed, or otherwise to establish clearly the requirements of the contract . . .

#### 2 GAR § 3119(c)(1)(emphasis supplied).

Rendering a determination of "best value" without including price or cost as an evaluation factor is clearly not possible. As the United States Comptroller General stated in *Matter of Cyberdata Technologies, Inc.*, B- 406692, 2012 CPD P 230, 2012 WL 3574015 (Comp. Gen., August 8, 2012), "a best value analysis necessarily encompasses consideration of an offeror's price or cost since, to be meaningful, a best value determination requires a weighing of the value and benefits associated with a firm's approach against their associated cost to the government." 2012 WL 3574015, at \*4. The Comptroller General explained that "[i]n a best value procurement, it is the function of the source selection authority to perform a tradeoff between price and non-price factors, that is, to determine whether one proposal's superiority under the non-price factor is worth a higher price. Even where, as here, price is stated to be of less importance than the non-price factors, an agency must meaningfully consider cost or price to the government in making its selection decision." *Ibid.* 

In the prior RFP for procurement under the *Ma Kahat Act of 2013*, Request for Proposal process for the Lease Financing for Design, Renovation, Rehabilitation, Construction and Maintenance for Public Schools (Beginning with Simon Sanchez High School), Project No. 730-5-1055-L-YIG, issued on June 15, 2015 (the "2015 RFP"), the Evaluation Committee failed to consider cost as an evaluation factor for proposals. *See*, §5.3, 2015 RFP, Addendum 6. *See*, *Addendum 6, 2015 RFP*, attached as **Exhibit 3**.

During the hearing on Core Tech's appeals to Office of Public Auditor in September 2016, the Department of Education produced an internal April 19, 2016 Memorandum ("DOE Memo") prepared by Mr. Randy Romero, the Capital Improvement Specialist with DOE. The DOE Memo discusses the concept how "best value" criteria is achieved in government procurement. See, DOE Memo attached hereto as **Exhibit 4**. DOE is the end user of this procurement, and based on the testimony and evidence adduced at the September 2016 OPA hearing, has far more experience in procurement than DPW. The DOE Memo explained DOE's position and understanding of the how "best value" was to be determined in Government Procurement:

### BEST VALUE AS DEFINED BY THE FEDERAL ACQUISITION REGULATION (FAR)

#### FAR Subpart 2.1—Definitions

"Best value" means the expected outcome of an acquisition that, in the Government's estimation, provides the greatest overall benefit in response to the requirement.

#### THE LAW DICTIONARY DEFINITION OF BEST VALUE:

When the best benefit comes from a tradeoff of price and performance.

#### General Definition:

- Greatest overall benefit in response to the requirement.
- Price and Performance balance
- Under the framework of total cost of ownership (TCO)

Id. at CT9-0004 - CT9-0005.

The DOE Memo also referred to the Federal Acquisition Regulation for guidance on government contracting and the "best value" process:

#### GOVERNMENT PROCUREMENT LAW & LEGAL DEFINITION OF BEST VALUE:

Federal procurement offices have recognized that the process takes a toll on small businesses as well. In 1995, Congress passed the Federal Acquisitions Reform Act, which arranged for a two-phase process of contract awarding in which the agency office selects a limited group of bidders based on their qualifications and general approach to the project, then examines detailed proposals from those "short listed" bidders, choosing the ultimate winner on a "best value" basis. The "best value" method calls for ranking proposals based on the scores each receives for a list of different items that are laid out in the solicitation document. The purchasing agency may award the contract after this evaluation, or it may discuss proposals with those considered competitive and then permit the short listed bidders to submit their best and final offers.

The use of "best value" and "performance-based" evaluations as a means of deciding on a winning bidder has begun to supplant the exclusive use of the lowest bidder as the deciding factor. Agencies at local levels have increasingly followed the lead of federal offices in this shift. As mentioned above, "best value" calls for ranking various proposals on a whole range of criteria and selecting the winner based on all those factors, not just price. "Performance-based" contracting, on the other hand, is an arrangement wherein the contract defines the required performance standards for the project but leaves it up to the contractor to devise the means of accomplishing the task in accordance with relevant laws. Several procurement policymaking agencies in the federal government, including the Office of Federal Procurement Policy, have touted performance-based contracting as superior to traditional low-bid contracting in every way, including cost, service, and delivery time.

Clearly, the determination of "best value" requires consideration of cost or price. The Ma Kahat Act of 2013 requires that selection of an offeror shall be based upon the proposal that delivers best value. It does not provide for best value to be ignored during the evaluation of the proposals, and only to be considered during the negotiation process. Without considering cost as a factor in the evaluation of proposals, it would be impossible to assess which proposal provides the Government with "best value." A determination of "best value" without trading off cost and other technical factors would open the door to awards of contracts without considering the prices offered by other offerors in conjunction with other criteria. It would allow ranking of proposals based purely on technical criteria without taking into consideration the ultimate cost to the Government and, by extension, taxpayers. The RFP in its current version does not comply with the mandates of 5 GCA §58D105 and §58E103 requiring selection based on "best value" to the Government.

Because the RFP does not include as an evaluation factor the offeror's price or cost e.g., development fees, and soft and hard construction costs, it violates Guam Procurement Law and the mandate in 5 GCA §58D105 and §58E103 that the evaluation be based on the "best value" to the Government. Selection based on this flawed evaluation criteria would be invalid and the RFP should be amended to comply with Guam law.

#### 2. THE RFP FAILS TO FOLLOW THE REQUIREMENTS OF 5 GCA 58E

Core Tech raises another issue with the RFP concerning the requirements under 5 GCA 58E regarding the maintenance of 34 other public schools. Specifically, §58E103 contains different requirements for soliciting work to be performed for the maintenance of the 34 remaining public high schools:

#### § 58E103. Identification of Projects and Procurement.

Under the Superintendent of Education's direction, the education agency <u>shall</u> utilize the Program Study, and the report generated by the Department of Interior (DOI)-funded assessment report by the Army Corps of Engineers, to identify and prioritize potential projects to be completed. The list of projects <u>shall</u> be included in a Request for Proposals developed by the education agency. Upon receipt of the Program Study, the Superintendent of Education <u>shall</u> solicit Requests for Proposals (RFP) through the Department of Public Works, in compliance with the Guam Procurement Law, for the financing, design, construction and rehabilitation of the education facility, according to the needs of the education agency and consistent with this Chapter. The choice of the contractor <u>shall</u> be made by a selection committee comprised of the Superintendent of the Department of Education, serving as Chairman, and including the Director of the Department of Public Works or Deputy Director, the Director of the Department or Deputy Director,

the Administrator of the Guam Environmental Protection Agency or Deputy Administrator, and the Administrator of the Guam Economic Development Authority or Deputy Administrator. The committee *shall* assess the prior performance of the contractor on similar projects, and *shall* be free to disqualify any contractor that *does not* have a successful record of project completion on Guam.

The selection of a contractor *shall* be based upon the proposal that delivers the <u>best value</u> for Guam in meeting the objectives of the education agency.

The RFP shall be issued within thirty (30) days after the receipt of the <u>Program Study</u> for the design, renovation, rehabilitation, construction or maintenance of the education facility.

5 GCA §58E103 (emphasis supplied).

First, Section 58E103 specifically requires that a DOE Program Study, which is separate and distinct report from the Army Corps of Engineers Report ("ACE Report"), be completed and included in the RFP. Furthermore, the RFP shall provide "the list of projects" derived from the DOE Program Study and ACE Report. *Id.* The RFP does not contain a list of projects and there is no evidence of or reference in the RFP to the DOE Program Study required under §58E103.

Second, §58E103 requires "the selection of a contractor *shall* be based on the proposal that delivers the best value for Guam in meeting the objectives of the education agency." As discussed above, the RFP requires consideration of best value in the evaluation criteria. *See, RFP* at §2.0. The RFP must include price or cost as factor in the Evaluation Criteria to comply with the requirement that *selection* of an offeror *shall* be based upon the proposal that delivers best value.

Instead, DPW is piggybacking the selection of a contractor for the solicitation of the maintenance work on its selection of a contractor for the Simon Sanchez project, as laid out in 5 GCA §58D. This procedure does not comply with the law. To comply with §58E103, DPW must (a) coordinate with the Department of Education to obtain a program study if one has not been completed, (b) include the list of projects in the RFP, and (c) include price or cost in the evaluation criteria to determine best value.

AN ACT TO ADD A NEW CHAPTER 58D TO TITLE 5. GUAM CODE ANNOTATED, RELATIVE TO THE RENOVATION OR CONSTRUCTION OF A NEW SIMON SANCHEZ HIGH SCHOOL; AND TO AMEND AND RENUMBER § 22425(q) OF ARTICLE 4, CHAPTER 22, DIVISION 2, TITLE 5, GUAM CODE ANNOTATED. RELATIVE TO THE APPROPRIATION ADDITIONAL REAL PROPERTY TAX REVENUES FROM THE REVALUATION OF REAL PROPERTY TAXES; AND TO AMEND § 53101 OF TITLE 17, GUAM CODE ANNOTATED, RELATIVE TO THE EARLY CHILDHOOD PROGRAM FUND.

1	BE IT ENACTED BY THE PEOPLE OF GUAM:			
2	Section 1. Title	. This Act shall be cited and referred to as the "Ma Kåhat		
3	Act of 2013."			
4	Section 2. A ne	w Chapter 58 D is hereby added to Title 5, Guam Code		
5	Annotated, to read as follows:			
6	"CHAPTER 58D			
7		MA KÅHAT ACT OF 2013		
8	§ 58D101.	Title.		
9	§ 58D102.	Legislative Findings and Policies.		
10	§ 58D103.	Definitions.		
11	§ 58D104.	Authorization to Enter Into Long-Term Leases.		
12	§ 58D105.	Procurement.		
13	§ 58D106.	Responsibilities of Contractor.		
14	§ 58D107.	Assignments.		
15	§ 58D108.	Use of Tax-Exempt Bonds for Financing.		
16	§ 58D109.	Pledge of Additional Revenue from the Real Property		
17		Valuation.		
18	§58D110.	Utilities and Routine Maintenance and Repair.		
19	§ 58D111.	Maintenance Fund.		
20	§ 58D112.	Contractual Safeguards.		
21	§ 58D113.	Severability.		
22	§ 58D101.	Title. This Act shall be known and shall be cited as "Ma		
23	<i>Kåhat</i> Act o	f 2013."		
24	§ 58D102.	Legislative Findings and Policies. I Liheslaturan		
25 <sup>1</sup>		at Simon Sanchez High School faces the combined		
26	challenges of deteriorating conditions, out of date design, and overcrowding.			
27	These combined deficiencies impair the quality of teaching and learning and			

contribute to health and safety problems for staff and students. It should be noted that it is critical for the Guam Department of Education to develop a comprehensive capital improvement plan to provide a roadmap for prioritizing facility improvements beyond Simon Sanchez.

I Liheslatura finds that after reviewing the summary of outstanding General and Limited Obligation debts as of March 1, 2013, that the debt ceiling assessed value is at One Billion One Hundred Thirty Nine Million Four Hundred Sixty Four Thousand Eight Hundred Fifty Three Dollars (\$1,139,464,853). It also states that the General Obligation Debt is Four Hundred Forty Six Million Four Hundred Seventy Three Thousand Eight Hundred Fifty Three Dollars (\$446,473,853); and the Limited Obligation Debt is Six Hundred Sixty Three Million Eight Hundred Ninety Six Dollars Thousand Eight Hundred Three (\$663,896,803), with an accumulated total of One Billion One Hundred Ten Million Three Hundred Seventy Thousand Six Hundred Fifty Six Dollars (\$1,110,370,656). Subtracting the debt ceiling limit less the General and Limited Obligation Debts leaves the amount for future debt obligation at Twenty Nine Million Ninety Four Thousand One Hundred Ninety Seven Dollars (\$29,094,197).

I Liheslatura further finds that the cost for the renovation or construction of a new Simon Sanchez High School would exceed Guam's debt ceiling obligation cap if a General Obligation Bond is pursued. To circumvent the debt ceiling cap, I Liheslatura finds that the construction of Okkodo High School, Astumbo Middle School, Liguan Elementary School, Adacao Elementary School, John F. Kennedy High School and the expansion of Okkodo High School validates the fundamental soundness of using a municipal lease as a vehicle to build new educational facilities. By utilizing municipal leasing to renovate or construct a new Simon Sanchez

High School, the remaining future debt obligation may be used to fund other priorities of the government.

I Liheslatura further intends to authorize I Maga'lahen Guåhan to pledge or reserve the additional proceeds as a source of payment for a municipal lease financing, secured for the purposes stated herein, either to renovate or construct a new Simon Sanchez High School. To overcome the financing hurdles, I Liheslaturan Guåhan supports the government of Guam to enter into a contract for the financing, design, renovation or construction and long-term capital maintenance of Simon Sanchez High School with a private sector contractor who can provide long-term obtained through tax-exempt obligations or other financing competitive alternative financing based on long-term lease-backs to government of Guam. In order to facilitate system-wide improvements, I Liheslatura shall authorize the Guam Department of Education to develop a comprehensive capital improvement plan for prioritizing capital improvements to all Guam Department of Education schools. To facilitate the financing, design, renovation or construction and maintenance of an education facility envisioned by this Act, the government of Guam will be authorized to lease, for up to thirty (30) years, government of Guam property on which the facilities will be constructed to the contractor, who will design, renovate or construct a new education facility in accordance with specifications approved by Guam Department of Education. The education facility and land will be leased back to the government of Guam for a period not to exceed thirty (30) years or the initial ground lease to the contractor over which time the government of Guam will amortize, as lease payments to the contractor, the cost of the financing, design, renovation or construction

and related expenses of the education facility. The contractor will also be responsible for the capital maintenance of the education facility constructed under this Act, which costs shall be paid by the government of Guam, as provided for under this Act. At the expiration of the lease-back period, the government of Guam real property and the education facility that is renovated or constructed on the government of Guam real property will revert to the government of Guam with no further obligations to the Contractor.

Definitions. For purposes of this Chapter and unless § 58D103. otherwise specified, the following words and phrases are defined to mean:

- Act means Chapter 58D of Title 5, Guam Code (a) Annotated, known as the "Ma Kåhat Act of 2013."
- Comprehensive capital improvement plan means a plan that takes into consideration the physical condition of each school, along with attendance area population, enrollment patterns, and bussing logistics. It shall also include how each school meets the instructional needs of GDOE and prioritizes repairs of existing schools, and renovation and construction of new school facilities in order to deal with GDOE limited resources.
- Contract shall mean the various design, renovation or construction and financing agreements entered into by and between the education agency and the contractor following negotiations on the response to the Request for Proposal.
- Contractor shall mean the authorized entity which shall (d) be the signatory on the Contract and shall be fully responsible for carrying out the design, renovation or construction, financing and maintenance of the education facility. The contractor may cooperate

with another entity or entities in any manner the contractor deems appropriate to provide for the financing, design, renovation, construction or maintenance of the public school facilities envisioned by this Act.

- (e) Education agency shall mean the Guam Department of Education.
- (f) Education facility as used in this Act, shall mean the renovation or construction of a new high school, and to include its athletic facilities to be located on the existing site of Simon Sanchez High School.
- (g) Lease shall mean a lease from an education agency to the contractor entered into at the time of the contract for the property.
- (h) Lease-back shall mean the lease from the contractor to the education agency.
- (i) Lease-back period shall mean the term of the lease from the contractor to the education agency.
- (j) Property shall mean any property on which an education facility is located.
- § 58D104. Authorization to Enter Into Long-Term Leases. For the purpose of facilitating the financing of the design, renovation or construction and maintenance of an education facility encompassed by this Act, the government of Guam or an education agency, as the case may be, is authorized to lease, if required, to the contractor sufficient government of Guam real property on which to renovate or construct a new education facility; *provided*, such property is in the inventory of the education agency or the government of Guam. The property may be the site of an existing education facility under the control of an education

agency, which existing facility may be renovated or demolished and rebuilt under the provisions of this Act. The education agency is also authorized to lease back from the contractor the property for a period mutually agreed upon between the education agency and the contractor as may be reasonably necessary to amortize over the lease-back period the costs associated with the financing, design, renovation or construction of the education facility. In no event shall the end of such lease-back period be later than the date thirty (30) years from the scheduled date of completion of the education facility. The lease-back may be structured as an annually renewable lease with provision for automatic renewals to the extent that pledged or reserved revenue under \\$22425(q)(4) and (6) of Title 5, Guam Code Annotated, is available. The lease-back shall not be construed as a debt under any applicable debt limitation under the Guam Organic Act or Guam law.

§ 58D105. Procurement. Subject to the approval of *I Liheslaturan Guåhan*, the government of Guam or an education agency *shall* solicit Requests for Proposals (RFP) through the Department of Public Works, in compliance with the Guam procurement law, for the development of the comprehensive capital improvement plan, the financing, design, renovation or construction of the education facility, together with insurance and maintenance of the education facility over the lease-back period, according to the needs of the education agency and consistent with this Chapter. The choice of the contractor *shall* be made by a selection committee comprised of the Superintendent of the Department of Education, serving as Chairman, and including the Director of the Department of Public Works or Deputy Director, the Director of the Department of Land Management or Deputy Director, the Administrator of the Guam Environmental Protection Agency

or Deputy Administrator, and the Administrator of the Guam Economic Development Authority or Deputy Administrator. The committee *shall* access the prior performance of the contractor on similar projects and may disqualify any Contractor that does not have a successful record of project completion on Guam.

27

The selection of a contractor *shall* be based upon the proposal that delivers the best value for Guam in meeting the objectives of the education agency.

The RFP *shall* be issued within thirty (30) days of enactment of this Act for the renovation or construction of a new Simon Sanchez High School on the existing site, which may include demolition of such portions of the existing facility as necessary.

Responsibilities of Contractor. § 58D106. The contract shall require that the contractor will work with GDOE to develop the comprehensive capital improvement plan in connection with the design of a renovated or construction of a new Simon Sanchez High School. Further, the contractor shall be responsible for all costs, expenses and fees of any kind or nature, associated with the design, civil improvements, on-site and off-site infrastructure, construction, permits, and financing associated with the completion of an education facility, including the financing of furniture and equipment for the education facility, as, and to the extent, provided by the education agency in the Request for Proposals. The contract will also require that all major subcontracts be covered by a performance bond; and further, that there be a specific delivery date with liquidated damages for failure to deliver the school by the specified date. The contractor shall also be responsible for the capital maintenance of the schools during the lease-back period, but shall not be

responsible for the capital maintenance of the furniture and equipment. The lease-back may provide that if sufficient funds are *not* appropriated or otherwise available for the payment of amounts due under the lease and any maintenance agreement, the education agency will have the obligation to vacate the education facility, and the contractor *shall* have the right of use and occupancy of the education facility for the remainder of the term of the lease, *unless* new mutually satisfactory terms are entered into. For this purpose, the lease may provide that its term shall be extended for a period *not to exceed* the shorter of ten (10) years beyond the original term of the lease-back or such period of time as is necessary to repay in full any financing arranged pursuant to § 58D108. The capital maintenance costs *shall* be paid by the education agency on a periodic basis as incurred by the contractor on terms to be agreed to in the contract for the education facility.

§ 58D107. Assignments. To facilitate the purposes of this Act and to provide security for the holders of any financing instruments issued pursuant to this Act, the contractor may assign, without the need of the consent of the education agency, the contract, the lease, and the lease-back to any underwriter, trustee, or other party as appropriate, to facilitate the issuance of the tax-exempt obligations, other financial instruments or alternative financing for the education facility.

§ 58D108. Use of Tax-Exempt Bonds for Financing. To minimize the financing cost to the education agency, financing utilized by the contractor to fund the design, renovation or construction of an education facility *shall* be through tax-exempt obligations or other financial instruments, provided, such financing is available at interest rates

determined by the education agency to be reasonable and competitive. Alternatively, the contractor may use an alternative method of financing, including, but *not* limited to, a short term debt, mortgage, loan, federally guaranteed loan or loan by an instrumentality of the United States of America, if such financing will better serve the needs of the people of Guam. Such alternative financing *shall* be approved by *I Liheslaturan Guåhan*. The purpose for the requirements of this Section is to assure the education agency pays the lowest possible interest rate so that the cost to the education agency of financing the design, renovation or construction of an education facility, amortized through the lease-back payments from the education agency to the contractor, will be lower than regular commercial rates.

Pledge of Additional Revenue from the Real Property § 58D109. Valuation. Rental payments under the lease and the lease-back may be secured by a pledge or other reservation of revenues received by the government of Guam pursuant to §22425(q)(4) and (6) Article 4, Chapter 22 Division 2, Title 5, Guam Code Annotated. Any amounts pledged as provided in this Section are hereby continuously appropriated for the purpose of making lease-back payments, but any amounts only reserved as provided in this Section, and not pledged, shall be subject to an annual appropriation for the purpose of making lease-back payments. Any such pledge or reservation authorized hereunder shall be valid and binding from the time the pledge or reservation is made, and shall be limited to the sum of Five Million Fifty One Thousand Nine Hundred Seventy Seven Dollars and Ninety Eight Cents (\$5,051,977.98) per year during the lease-back period, as outlined in §22425(q)(4) and (6) of Title 5, Guam Code Annotated, hereof. The revenues pledged or reserved and thereafter received by the government

of Guam or by any trustee, depository or custodian *shall* be deposited in a separate account and *shall* be immediately subject to such reservation or the lien of such pledge without any physical delivery thereof or further act, and such reservation or the lien of such pledge *shall* be valid and binding against all parties having claims of any kind in tort, contract or otherwise against the government of Guam or such trustee, depository or custodian, irrespective of whether the parties have notice thereof. The instrument by which such pledge or reservation is created need not be recorded.

§ 58D110. Utilities and Routine Maintenance and Repair. The education agency *shall* be responsible for the connection and payment of all utilities, including without limitation, power, water, sewer, telephone and cable, and all routine interior maintenance and repair and exterior groundskeeping and landscaping, and upkeep of the education facility.

§ 58D111. Maintenance Fund. The contract or a separate maintenance agreement with the contractor, and the lease-back, *shall* provide that all capital maintenance of the education facility be performed by the contractor as a separate cost, the terms of which, and the manner for establishing the amount of payment, *shall* be determined as a part of the contract; provided, however, that said documents may, at the discretion of the education agency, provide that capital maintenance with respect to equipment (including collateral equipment), onsite utilities, offsite utilities, access roads and other similar improvements need not be performed by the contractor.

§ 58D112. Contractual Safeguards. Prior to undertaking the work of renovating or constructing a new Simon Sanchez High School, the Guam Economic Development Authority, the Department of Public Works, the Guam Department of Education, and the developer or contractor shall

1 negotiate and enter into a binding construction contract to renovate or 2 construct a new Simon Sanchez High School in accordance with the Guam 3 Building Code (21 G.C.A. Ch. 67), and any other applicable requirements. 4 The construction contract shall contain contractual obligations typically 5 found in government of Guam construction contracts, including, but not 6 limited to: 7 (a) warranties; 8 (b) liquidated damages: 9 performance and payment bonds; (c) 10 (d) indemnity; 11 (e) insurance; 12 (f) standard specifications; 13 (f) technical specifications; 14 (g) progress schedule; 15 (h) maintenance: 16 (i) compliance with Guam labor regulations; 17 compliance with Guam prevailing wage rates for (i) employment of temporary alien workers (H2) on Guam; 18 19 compliance with Public Law 29-98: restriction against (k) contractors employing convicted sex offenders to work at government 20 21 of Guam venues. 22 The contract shall be submitted for review and approval to all entities 23 charged by law with the duty to review and approve government contracts, including the Office of the Attorney General. 24 25 § 58D113. Severability. If any provision of this Act or its application to any person or circumstance is found to be invalid or contrary 26

to law, such invalidity shall not affect other provisions or applications of this

27

1 Act which can be given effect without the invalid provisions or application, and to this end the provisions of this Act are severable." 2 3 §22425(q) of Article 4, Chapter 22, Division 2, Title 5, Guam Section 3. 4 Code Annotated, is hereby amended to read: "(q) Notwithstanding any other provision of law, any additional real 5 property tax revenues received as a result of the most recent valuation of real 6 property due to commence during the calendar years 2013 and 2014 is 7 8 hereby continuously appropriated annually, not to exceed Eight Million Five Hundred Thousand Dollars (\$8,500,000), from the Territorial Educational 9 10 Facilities Fund in the amounts and for purposes set forth in this Subsection: 11 The sum of One Million One Hundred Fifty Eight (1)12 Hundred Eighty Three Dollars (\$1,158,283), Thousand Two beginning in FY 2014, for the construction of the Student Services 13 14 Center and Engineering Annex at the University of Guam, as a source of payment to the University of Guam Capital Improvements Fund for 15 the purpose of paying rental payments due under the lease-leaseback 16 agreements with the University of Guam Endowment Foundation for 17 a term of forty (40) years; 18 19 The sum of Two Hundred Seventy-eight Thousand Nine (2)20 Hundred Twenty-one Dollars and Fifty-two Cents (\$278,921.52), beginning in FY 2014 for forty (40) years, for the construction or 21 22 renovation of Building 100 and the DNA Laboratory at the Guam 23 Community College; 24 The sum of One Hundred Thirty-two Thousand Fifteen 25 Dollars (\$132,015) to the Guam Public Library System to hire a

Territorial Librarian at Ninety-three Thousand Three Hundred

26

Seventy-seven Dollars (\$93,377), and a Computer Analyst II at Thirty-eight Thousand Six Hundred Thirty-eight Dollars (\$38,638);

- (4) The sum of One Million Seven Hundred Seven Thousand Six Hundred Fifty-two Dollars (\$1,707,652) to the Guam Department of Education for the renovation or construction of a new Simon Sanchez High School.
- (\$1,200,000) for rental payments under the lease and the lease-back as described in Chapter 58D of Title 5, Guam Code Annotated.
- (6) other than the portions designated to be used for in Items (1), (2), (3), (4) and (5) of this Subsection, eighty percent (80%) of the remaining balance for rental payments due under the lease-leaseback agreement with GDOE secured for the renovation or construction of a new Simon Sanchez High School, to include its athletic facilities, and other Guam Department of Education public school facilities requiring new construction, rehabilitation or maintenance;
- (7) other than the portions designated to be used for in Items (1), (2), (3), (4) and (5) of this Subsection, 3.5% of the remaining balance for the Early Childhood Program Fund, as described in §53101 of Title 17, Guam Code Annotated;
- (8) other than the portions designated to be used for in Items (1), (2), (3), (4) and (5) of this Subsection, 3.5 % of the remaining balance for *I Famagu'on-ta*, Child Adolescent Services Division of the Guam Behavioral Health and Wellness Center, and Project *Karinu*. These funds shall not be subject to *I Maga'lahen Guåhan's* transfer authority.

- (9) other than the portions designated to be used for in Items (1), (2), (3) (4) and (5) of this Subsection, five percent (5%) of the remaining balance to the Department of Revenue and Taxation for the following:
  - (A) for maintenance support and sustainability of real property data and system;
  - (B) for the five (5) year (quinquennial) property tax revaluation as mandated by law;
  - (C) for enhancements, and technological advancements related to software/hardware, and support staff necessary to improve electronic services; and
  - (D) for other costs directly associated with improving the efficiency of the real property tax system.

The Director of the Department of Revenue and Taxation *shall* submit a report to *I Maga'lahen Guåhan* and *I Liheslaturan Guåhan* on a monthly basis as to the expenditures of the funds following the enactment of this Act, detailing all transactions;

(10) other than the portions designated to be used for in Items (1), (2), (3), (4) and (5) of this Subsection, five percent (5%) of the remaining balance *shall* be lock boxed for the procurement of a unified financial management information system, as recommended by consensus from the Department of Revenue and Taxation, the Department of Administration, the General Services Agency, the Office of Public Accountability, the Office of Technology, the University of Guam, the Guam Community College, the Guam Department of Education, and Guam Memorial Hospital Authority. This amount shall be subject to legislative appropriation.

(11) Other than the portions designated to be used for in Items (1), (2) (3) (4) and (5) of this Subsection, three percent (3%) of the remaining balance *shall* be a source of funding for island-wide school bus shelters. The Director of the Department of Public Works *shall* submit a report to *I Maga'lahen Guåhan* and *I Liheslaturan Guåhan* on a monthly basis as to the expenditures of the funds following enactment of this Act, detailing all transactions."

**Section 4.** §53101 of Title 17, Guam Code Annotated, is hereby *amended* to read as follows:

"§ 53101. Early Childhood Program Fund. There is hereby created, separate and apart from all other funds of the government of Guam, a fund known as the "Early Childhood Program Fund." All monies received by or on behalf of the government of Guam pursuant to §22425(q)(7) of Title 5 GCA, *shall* be deposited in the Fund and used for early childhood programs at the University of Guam, the Guam Community College, or the Guam Department of Education. The Fund *shall not* be commingled with the General Fund or any other funds of the government of Guam, and it *shall* be maintained in a separate bank account. All monies in the Fund *shall* require legislative appropriation, and *shall not* be subject to any transfer authority of *I Maga'lahen Guåhan*."

Section 5. Severability. If any provision of this Act or its application to any person or circumstance is found to be invalid or contrary to law, such invalidity shall not affect other provisions or applications of this Act which can be given effect without the invalid provisions or application, and to this end the provisions of this Act are severable."

AN ACT TO *ADD* A NEW CHAPTER 58E TO TITLE 5, GUAM CODE ANNOTATED, RELATIVE TO THE FINANCE, DESIGN, RENOVATION, REHABILITATION, CONSTRUCTION OR MAINTENANCE OF PUBLIC SCHOOLS.

#### 1 BE IT ENACTED BY THE PEOPLE OF GUAM:

- Section 1. A new Chapter 58E is hereby added to Title 5, Guam Code
- 3 Annotated, to read as follows:

4 "CHAPTER 58E

I	THE FINANCE, DESIGN, RENOVATION,
2	REHABILITATION, CONSTRUCTION OR MAINTENANCE OF
3	PUBLIC SCHOOLS
4	§ 58E100. Legislative Findings and Intent.
5	§ 58E101. Definitions.
6	§ 58E102. Authorization to Enter into Long-Term Leases.
7	§ 58E103. Identification of Projects and Procurement.
8	§ 58E104. Responsibilities of Developer/Contractor.
9	§ 58E105. Contractual Safeguards.
10	§ 58E106. Assignments.
11	§ 58E107. Pledge of Revenues.
12	§ 58E108. Use of Tax-Exempt Bond and Other Financing
13	Instruments for Financing.
14	§ 58E109. Utilities, Maintenance and Repair.
15	§ 58E110. Severability.
16	§ 58E100. Legislative Findings and Intent. I Liheslaturan
17	Guåhan finds that Guam public school facilities face deficiencies in its
18	roofing, exterior, interior, structural, mechanical, electrical, plumbing, and
19	school grounds, which create a non-conducive environment that hinders
20	learning and the work and production of teachers and students.
21	I Liheslaturan Guåhan finds that the Guam Department of Education
22	is about \$90 Million behind on maintenance projects for the island's public
23	schools, according to a report commissioned by the Department of the
24	Interior in 2012, and recently submitted to the Guam Department of
25	Education in August 2013.
26	It is, therefore, the intent of I Liheslaturan Guåhan for the
27	government of Guam to use one quarter of the business privilege tax to pay

for the interest payments of the lease and lease-back as a form of bridge financing until the maturity of the Business Privilege Tax bond series 2013C.

I Liheslatura finds that after reviewing the summary of outstanding General and Limited Obligation debts as of March 1, 2013, that the debt ceiling assessed value is at One Billion One Hundred Thirty Nine Million Four Hundred Sixty Four Thousand Eight Hundred Fifty Three Dollars (\$1,139,464,853). It also states that the General Obligation Debt is Four Hundred Forty Six Million Four Hundred Seventy Three Thousand Eight Hundred Fifty Three Dollars (\$446,473,853), and the Limited Obligation Debt is Six Hundred Sixty Three Million Eight Hundred Ninety Six Thousand Eight Hundred Three Dollars (\$663,896,803), with an accumulated total of One Billion One Hundred Ten Million Three Hundred Seventy Thousand Six Hundred Fifty Six Dollars (\$1,110,370,656). Subtracting the debt ceiling limit less the General and Limited Obligation Debts leaves the amount for future debt obligation at Twenty Nine Million Ninety Four Thousand One Hundred Ninety Seven Dollars (\$29,094,197).

I Liheslatura further finds that the cost to fund the rehabilitation of the public schools will certainly exceed the debt ceiling obligation if a general obligation bond is pursued. To circumvent Guam's debt ceiling cap, I Liheslatura finds that the construction of Okkodo High School, Astumbo Middle School, Liguan Elementary School, Adacao Elementary School, John F. Kennedy High School, and the expansion of Okkodo High School, has demonstrated the fundamental soundness of using municipal lease as a vehicle to build new educational facilities. By making the most of municipal leasing to rehabilitate and construct Guam public schools, the remaining

future debt obligation may be used to fund other priorities of the government.

§ 58E101. Definitions. For purposes of this Chapter and unless otherwise specified, the following words and phrases are defined to mean:

- (a) Comprehensive capital improvement plan means a plan that takes into consideration the physical condition of each school along with attendance area population, enrollment patterns, and bussing logistics. It shall also include how each school meets the instructional needs of GDOE, and prioritizes repairs of existing schools and renovation and construction of new school facilities in order to deal with GDOE limited resources.
- (b) Contract shall mean the design, renovation, rehabilitation, construction, and financing contract entered into by and between the education agency and the contractor chosen by the Guam Economic Development Agency and approved by I Liheslaturan Guåhan.
- (c) Contractor shall mean the authorized entity which shall be the signatory on the contract and shall be fully responsible for carrying out the design, renovation, rehabilitation, construction, financing, or maintenance of the education facility. The contractor may cooperate with another entity or entities in any manner the contractor deems appropriate to provide for the financing, design, renovation, rehabilitation, construction or maintenance of the public school facilities envisioned by this Act.
- (d) Education agency shall mean the Guam Department of Education.

Education facility as used in this Act shall mean public (e) elementary and secondary schools on Guam, to include its athletic fields and playgrounds, excluding the five leased schools under the education agency. Lease shall mean a lease from an education agency to the (f) contractor entered into at the time of the contract for the property. Lease-back shall mean the lease from the contractor to (g) the education agency of the rehabilitated, renovated or newly constructed education facility.

- (h) Lease-back period shall mean the term of the lease from the contractor to the education agency.
- (i) Property shall mean any property on which an education facility is located.

§ 58E102. Authorization to Enter into Long-term Leases. For the purpose of facilitating the financing, design, construction and rehabilitation and maintenance of an education facility encompassed by this Act, the government of Guam or an education agency, as the case may be, is authorized to lease, if required, to the contractor sufficient government of Guam real property on which to rehabilitate an education facility; provided, such property is in the inventory of the education agency or the government of Guam. The property may be the site of an existing education facility under the control of an education agency, which existing facility may be rehabilitated under the provisions of this Act.

The education agency is also authorized to lease back from the contractor the property for a period mutually agreed upon between the education agency and the contractor as may be reasonably necessary to amortize over the lease-back period the costs associated with the design,

renovation, rehabilitation, construction or maintenance of the education facility. In no event shall the end of such lease-back period be later than the date thirty (30) years from the scheduled date of completion of the education facility. The lease-back may be structured as an annually renewable lease with a provision for automatic renewals to the extent that pledged revenue under § 58E107 is available. The lease-back *shall not* be construed as a debt under any applicable debt limitation under the Guam Organic Act or Guam law.

Identification of Projects and Procurement. Under the § 58E103. Superintendent of Education's direction, the education agency shall utilize the Program Study, and the report generated by the Department of Interior (DOI)-funded assessment report by the Army Corps of Engineers, to identify and prioritize potential projects to be completed. The list of projects shall be included in a Request for Proposals developed by the education agency. Upon receipt of the Program Study, the Superintendent of Education shall solicit Requests for Proposals (RFP) through the Department of Public Works, in compliance with the Guam Procurement Law, for the financing, design, construction and rehabilitation of the education facility, according to the needs of the education agency and consistent with this Chapter. The choice of the contractor shall be made by a selection committee comprised of the Superintendent of the Department of Education, serving as Chairman, and including the Director of the Department of Public Works or Deputy Director, the Director of the Department of Land Management or Deputy Director, the Administrator of the Guam Environmental Protection Agency or Deputy Administrator, and the Administrator of the Guam Economic Development Authority or Deputy Administrator. The committee shall assess the prior performance of the contractor on similar projects, and shall

be free to disqualify any contractor that does not have a successful record of project completion on Guam.

26

The selection of a contractor *shall* be based upon the proposal that delivers the best value for Guam in meeting the objectives of the education agency.

The RFP shall be issued within thirty (30) days after the receipt of the Program Study for the design, renovation, rehabilitation, construction or maintenance of the education facility.

§ 58E104. Responsibilities of Developer/Contractor. The contract shall require that the contractor be responsible for all costs, expenses and fees of any kind or nature, associated with the rehabilitation, design, civil improvements, on-site and off-site infrastructure, construction, permits, and financing associated with the completion of an education facility, including the financing of furniture and equipment for the education facility, as and to the extent provided by the education agency in the Request for Proposals. The lease-back may provide that if sufficient funds are not appropriated or otherwise available for the payment of amounts due under the lease, the education agency will have the obligation to vacate the education facility, and the contractor shall have the right of use and occupancy of the education facility for the remainder of the term of the lease, unless new mutually satisfactory terms are entered into. For this purpose, the lease may provide that its term shall be extended for a period not to exceed the shorter of ten (10) years beyond the original term of the lease-back, or such period of time as is necessary to repay in full any financing arranged pursuant to § 58E108 of this Chapter. The capital maintenance costs shall be paid by the education agency.

1	§ 58E105. Contractual Safeguards. Prior to undertaking the work
2	of rehabilitating educational facilities, the Guam Economic Development
3	Authority, the Department of Public Works, the Guam Department of
4	Education, and the developer or contractor, shall negotiate and enter into a
5	binding construction contract to build or refurbish the educational facility in
6	accordance with the Guam Building Code (21 G.C.A. Ch. 67), and any other
7	applicable requirements. The construction contract shall contain contractual
8	obligations typically found in government of Guam construction contracts,
9	including, but not limited to:
10	(a) warranties;
11	(b) liquidated damages;
12	(c) performance and payment bonds;
13	(d) indemnity;
14	(e) insurance;
15	(f) standard specifications;
16	(g) technical specifications;
17	(h) progress schedule;
18	(i) maintenance;
19	(j) compliance with Guam labor regulations;
20	(k) compliance with Guam prevailing wage rates for
21	employment of temporary alien workers (H2) on Guam;
22	(l) compliance with Public Law 29-98: restriction against
23	contractors employing convicted sex offenders to work at government
24	of Guam venues.
25	The contract must be submitted for review and approval to all entities
26	charged by law with the duty to review and approve government contracts

including the Office of the Attorney General.

§ 58E106. Assignments. To facilitate the purpose of this Act and provide security for the holders of any financing instruments issued pursuant to this Act, the contractor may assign, without the need of the consent of the education agency, the contract, the lease and lease-back to any underwriter, trustee or other party as appropriate to facilitate the contractor financing.

§58E107. Pledge of Revenues.

- (a) Rental payments under the lease and the lease-back may be secured by a pledge or other reservation of revenues collected by the government of Guam from the following:
  - Taxes collected under the Business Privilege Tax (1)Law (namely, 11 GCA Chapter 25, excluding the alcoholic beverage taxes, liquid fuel taxes, automotive surcharges, tobacco taxes and real property taxes). The business privilege tax pledged or reserved shall only apply to the unpledged portion of the business privilege tax (currently one percentage point of the current four percent business privilege tax rate) so as not to violate the government's covenants to bondholders of the Series A, Series B and Series C Limited Obligation bonds authorized through Public Law 31-76, Public Law 31-196 and Public Law 31-276. The sum of approximately One Million Eight Hundred Eighty-Two Thousand Eighty-Two Dollars (\$1,882,082) shall fund interest in Fiscal Year 2015, and the sum of approximately Two Million Five Hundred Sixty Four Thousand One Hundred Sixty-Five Dollars (\$2,564,165) shall fund interest payment annually for Fiscal Years 2016 through 2018.

i	(2) The sum of One Million Two Hundred Thousand
2	Dollars (\$1,200,000) from the revenues received pursuant to
3	§22425(q)(5) of Article 4, Chapter 22 Division 2, Title 5, Guam
4	Code Annotated will be available annually beginning in Fiscal
5	Year 2016; and
6	(3) The sum of Four Million Eight Hundred Thousand
7	Dollars (\$4,800,000) from the maturity of Business Privilege
8	Tax Bond Series 2013C shall be available annually beginning
9	in Fiscal Year 2019.
10	(b) Revenues pledged or reserved shall be remitted in the
11	following manner:
12	(1) The Business Privilege Tax shall only pay for the
13	interest payments of the lease and the lease-back pending the
14	maturity of the Business Privilege Tax Bond Series 2013C in
15	Fiscal Year 2019, and said interest payments shall cease.
16	(2) Revenues received pursuant to §22425 (q)(5) of
17	Article 4, Chapter 22 Division 2, Title 5, Guam Code
18	Annotated, upon availability; and
19	(3) Upon the maturity of the Business Privilege Tax
20	Bond Series 2013C.
21	Any amounts pledged as provided in this Section are hereby
22	continuously appropriated for the purpose of making lease-back payments,
23	but any amounts only reserved as provided in this Section, and not pledged,
24	shall be subject to annual appropriation for the purpose of making lease-back
25	payments. The revenues pledged or reserved and thereafter received by the
26	government of Guam or by any trustee, depository or custodian shall be
27	deposited in a separate account and shall be immediately subject to such

reservation or the lien of such pledge without any physical delivery thereof or further act, and such reservation or the lien of such pledge *shall* be valid and binding against all parties having claims of any kind in tort, contract or otherwise against the government of Guam or such trustee, depository or custodian, irrespective of whether the parties have notice thereof. The instrument by which such pledge or reservation is created need not be recorded.

Use of Tax-Exempt Bond, Taxable Bond and Other § 58E108. Financing Instruments for Financing. To minimize the financing cost to the education agency, financing utilized by the contractor to fund the design, renovation, rehabilitation, construction or maintenance of an education facility shall be through tax-exempt obligations, taxable bond obligation, or other financial instruments, provided, such financing is available at interest rates determined by the education agency to be reasonable and competitive. Alternatively, the contractor may use an alternative method of financing, including, but not limited to, a short term debt, mortgage, loan, federally guaranteed loan or loan by an instrumentality of the United States of America if such financing will better serve the needs of the people of Guam. Such alternative financing shall be approved by I Liheslaturan Guåhan. The purpose for the requirements of this Section is to assure the education agency pays the lowest possible interest rate so that the cost to the education agency of financing the design and construction of an education facility, amortized through the lease-back payments from the education agency to the contractor, will be lower than regular commercial rates.

§ 58E109. Utilities, Maintenance and Repair. The education agency shall be responsible for the connection and payment of all utilities,

including without limitation, power, water, sewer, telephone, and cable, and all maintenance and repair and exterior groundskeeping and landscaping, and upkeep of the education facility.

§ 58E110. Severability. If any provision of this Act or its application to any person or circumstance is found to be invalid or contrary to law, such invalidity *shall not* affect other provisions or applications of this Act which can be given effect without the invalid provisions or application, and to this end the provisions of this Act are severable."

Joyce C.H. Tang, Esq. Civille & Tang, PLLC 330 Hernan Cortez Avenue, Suite 200 Hagatna, Guam 96910

Re: Protest Regarding Request for Proposals for Project No.

730-5-1056-L-YIG (Lease Financing for Design,

Renovation, Rehabilitation, Construction and Maintenance for Public Schools (Beginning with Simon Sanchez High School)

Ms. Tang:

This serves to respond to Core Tech International Corp, Inc.'s ("Core Tech") protest as set forth in your letter of February 8, 2017. The basis for the protest is that the above referenced RFP fails to include cost as an evaluation factor. Core Tech also argues that the RFP fails to follow the requirements of 5 GCA § 8E.

The governing laws state that selection of a contractor shall be based upon the proposal that delivers the best value for Guam in meeting the objectives of the education agency. See 5 GCA §§58D105 & 58E103. The RFP provides for this as DPW is authorized to specify the form of the RFP. See 2 GAR §3114. Furthermore, the law requires the issuance of a RFP. RFP is the selection of the best qualified offeror and price is not to be an evaluation criteria. Unless otherwise required, Guam law does not require that a comparison of pricing be part of the evaluation criteria. Also, 2 GAR § 3114(k) (Submission of Cost or Pricing Data), and related sections, specifically provide for the government to negotiate pricing after the best qualified offeror has been selected. Thus, Government's position is that the Act authorizes use of a two (2) phase procurement as set forth in the RFP, that such is consistent with its discretion to procure a design-build SSHS and that the RFP provides all prospective proposers an equal opportunity.

Nonetheless, while the Department of Public Works' ("DPW") Contracting Officer and the Evaluation Committee are confident that Core Tech's written protest is without merit we nonetheless have decided to include pricing as an evaluation criteria. This decision is based on the continuing deterioration of Simon Sanchez High School ("SSHS") and Guam's other public schools. DPW and the Evaluation Committee remain of the opinion that an urgency exists with the procurement. In order to avoid further delays with what we consider unnecessary and unreasonable protests staff have been

Protest Regarding for Proposals Project No.: 730-5-1056-L-YIG

Renovation, Rehabilitation, Construction and Maintenance for Public Schools (Beginning with Simon Sanchez High School)

Page 2 of 2

instructed to amend the RFP to provide pricing as an evaluation factor.

The second complaint contained in Core Tech's protest concerns DOE's obligation to utilize the "Program Study". We believe Core Tech is misreading the Act. The legislation does not define what is meant by Program Study. As the DOI and Army Corps of Engineers reports are referenced in the Program Study portion of the Act it is our reading that the Program Study refers to the Comprehensive Capital Improvement Plan ("CCIP"). The legislation defines the CCIP to mean a plan that takes into consideration the physical condition of each school, area population, enrollment patterns and bussing logistics. In other words, the Program Study requires DOE to prepare a study exactly like the CCIP. As the RFP includes the Army Corps of Engineers assessment report, which in turn relies on DOI's report, nothing further is required of the government at this time.

Core Tech has been on notice for the past year and a half that DPW's Director, Mr. Glenn Leon Guerrero, is recused on the procurement. Accordingly, Core Tech is once again directed to address future items of this nature to Mr. Felix C. Benavente, DPW's Deputy Director and Chief Procurement Officer for this RFP.

This is a final decision of the Contracting Officer, acting in consort with the Evaluation Committee, concerning Core Tech's February 8, 2017 protest of the above referenced RFP. You are hereby advised that Core Tech has the right to seek any administrative or judicial review authorized by law.

Please contact my office if you have any questions.

Sincerely

Félix C. Benavente Deputy Director
